Lenoa Peebles Silver, M. L. Associate Librarian
J. Randall Sloop, M. Ed. Director of Student Finance
Ann L. Stratton, R. N., P. H. N., M. A. Associate Dean, School of Nursing
Dorothy E. Syme, B. S., A. D. A. Dietitian
Clinton A. Wall, B. S., A. D. A. Director of Food Service
THE FACULTY

LOSEY, LEON B., Emeritus Professor of Agriculture
B. A., 1921, Walla Walla College; M. S., 1939, Oregon State College

MILLER, LULU HILL, Emeritus Professor of Art

SMITH, WALTER I., Emeritus Professor of Education
B. A., 1911, Union College; M. S., 1917, Whitman College; Ed. D., 1934, George Washington University; LL. D., 1957, Walla Walla College

PROFESSORS

APLINGTON, KENNETH A., Professor of English
B. A., 1935, Walla Walla College; M. A., 1942, University of Washington

ASHLEY, LAURENCE M., Professor of Zoology
B. S., 1930, Michigan State University; M. A., 1932, University of Michigan; Ph. D., 1945, University of Southern California

BLACKNEY, ANNA L., Professor of Library Science
B. A., 1930, Emmanuel Missionary College; B. S. in L. S., 1936, Western Reserve University; M. A., 1941, University of Chicago

*Booth, Ernest S., Research Professor of Zoology
B. A., 1938, Pacific Union College; M. S., 1940, University of Washington; Ph. D., 1947, State College of Washington

BOWERS, GEORGE W., Professor of Chemistry
B. A., 1917, Union College; M. A., 1924, Ph. D., 1935, University of Nebraska; LL. D., 1956, Walla Walla College

BROWN, ROBERT H., Professor of Physics
B. A., 1940, Union College; M. S., 1942, University of Nebraska; Ph. D., 1950, University of Washington

BULL, STANLEY, Professor of Education
B. A., 1936, American University of Cairo (Egypt); M. A., 1937, University of Edinburgh (Scotland); Ph. D., 1954, University of Michigan

CHRISTIAN, PERCY W., Professor of History
B. A., 1926, Broadview College; B. S., 1928, Lewis Institute; M. A., 1929, Ph. D., 1935, Northwestern University

COFFIN, HAROLD G., Professor of Biology
B. A., 1947, M. A., 1952, Walla Walla College; Ph. D., 1955, University of Southern California

CROSS, EDWARD F., Professor of Engineering

CERNET, STERLING K., Professor of Music

HAFNER, JOHN J., Professor of Music
B. A., 1941, Emmanuel Missionary College; M. Mus., 1949, Chicago Musical College

HANSON, FRED R., Professor of Nursing Education
R. N., 1930, Mason Memorial Hospital; B. A., 1932, Walla Walla College; M. A., 1942, University of Washington

HEUBACH, PAUL C., Professor of Religion
B. A., 1935, Pacific Union College; M. A., 1944, Seventh-day Adventist Theological Seminary

MECKLING, FRANK E., Professor of History
B. A., 1929, Washington Missionary College; M. A., 1931, University of Maryland; Ph. D., 1950, University of California at Los Angeles

RASMUSSEN, HANS L., Professor of Education
B. A., 1937, Emmanuel Missionary College; M. A., 1943, University of Michigan; Ed. D., 1946, Stanford University

SORENSEN, AGNES L., Professor of Modern Languages
B. A., 1923, Emmanuel Missionary College; M. A., 1929, University of Michigan

* THURSTON, CLAUDE E., Professor of Chemistry
B. A., 1926, Walla Walla College; M. S., 1934, University of Washington; Ph. D., 1948, State College of Washington

WEST, MELVIN K., Professor of Music

WESTERMeyer, HARRY E., Professor of History
B. A., 1917, Clinton Theological Seminary; M. A., 1934, College of the Pacific; Ph. D., 1946, Stanford University

ASSOCIATE PROFESSORS

*BALHARIE, GORDON S., Associate Professor of Religion
B. A., 1945, Washington Missionary College; M. A., 1949, Seventh-day Adventist Theological Seminary

*BRINKER, ORASON L., Associate Professor of Mathematics
B. A., 1939, Union College; M. A., 1945, University of Denver

DAVIS, MELVIN W., Associate Professor of Music
B. A., 1949, College of the Pacific; M. Mus., 1954, Chicago Musical College

LUDGATE, T. K., Associate Professor of Religion
B. A., 1942, Washington Missionary College; M. A., 1945, Seventh-day Adventist Theological Seminary

MEEHLING, J. G., Associate Professor of Business Administration

RITTENHOUSE, EVELYN, Associate Professor of Secretarial Science
B. A., 1943, Pacific Union College; M. S., 1951, University of Southern California

SCHLOTHAUSER, LILAH GODFREY, Associate Professor of Mathematics
B. A., 1923, Walla Walla College; M. S., 1934, University of Washington

SEARLE, BERNICE E., Associate Professor of Education
B. A., 1939, Walla Walla College; M. A., 1941, University of Minnesota

SHANKEL, CECIL W., Associate Professor of Chemistry
B. A., 1924, Walla Walla College; M. A., 1926, University of Nebraska

SILVER, ROBERT E., Associate Professor of Education

STOEHR, HENRIQUE G., Associate Professor of Modern Languages
B. A., 1948, Walla Walla College; Dr., U. P., 1952, University of Paris

STRATTON, ANN L., Associate Professor of Nursing Education

WALLER, JOHN O., Associate Professor of English
B. A., 1941, San Diego State College; M. A., 1949, Ph. D., 1954, University of Southern California

* WINTER, EUGENE S., Associate Professor of Physical Education
B. A., 1941, Walla Walla College; M. S., 1948, State College of Washington

WRIGHT, EVELYNNE F., Associate Professor of Home Economics
B. A., 1941, Pacific Union College; M. S., 1953, Oregon State College

ASSISTANT PROFESSORS

ALCock, HERBERT J., Assistant Professor of Religion
B. A., 1927, B. Th., 1927, Emmanuel Missionary College; M. A., 1942, Michigan State University

BARNett, CLAUDE C., Assistant Professor of Physics
B. S., 1952, Walla Walla College; M. S., 1956, State College of Washington

BURGESON, RUTH E., Assistant Professor of English
B. A., 1951, M. A., 1957, Pacific Union College

DAHLBECK, RUSSELL M., Assistant Professor of Physical Education
B. S., 1950, Walla Walla College; M. S., 1953, University of Washington

EMERY, BEATRICE I., Assistant Professor of Biology
B. A., 1943, Walla Walla College; M. S., 1948, University of Nebraska

GROVE, J. PAUL, Assistant Professor of Religion

HARE, GORDON B., Assistant Professor of Mathematics
B. A., 1951, Washington Missionary College; M. S., 1954, University of Colorado

JONES, CARL T., Assistant Professor of Chemistry
B. A., 1933, Washington Missionary College; M. S., 1939, Catholic University of America
Ph. D., 1959, Oregon State College

LITKE, RICHARD L., Assistant Professor of Biblical Languages
B. A., 1948, Walla Walla College; B. A., 1953, M. A., 1953, University of California
Ph. D., 1959, Yale University

MASDEN, GLENN W., Assistant Professor of Engineering
B. S. E. E., 1955, M. S. E. E., 1958, University of Colorado

MOORE, ROBERTA J., Assistant Professor of English
B. A., 1948, Atlantic Union College; M. A., 1953, Boston University

RIGBY, DONALD W., Assistant Professor of Biology
B. A., 1950, La Sierra College; M. A., 1956, Walla Walla College

TEMPLE, CHARLES V., Assistant Professor of Art
B. A., 1947, Colorado College; M. A., 1954, San Jose State College

TRAUTWEIN, CALVIN L., Assistant Professor of Industrial Education
B. A., 1945, La Sierra College; B. S., 1950, Pacific Union College; Ed. M., 1955, Oregon State College

WALTERS, THOMAS W., Assistant Professor of Education

WEAVER, GENEVIEVE STABLER, Assistant Professor of Secretarial Science
B. A., 1949, Walla Walla College

YOUNG, PAULINE, Assistant Professor of Nursing
R. N., 1927, Portland Sanitarium and Hospital; B. S., 1933, University of Oregon; M. S., 1946, University of Washington

INSTRUCTORS

ANDREWS, KATHRYN, Instructor in Secretarial Science
B. A., 1948, Walla Walla College

*BATTENBURG, JOSEPH R., Instructor in Engineering
B. S., 1954, Emmanuel Missionary College; B. S. (Eng.), 1956, University of Michigan

BELL, CHARLES, Instructor in Physics
B. S., 1956, Mississippi State University; M. S., 1957, Stanford University

BOECK, STELLA, Instructor in Nursing
B. N., 1927, Florida Sanitarium and Hospital; B. S. N. Ed., 1943, Washington Missionary College

BOND, ARLEDA, Instructor in Music
B. Mus., 1958, La Sierra College

BULL, NANCY MURDOCH, Instructor in English
B. A., 1930, Emmanuel Missionary College; M. A., 1954, Pacific Union College

CANADAY, LEWIS H., Instructor in Industrial Education
B. S., 1953, Walla Walla College

COWIN, DARRELL J., Instructor in Industrial Education

EVANS, HELEN WARD, Instructor in English

FOSTER, ZEPH H., Instructor in Education
B. A., 1951, Walla Walla College; M. S., Ed., 1956, University of Idaho

FROMAN, NADA, Instructor in Diet Therapy
B. S., 1954, College of Medical Evangelists; A. D. A., 1955

HARTER, CHARLES W., Instructor in Engineering

JONES, LUCILE HALL, Instructor in Nursing Education
R. N., 1933, Florida Sanitarium and Hospital; B. S. N. Ed., 1936, Washington Missionary College; M. S., 1955, Oregon State College; M. A., 1956, Walla Walla College

KNAPP, BETTY L., Instructor in Nursing
B. S., 1951, M. A., 1957, Walla Walla College

LARSON, EDWIN W., Instructor in Engineering
B. S. in Engineering, 1949, Walla Walla College; P. E., 1956, Oregon

LAY, MAE MACKLIN, Instructor in English and Speech
B. A., 1924, Walla Walla College

MILLER, PHYLLIS E., Instructor in Operating Room Technique
B. S., 1952, Walla Walla College

NULL, CHARLES E., Sr., Instructor in Medical and Surgical Specialties
B. S., 1953, Walla Walla College

PASHNIAK, DANIEL, Instructor in Engineering
B. S. in Engineering, 1959, Walla Walla College

*PENNER, JONATHAN G., Instructor in Speech
B. A. 1944, Emmanuel Missionary College; M. S., 1958, Purdue University

RANDOLPH, RICHARD D., Instructor in Music
B. S., 1932, Union College; M. Mus., 1958, Lewis and Clark College

GENERAL INFORMATION
THE COLLEGE
AND ITS AIMS

Walla Walla College is a private, church-related institution of higher learning conducted by the Seventh-day Adventist denomination. Founded in 1892, it serves as a center of higher education for the youth of the Church in the Pacific Northwest. Students from other geographic regions of the United States, Canada, and many foreign lands, bring a cosmopolitan influence to its campus that enriches and stimulates the cultural life of the student. The College, though essentially a coeducational liberal arts college, also offers certain professional and preprofessional training.

Seventh-day Adventists accept without reservation the teachings of the Bible, among which they consider basic the immutability of the law of God, the original perfection of the universe, the fall of man, the plan of salvation, the imminent second coming of Christ, and the existence of the redeemed throughout eternity.

In harmony with these doctrines, Walla Walla College recognizes that, "true education means more than the pursuit of a certain course of study. It means more than a preparation for the life that now is. It has to do with the whole being, and with the whole period of existence possible to man. It is the harmonious development of the physical, the mental and the spiritual powers. It prepares the student for the joy of service in this world, and for the higher joy of wider service in the world to come."

To bring into actuality this conception of education, Walla Walla College declares its specific aims to be:

1. To present the ideals and principles of Christianity in such a way as to promote the development of a consistent Christian life characterized by loyalty to God and service to humanity.

2. To train for leadership in church and community in harmony with the distinctive ideals and world program of the Seventh-day Adventist denomination.
3. To develop character distinguished by power of will and ability to control self, bringing every motive and desire into conformity with the eternal principles of right established by God and respected by the most enlightened elements of humanity.

4. To provide a broad basis for true culture which will permit proper discrimination as to the values of life, encourage devotion to noble ideals and practices, and lead to a worthy use of leisure.

5. To guide in the appropriation of the accumulated knowledge of the ages, in the stimulation of the power of independent reasoning, and in the acquisition of the ability to inspire others to a greater passion for wisdom and truth.

6. To inspire intelligent and sincere love for our country and its fundamental principles, while at the same time emphasizing the brotherhood of man, thus providing a preparation for judicious participation in the privileges and responsibilities of citizenship.

7. To encourage proper evaluation of the place of the individual in modern society, of his relationship to the social and economic order, and of his attitude toward an ever-changing civilization.

8. To facilitate the acquisition and maintenance of a high standard of bodily health, thus giving the individual genuine satisfaction in life and enabling the mind and spirit to make valuable contributions to our contemporary world.

9. To stimulate participation in practical vocational activities which will lead to an appreciation of the dignity of labor, furnish a definite conception of the abilities and traits requisite for success in the various vocations, and impart a proficiency adequate to provide employment in a productive and self-respecting occupation.
GENERAL
INFORMATION

WALLA Walla College is located in the city of College Place, in the historic, fertile Walla Walla Valley of southeastern Washington. The Old Oregon Trail, near the campus, leads directly to the site of the old mission which was conducted by Marcus Whitman from 1836 to 1847, and which is now being reconstructed by the Federal government as the Whitman National Monument. The scenic Blue Mountains to the east are but a few minutes' drive from the campus, and offer unusual opportunities for recreation and relaxation.

The College, in successful operation since December 7, 1892, was established in harmony with a resolution unanimously adopted at the General Conference of Seventh-day Adventists held in Battle Creek, Michigan, in 1891.

CAMPUS AND BUILDINGS

ADMINISTRATION BUILDING. The Administration Building is a three-story structure located in the center of the campus. Its ivy-covered walls symbolize the rich academic tradition and history of service to students. This building houses the administrative offices, Student Association Center, and a number of classrooms, laboratories, and teacher offices.

RESIDENCE HALLS. Conard Hall offers comfortable accommodations for 260 women, together with such special features as a large worship room done in church style, a recreation room, and an attractive parlor. A modern communication system aids in making dormitory life delightful.

Sittner Hall, the men's residence hall, is one of the newer buildings on the campus. Erected in 1947, it houses 315 men, and is modern in every respect. A spacious lobby and parlor, a worship room seating 400, a recreation room, and attractive student rooms assure comfortable living.

LIBRARY. The College Library is a vital part of the educational program at Walla Walla College. The building, completed in 1944, is convenient and well
planned. Ample reading room accommodations, the open-shelf system, seminar and conference rooms, and a browsing room contribute to the study and enjoyment of books. A microfilm reader and a microcard reader make scholarly material on microfilm and microcards accessible. The Library contains 56,000 bound volumes and five thousand pamphlets. An average of 2,500 volumes are accessioned annually. The Library receives 425 current periodicals regularly and also has a classified file of almost one thousand mounted pictures. All these materials are adequately catalogued by modern methods, and periodical indexes and other bibliographical aids are available. Resources in other libraries are available to students and faculty members through the Library's membership in the Pacific Northwest Bibliographic Center, which serves as a clearing house for interlibrary loans.

BIOLOGY BUILDING. The Biology Building consists of a large lecture hall, seven laboratory rooms, four teacher offices, ten graduate-student research rooms, a library and seminar room, two photographic dark rooms, a large stockroom, and a storeroom. The museum collections include thousands of specimens of mounted birds, mammals, insects, marine animals, fossils, plants, and smaller groups.

Off the main campus the Department of Biological Sciences operates the Walla Walla College Biological Station at Rosario Beach, Washington, on the Puget Sound.

CHEMISTRY BUILDING. The Chemistry Department is housed in a two-story brick building located southwest of the quadrangle. The rather extensive accommodations include four classrooms, four laboratories, a library, a seminar room, three offices, a research room, and two stockrooms.

CLARA E. ROGERS ELEMENTARY SCHOOL. The Rogers School, completed in 1952, is one of the most modern elementary school buildings in eastern Washington. The building has 27,000 square feet of floor space and contains nine large classrooms, teacher offices, library, curriculum laboratory, craft room, administrative offices, and a multipurpose room for such activities as band, orchestra, or choir rehearsal. Five and one-half acres of playground area adjoin the school to the south and west. These facilities provide an excellent experience for students in teacher training.

COLUMBIA AUDITORIUM. Columbia Auditorium, a reinforced concrete gymnasium-auditorium with a seating capacity of over 2,000 persons, is equipped with a splendid pipe organ. The building serves the college community adequately as an auditorium and as a gymnasium. The large floor provides ample space for physical education activities, games and roller skating, while retaining the galleries for use of spectators.

E. C. KELLOGG HALL. Completed in 1958, this ultramodern building contains food service facilities and the Home Economics department, and is one of the most functional buildings of its type in the entire Northwest.

ENGINEERING BUILDING. The Engineering Department has several classrooms, a modern drafting room, a well-equipped materials testing laboratory, and an electrical engineering laboratory. Generous financial grants in recent years have provided much expensive equipment which is vital to a specialized curriculum such as engineering.

JOHNSON MEMORIAL CONSERVATORY. The Conservatory and the annex provide the Music Department with studios, practice rooms, and an auditorium for recital purposes. Special listening rooms make the growing record library accessible to interested students.

STUDENT HEALTH CENTER. A Student Health Center with a full-time registered nurse as director is maintained on the campus. Clinical and hospital
facilities, consultation rooms, treatment rooms, and other necessary facilities are available for student use. Several physicians maintain regular office hours in the Student Health Center.

**SWIMMING POOL.** The College maintains an indoor swimming pool for instructional and recreational purposes. Water for the pool is supplied from the College artesian well and is maintained at a comfortable temperature.

**VOCATIONAL BUILDINGS.** Several industries owned and operated by the College provide vocational training and also offer students opportunities for part-time employment while in college. Students may learn auto mechanics, baking, bookbinding, carpentry, dairying, farming, general merchandising, laundering, metalworking, printing, and woodworking.

The College Farm, consisting of 260 acres, raises hay, grains, sugar beets and beans. The new college barn, erected in 1954, is one of the most modern installations of its type in the Walla Walla Valley. A herd of approximately one hundred cows supplies milk for the College and for commercial uses.

**SPECIAL INFORMATION FOR VETERANS**

**HOUSING.** In addition to the residence halls, the College operates fifty units of one- and two-bedroom apartments to which married veteran students and their families have occupancy priority. Unmarried veterans should plan to live in the regular residence halls.

**KOREAN WAR VETERANS.** Walla Walla College has been approved for training of Korean War Veterans under Public Law 550 and 894. Servicemen who have served in the Armed Forces between June 20, 1950, and January 31, 1955, are eligible for training benefits under Public Law 550 or 894. To receive the benefits provided by these laws, the veteran must obtain a “Certificate of Education and Training” from the Veterans Administration. Application forms for these benefits can be obtained at any Veterans Administration Office or at the Office of Veterans Affairs at Walla Walla College. Application should be made before school begins if at all possible.

P. L. 550 veterans pay school expenses direct to the Business Office, as non-veteran students do. A “Monthly Certification” form is completed by the veteran each month and approved by the College. The Veterans Administration authorizes payment from the information supplied on this form. The subsistence checks can then be expected to reach the veteran on the twentieth of the following month; however, the first check may take as long as sixty days to arrive after eligibility has been established. Additional information may be obtained from any Veterans Administration Office or at the Veterans Office of the College.

**RELIGIOUS ACTIVITIES**

Walla Walla College sponsors several organizations and activities which aid in training the students for Christian service.

**CHURCH AND SABBATH SCHOOL.** The Walla Walla College Church with a membership of approximately 1,050 provides opportunities for group worship and offers training in missionary endeavor and church organization.

The Sabbath school provides leadership training and teaching experiences for college students who wish to develop their abilities in religious education.
MISSIONARY VOLUNTEER SOCIETY. The Missionary Volunteer Society has for its object the development by theory and practice, of efficient missionary workers. Several auxiliary bands, such as Foreign Mission, Literature Distribution, and Sunshine, are under the direction of this organization.

PRAYER BANDS. The prayer bands under student leadership encourage the prayer life of the students. These groups meet regularly and foster the spiritual life of the individuals who participate.

STUDENT ORGANIZATIONS

ASSOCIATED STUDENTS. The Associated Students is an organization whose membership consists of all faculty members and regularly enrolled students. The Association has for its object the promotion of Walla Walla College ideals and activities. The two official publications of the Associated Students are The Collegian, the weekly newspaper of the College, and The Mountain Ash, the yearbook.

SOCIETIES AND ORGANIZATIONS. Student organizations based on residence include Aleph Gimel Ain for the young women of the College residence halls, Omicron Pi Sigma for the young men of the College residence halls, and the Chiquita Sola, Aurora Duxes, and Epsilon Mu Sigma for village students.

Various departments also sponsor student organizations for the special interests of their groups. These organizations include the A Tempo Club, Beta Mu, Biology Club, Business Administration Club, Chemistry Club, Circulo Castellano, Engineering Club, Grammateis Club, Gymkhana Club, Industrial Education Club, International Relations Club, Les Amis de L'Art Club, Pauling Club, Pegasus Club, Teachers of Tomorrow, Theology Club, Theta Phi Delta.
GENERAL REGULATIONS
GENERAL REGULATIONS

In all matters pertaining to personal conduct, students are expected to act as responsible citizens and members of a Christian community. Any student whose activities demonstrate lack of harmony with the principles and standards of the College thereby places in jeopardy his membership in the student body. Every effort will be made to stimulate students to worthy scholastic endeavor and consistent Christian living, but the College cannot be expected to assume responsibility for students who are not in sympathy with its announced purposes.

STUDENT CITIZENSHIP

Each individual coming to Walla Walla College for the purpose of entering any department of the College is subject to its supervision from the time of arrival in College Place, and is under its jurisdiction until his connection is terminated by graduation or by an officially approved withdrawal. Any regulation adopted by the Board or the faculty, and publicly announced to the student body, shall have the same force as if published in this bulletin.

The record of each student is reviewed periodically, and his continuation in college is based upon his attitudes and general conduct, as well as his scholastic attainments.

RESIDENCE

All unmarried students are required to live in one of the College residence halls and to board in the College cafeteria, unless they live with their parents in the immediate community. Under special circumstances, however, sophomores and upper division students with superior college records may make application to the Administrative Council for permission to live off the campus in an officially approved home. Such applications will be acted on only at the beginning of a
quarter. Failure to secure the official approval of the Administrative Council to reside in the community or to withdraw from a College residence hall will invalidate the registration of the student. Students who have received approval for off-campus living may be called into the College residence halls at any time.

CHAPEL

The chapel hour, which is held three times each week, is regarded as a vital part of the total educational program at Walla Walla College, and regular attendance is required of each student.

SABBATH OBSERVANCE

The seventh-day Sabbath is observed at Walla Walla College from sunset Friday to sunset Saturday, and all students are expected to conduct themselves in harmony with the sacred nature of the day. This includes attendance at the Friday evening devotional service, as well as Sabbath school and church service on Sabbath morning.

MORAL CONDUCT

Students are expected to abstain from behavior inconsistent with the basic principles of Christian living as interpreted by the College. Specifically, this includes the use of profane and unbecoming language, visiting pool halls or gambling places, attending the theater, motion pictures, or any other type of entertainment not approved by the College, the use of alcoholic beverages or tobacco in any form, card playing or having possession of cards, reading or having possession of pernicious literature, and engaging in improper associations. Those who engage in such practices will not knowingly be admitted or retained as students.

SOCIAL STANDARDS

Walla Walla College is a coeducational institution, and as such, recognizes the desirability of proper associations among its students. The marriage of students during the regular school year (September to June) or during the summer session is not approved, and students should make their marriage plans for the vacation periods immediately before or after summer school, or during a quarter when they are not registered in the College. The registration of any student who violates this regulation will be canceled. The social policies of the College are fully outlined in the Student Handbook, and each student is responsible for becoming familiar with these policies and acting in harmony with them.

USE OF VEHICLES

Since the ownership and the use of an automobile frequently militate against success in college, students are not encouraged to bring automobiles with them to the College unless absolutely necessary. Freshmen are not permitted to bring automobiles to the College, or to the vicinity, or to operate automobiles owned by other individuals.
All students, whether living in the residence halls or in the community, who own or operate automobiles, must register these automobiles within twenty-four hours after arrival at the College; failure to comply with this regulation makes the student liable to a penalty of $25.00. A fee of $1.00 is charged to defray costs of automobile registration, decal, and administration. Regulations governing the use of automobiles by students are published in the Student Handbook; students are expected to become familiar with these regulations, since failure to comply with them may result in disciplinary action.

MEDICAL EXAMINATION AND SERVICE
At the time of admission to the College, each new student is required to submit evidence of a standard physical examination, or to have such examination under the direction of the College physician.

MISCELLANEOUS
The College cannot accept responsibility for any loss or damage to the personal property of any student.

Any student causing damage to College property is expected to report such damage promptly and to pay the cost of repairs or replacement; if the damage is not reported to the proper authority within twenty-four hours, double the cost of replacement will be charged, and disciplinary action may result.

THE RESIDENCE HALLS
The College believes that the purpose of the institution can be realized most successfully when all unmarried students live in the College residence halls. Here, amid comfortable, homelike influences, the students may cultivate those habits of life and graces of character which distinguish the refined Christian man and woman. These years in the lives of students are usually the formative ones, when habits of promptness, neatness, self-control, courtesy, and ideals of association are formed. The value of such training is properly regarded as a most vital part of an education for life.

Daily association of earnest young people helps to develop strong Christian character in students. Attractive and homelike parlors are provided in each residence hall for group entertainments, and for the general use of the students during leisure time.

PLEDGE OF COOPERATION. Students who apply for admission to one of the College residence halls are understood by that act to pledge themselves to conform cheerfully to all regulations printed in this bulletin, the Student Handbook, or announced publicly.

STUDY HOUR. In order to provide an atmosphere of study, quietness is maintained during the evening study period. Permission must be secured from the dean for any absence from the residence halls during the study hours. Students are not expected to receive visitors or to make or receive telephone calls during this time except in case of emergency.

LEAVING THE CAMPUS. Since it frequently happens that students are unexpectedly called for, and since students are responsible to those in charge of the residence halls, no student should leave the campus for any length of time without making arrangements with his residence hall dean. For campus leaves which involve absence from classes, the student must also receive the permission of the Academic Dean.
Any student who finds it necessary to be absent from his residence hall after the retiring hour should make previous arrangements with his residence hall dean for entrance. Any attempt to enter a residence hall by other than the regular means will be considered a misdemeanor and will result in disciplinary action.

VISITORS. The College residence halls are considered to be private homes. Persons who call upon students in the residence halls are expected to follow the same rules of courtesy that they would if calling at any other private home. Young women may receive gentlemen friends in the residence hall parlors by permission of the Dean of Women.

ROOMS. Students living in the residence halls are required to care for their own rooms, and are expected to observe habits of neatness and cleanliness about the premises. When a student withdraws from school, his room should be left neat and clean. Failure to do this will incur a charge of $5.00.

Each student is expected to bring his own bedding—four sheets, two pillowcases, a bedspread, a pillow, blankets, or comforters—as well as towels, dresser scarfs, curtains, a drinking glass, a laundry bag, and a cover for the study table. A bathrobe or housecoat, and slippers should be provided for use during study hours. All women students expecting to work in the kitchen or laundry should bring three white uniforms made of light material.

Because of hazards of accident or fire, students are not permitted to possess firearms, candles, etc., in their rooms. Electrical appliances may be used only after being approved by the dean, and will be subject to a charge of $1.00 each per month.

Radios are provided for the use of students in the residence hall parlors. Students are not encouraged to have radios, phonographs, and tape recorders in their residence hall rooms, but permission to do so may be granted by the residence hall dean subject to certain general regulations.

WORSHIP ATTENDANCE. Attendance at evening and morning worship, Sabbath school, and Sabbath morning church services, is expected of all students. If a student is ill or for some other good reason cannot attend these meetings, he should obtain permission from his residence hall dean; he will then be expected to remain quietly in his own room. Excessive unexcused absences from dormitory worship are subject to disciplinary action.

SECONDARY SCHOOL STUDENTS. Secondary school students (grades nine to twelve) are not assigned accommodations in the College residence halls, but are referred to one of the boarding academies in the Pacific Northwest which are affiliated with Walla Walla College.
ACADEMIC INFORMATION

ADMISSION TO THE FRESHMAN CLASS

Applicants for admission to the Freshman class shall have been graduated from a recognized high school. The entrance examination will be taken by all applicants.

The official high school transcript of the applicant shall be sent to the Admissions Office. The following items must be included with the final transcript:

1. Intent to pursue a bachelor's degree.
2. Official transcripts from all high schools attended.
3. Official report cards from all high schools attended.
4. Standardized test scores, if applicable.

WALLA WALLA COLLEGE LIBRARY
Any student who fails to appear for his examination by the time the class begins shall score zero and his name will be sent in to the college for further action. Any attempt to enter a classroom late by other than the regular student will be grounds for expulsion and will result in disciplinary action.

 Violation: The Student council rules are considered to be absolute rules. Failure to obey the Student council rules are reason sufficient to justify any disciplinary action.
ACADEMIC INFORMATION

Walla Walla College will admit as students, men and women of good moral character who are willing to do earnest, faithful work. Any student seeking admission to the College thereby pledges to comply with the standards and regulations as published or announced. Should this pledge be broken, the student may be required to withdraw.

ADMISSION PROCEDURE

Formal application for admission to the College is required on a form supplied by the Registrar. A recent photograph and a $2.00 fee must be included. The chief factors considered by the Admissions Committee are good character, scholastic achievement, intellectual ability, and good health. Notification of acceptance is sent promptly after the applicant's records of previous work and recommendations have been received by the College. All records become the property of the College and are kept on permanent file. Applications should be made as early as possible prior to the quarter in which study is to commence. Students who are allowed to register temporarily may not be permitted to remain in college longer than one quarter without presenting a transcript of previous work.

ADMISSION TO THE FRESHMAN CLASS

Applicants for admission to the Freshman class shall have been graduated from a recognized secondary school. The pattern of subjects required for entrance is not rigidly prescribed, but an applicant should have completed those subjects which are prerequisites of the course of study he wishes to pursue in college. The following subjects included among the total presented for admission provide the
necessary background for any course of study in the College, and are thus highly recommended:

**PROVISIONAL ADMISSION.** Applicants who may lack one or more of the subjects required for entrance to their chosen course of study may be granted provisional admittance. In such case the preparatory work must be completed during the first year of residence. Students with provisional admission are not eligible for class membership.

**ADMISSION BY EXAMINATION.** Mature persons who have not completed secondary school or who are unable to furnish transcript of credits may be admitted to freshman standing through examinations as required or administered by the Admissions Committee. Students so admitted are not granted regular admission until they demonstrate ability to maintain a satisfactory scholarship record.

**CHANGING CURRICULUMS.** An applicant who has been admitted to one course of study or curriculum may not change to another without satisfying the entrance requirements of the curriculum to which he wishes to transfer. A stu-
dent is not considered for degree candidacy until the entrance requirements of his curriculum or course of study have been met.

**FRESHMAN ORIENTATION.** During the first week of the autumn quarter all entering freshmen are required to attend the Orientation Week program. Counseling and instruction concerning course of study, registration, college regulations, and a thorough physical examination are given. Several tests designed to guide students in planning individual programs are also administered.

**ADMISSION TO ADVANCED STANDING**

Applicants who have attended other institutions of collegiate rank may be admitted to advanced standing by submitting complete official transcripts of all credits embodying a statement of honorable dismissal. Failure to indicate that work has been taken at other institutions at the time of application invalidates any admission. The maximum amount of credit accepted from a junior college is 108 quarter credits.

Students transferring from nonaccredited institutions are given conditional status with tentative credit for previous work as evaluated by the Dean and Registrar or the Academic Standards Committee. If the student maintains a C average or above he may be given regular status with such credits for advanced standing as the transcript evaluation warrants. Failure to meet this standard will delay or prohibit graduation.

A student who has been dismissed from another institution because of poor scholarship, or who is on probation from such institutions, is not eligible for admission to the College until he can qualify for readmission to the institution from which he has been dismissed.

A transfer student with senior standing must be in residence three quarters and must complete a minimum of 36 credits including nine credits of upper division work in the major and three credits in the minor. A physical examination is required of all transfer students at the time of registration.

**ADMISSION OF SPECIAL AND TRANSIENT STUDENTS**

**SPECIAL.** Individuals ineligible for regular admission who are at least twenty-one years of age may be admitted as special students, and may register for any course for which they have sufficient background. Special students are not eligible for a degree. However, by completing requirements for regular admission they may become degree candidates.

**TRANSIENT.** Students who have been in residence at other institutions of higher learning and who are not candidates for a degree from this college may be classified as transients. This category includes those who wish to transfer limited credit to other institutions and those registering for certain adult education courses.

**CLASSIFICATION OF STUDENTS**

**FRESHMAN.** Applicants for admission to the College who fulfill the entrance requirements for their chosen course of study are listed as freshmen.

**SOPHOMORE.** Students who have met the entrance requirements of their chosen course of study and who have a minimum of 36 credits with a grade-point average of at least 2.00 are listed as sophomores.

**JUNIOR.** Students who have a minimum of 84 credits with a grade-point average of at least 2.00, who can complete degree requirements by the end of the following school year, and who have been approved by the Registrar are eligible for junior class membership.
SENIOR. Students with a minimum of 136 credits with a grade-point average of at least 2.00 and who can complete all degree requirements during the current school year are eligible for senior class membership.

GRADUATE. The College offers courses leading to the Master of Arts degree with majors in Biology, Zoology and Education. For further information concerning graduate courses and degree requirements see the bulletin of the Graduate Division.

AUDITORS. A student may audit certain courses with permission of the instructor involved. No credit is allowed and an audited course may not later be taken for credit. Students wishing to audit courses must register in the usual manner and are charged a minimum of one-half tuition.

REGISTRATION
The regular academic year is divided into three periods or quarters. The summer session is regarded as the fourth quarter.
All students are required to register on designated days at the beginning of the academic year and prior to the beginning of each quarter. Registration is not official until all procedures required by the Registrar have been completed and all fees have been paid. Students are assigned faculty advisers who assist in registration and planning programs. Changes in registration, approved by the adviser, may be made during the first week of instruction. No changes involving other courses are permitted after this time without the permission of the adviser and instructor involved. A charge of $1.00 for each change of registration is made after the first week of instruction. Courses may not be added after the second week of any quarter.

WITHDRAWALS. Students withdrawing from college or individual courses must file an official drop voucher with the Registrar's office. Failure to do so will result in the recording of unsatisfactory withdrawal (Wf) on the student's permanent record. During the first five weeks of any quarter the student may withdraw from a course and receive a W. Withdrawals after this time will result in the recording of a Wf unless exception is granted by the Dean. Withdrawals must be approved by the adviser and instructor involved and are not permitted during the last two weeks of a quarter.

LATE REGISTRATION. Students who register after the designated registration periods are charged a late registration fee of $5.00. Students may not register after the second week of a quarter without permission of the Dean and the instructors involved, and a reduction in course load.

EXPLANATION OF CREDITS
A credit usually represents one class meeting a week or three hours of laboratory work a week for the duration of the quarter. Thus, a three credit class would meet three times each week. Students are expected to spend two hours a week in outside preparation or three hours a week in supervised study or laboratory work for each credit.

COURSE LOAD. The normal load is 16 credits per quarter. Sophomores, juniors, and seniors may register for 18 credits if their average for the previous quarter was 3.00 (B). Students in college residence halls may not register for less than 10 credits without permission of the Dean. Students are not permitted to add to their load by giving or receiving instruction away from the College, or registering for correspondence work, without permission of the Academic Standards Committee. Students who must earn part of their school expenses should plan a reduced load. The following is recommended:
COURSE NUMBERING

Courses numbered 1-49 inclusive are normally taken by freshmen. A senior may not register for courses so numbered and receive credit toward the 192 credits required for graduation.

Courses numbered 50-99 inclusive are normally taken by sophomores or more advanced students. In certain instances freshmen may be permitted to register for courses so numbered.

Courses numbered 100-199 inclusive are normally taken by juniors and seniors.

Courses numbered 200 or above are primarily for graduate students. Seniors with exceptional scholarship records may be admitted to these courses on the approval of the instructor.

Course numbers connected with hyphens indicate courses which ordinarily carry credit only when completed in their entirety. Uncompleted hyphenated courses do not carry credit toward completion of any course or degree unless by permission of the head of the department and the Academic Standards Committee.

Ordinarily, courses numbered 100 or above may not be taken until 84 credits have been earned and the following lower division requirements have been met:

- Religion: 12 credits
- Freshman Composition: 9
- Physical Education and Health: 6

However, a sophomore, in counsel with his adviser, may be permitted to register for courses numbered 100-149 if he has all the course prerequisites, his scholarship is acceptable, and if progress in his chosen objective would otherwise be jeopardized. Such registrations are subject to review by the Academic Standards Committee.

GRADING SYSTEM

The quality of student work is measured by a system of grades and by computed grade-point averages. Each grade is assigned a numerical value in honor points. A report of grades earned is made to both students and parents at the end of each quarter. Grades once recorded by the Registrar may not be changed unless an error has been made by the instructor. The following system of grades and honor point values is used:

- A—exceptional: 4 honor points per credit
- B—above average: 3
- C—average: 2
- D—below average: 1
- F—failure: 0

Other symbols used are as follows: S, satisfactory; W, withdrawal; Wf, unsatisfactory withdrawal; I, incomplete; and Au, audit course. The Wf is given when students unofficially withdraw from a class or withdraw after the first five weeks of any quarter. The I is given in case of incomplete work due to justifiable causes and must be made up during the following quarter; otherwise it becomes an F. This regulation also applies to students who discontinue college. Permission to receive an I must be obtained from the instructor. A student with
an I should adjust his course load so that the work may be completed without jeopardizing scholarship in other classes.

**GRADE-POINT AVERAGE.** The grade-point average (GPA) is computed by totaling the honor points for all courses and dividing by the total credits for which grades are received. Credits for which a WF is received are included in calculating the grade-point average. The symbols S, I, W, and Au are disregarded in computing the grade-point average.

**REPEAT COURSES.** Students may repeat only courses in which grades lower than a C have been received. Courses in which an F has been received must be repeated in residence unless permission to do otherwise is granted by the Academic Standards Committee. In computing the grade-point average both the original grade and the grade received in the repeated course are included.

**SCHOLASTIC PROBATION.** A student who fails to make satisfactory progress toward graduation may be placed on scholastic probation. A quarter or cumulative grade-point average below 2.00 (C) is considered unsatisfactory and may bring the student's record under review by the Academic Standards Committee.

**HONORS**

**HONOR ROLL.** Students with a grade-point average of 3.50 or above, who are registered for at least 15 credits, are listed on the official honor roll issued each quarter.

**GRADUATION HONORS.** Candidates for the baccalaureate degree with a minimum grade-point average of 3.50 may be awarded the degree with the honor *cum laude*.

**CLASS REGULATIONS**

Students are not officially registered for a course until the instructor has received a class card from the Registrar's office. The student is responsible for punctual and regular attendance at all classes for which he is registered. It will be recognized that missing instruction for any reason may jeopardize the class standing and course grade. Arrangements may be made with the instructor for course work missed for reasons beyond the student's control.

**CORRESPONDENCE WORK**

The College accepts credits from the Home Study Institute, Washington, D. C., which serves as the extension division of the Association of Seventh-day Adventist Colleges and Secondary Schools, or other recognized correspondence schools. Students may not receive credit for correspondence work taken during the academic year without permission from the Academic Standards Committee. Seniors must have such credits on record at the Registrar's office one month prior to graduation.

**ADULT EDUCATION**

As a service to the community, the college offers certain adult education courses. Information concerning these courses may be obtained from the Dean of the College.

**EXAMINATIONS AND WAIVERS**

Applications to receive credit by examination for work in which credentials cannot be supplied must be filed with the Academic Standards Committee during
the first quarter of residence. Examination and recording fees are charged for
credits obtained in this manner.

Requests for waivers of credit must be made during the first three quarters
in residence.

TRANSCRIPTS

One transcript of a student's record is supplied without charge. A fee of
$1.00 per transcript is charged thereafter. Credits are not accepted or recorded
after a student has ceased residence in the College.
DEGREE REQUIREMENTS
DEGREE REQUIREMENTS

The College offers courses of study leading to the following degrees:

Bachelor of Arts
Bachelor of Music
Bachelor of Science
Bachelor of Science in Engineering
Master of Arts

Candidates for degrees are expected to be fully informed concerning degree requirements and are responsible for their fulfillment. A student shall have the option of meeting degree requirements as published in the bulletin at the time of initial registration or any bulletin published while in regular attendance. Those not in regular attendance for two consecutive quarters must meet the requirements of the current bulletin upon resuming attendance.

For information concerning requirements for the Master of Arts degree see the bulletin of the Graduate Division.

GENERAL DEGREE REQUIREMENTS

All candidates for baccalaureate degrees must complete a minimum of 192 credits including 60 credits in courses numbered 100 or above, and have a cumulative grade-point average of 2.00 (C) or above.

MAJOR AND MINOR STUDY. A minimum of 45 credits in a major and 27 credits in a minor or completion of the prescribed requirements of certain curriculums is required. The degrees Bachelor of Music, Bachelor of Science in Engineering, and certain curriculums in the School of Nursing do not require a minor.

The major should be chosen no later than the end of the sophomore year. The selection of a minor and appropriate electives should be made in counsel with the major professor or faculty adviser.
A grade lower than C (2.00) in a course may not apply on a major or minor except in Engineering and in the School of Nursing. At least 21 credits in the major and 3 credits in the minor must be in courses numbered 100 or above. The maximum allowed on a major for the Bachelor of Arts degree is 60 credits unless the excess is beyond the 192 credits required for the degree.

Majors are available in the following areas:

- Biology
- Business Administration
- Chemistry
- Education
- Engineering
- Engineering Physics
- English
- Foods and Nutrition
- History
- Home Economics
- Industrial Education
- Interior Design and Decoration
- Mathematics
- Medical Technology
- Modern Language
- Music
- Nursing
- Physical Education
- Physics
- Religion
- Secretarial Science
- Spanish
- Theology
- Zoology

Minors are available in the following areas:

- Art
- Biblical Languages
- Biology
- Botany
- Business Administration
- Chemistry
- Elementary Education
- English
- German
- History
- Home Economics
- Industrial Education
- Journalism
- Mathematics
- Music
- Physical Education
- Physics
- Political Science
- Recreation
- Religion
- Secondary Education
- Secretarial Science
- Social Science
- Spanish
- Speech
- Zoology

**COMPREHENSIVE EXAMINATION.** Satisfactory completion of a comprehensive examination in the major is required before a degree may be conferred. Engineering students will submit an appropriate project or report approved by the head of the department. A student who fails this examination may not attempt another examination until one quarter has elapsed.

**RESIDENCE.** Degree candidates must be in residence three quarters during their senior year and complete a minimum of 36 credits.

**CANDIDACY FOR DEGREE.** Degree candidates must file a copy of the proposed schedule of courses for the senior year and a formal application for degree with the Registrar not later than one week after the beginning of the third quarter preceding graduation. Appropriate forms may be obtained from the Registrar's office. Students are not considered candidates for degree or eligible for senior class membership until officially so notified by the Registrar. Candidates for degrees must be members of the senior class. All correspondence work must be completed and all Incompletes must be removed one month prior to graduation. Failure to comply with this regulation may delay graduation.
BACHELOR OF ARTS DEGREE REQUIREMENTS

Candidates for the Bachelor of Arts degree must meet certain general education requirements which are to provide a basic understanding of those areas of knowledge common to the liberal arts. The pattern of courses required depends upon the secondary school background and the major chosen. The areas and the specific requirements are as follows:

HUMANITIES

<table>
<thead>
<tr>
<th>Language</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>English 1-2-3.</td>
<td>9</td>
</tr>
</tbody>
</table>

Language. The number of credits required depends upon the amount of language completed in secondary school and the major chosen. Majors in the following must complete 9-24 credits:

- Biology
- Chemistry
- English
- History
- Language
- Mathematics
- Physics
- Religion
- Theology
- Zoology

Students who have had 2 units of one language in secondary school must complete 9 credits if the same language is continued. Those who have had no language or do not continue the same language must complete 24 credits.

Majors in Music must complete the following:

Students who have had 2 units of French or German in secondary school must complete 9 credits. Those who have had no language or another language must complete 15 credits of French or German.

Majors in the following must complete 0-15 credits:

- Business Administration
- Education
- Home Economics
- Interior Design
- and Decoration
- Secretarial Science

No language is required of students who have had two units of one language in secondary school. Those who have had no language previously must complete 15 credits.

Literature, Speech. A total of 9 credits including a minimum of 3 credits in Literature is required. The remaining credits may be chosen from Speech or Literature. The Literature may be in a foreign language.

NATURAL SCIENCE AND MATHEMATICS

Completion of basic courses in Biological Science, Chemistry, Mathematics, or Physics.

SOCIAL SCIENCE

Education, Psychology. Introduction to Education and General Psychology are required. The remaining credits may be chosen from general courses in Education.

History. Completion of either History 1, 2, 3 or 51, 52, 53.

Religion. Completion of 24 credits. Transfer students will complete 2 credits for each quarter in residence. Religion 51, 52, 53 or the equivalent is required. Twelve credits are to be chosen from the following courses: 4, 5, 6; 11, 12-13 or 111, 112; 113; 121, 122, 123; 134, 135, 136; 161, 162, 163; and 184, 185, 186.
PHYSICAL EDUCATION AND HEALTH

Health. Completion of the course Health Principles or the equivalent. 3

Physical Education. Physical Education 1-2-3 and 1½ credits in Physical Education activity courses are required of all students under 30 years of age. Students with high Physical Fitness Index scores may elect activity courses instead of Physical Education 1-2-3. 3

Veterans who have completed basic training are exempted from Physical Education and Health requirements upon presentation of discharge papers.

APPLIED ARTS

Vocation. Completion of nine credits of courses in which the primary objective is the development of a manual skill, or satisfactory employment for a minimum of two hundred and seventy hours during a given academic year in one of the college's auxiliary departments or an approved establishment in the community. Those choosing the first option may elect any laboratory course in Home Economics or Industrial Education, or courses in Accounting, Commercial Art, Engineering Drawing, Library Science, Shorthand and Typewriting. A minimum of six credits must be completed in one department. Those choosing the second option are required to file a statement of their intention at the beginning of the academic year in which the employment is proposed and must present evidence of satisfactory employment before the applied arts course requirement may be waived.

BACHELOR OF SCIENCE DEGREE REQUIREMENTS

Candidates for the Bachelor of Science degree are usually required to complete a greater concentration of courses in the major or allied areas, and certain general education requirements. The general education requirements are as follows:

HUMANITIES

English 1-2-3. Credits 9

Language. The number of credits required depends upon the amount of language completed in secondary school and the major chosen. Majors in the following must complete 9-24 credits:

- Biology
- Chemistry
- Mathematics

Zoology
Physics

Students who have had 2 units of one language in secondary school must complete 9 credits if the same language is continued. Those who have had no language or do not continue the same language must complete 24 credits.

No language is required for the following majors:

- Business Administration
- Engineering Physics
- Foods and Nutrition
- Industrial Education

Medical Technology
Nursing
Physical Education

Literature, Speech. A total of 9 credits including a minimum of 3 credits in Literature is required except for students majoring in Engi-
neering Physics and those in the School of Nursing. The remaining credits may be chosen from Speech or Literature. The Literature may be in a foreign language.

NATURAL SCIENCE AND MATHEMATICS
Completion of basic courses in Biological Science, Chemistry, Mathematics, or Physics.

SOCIAL SCIENCE
Education, Psychology. Completion of 9 credits including Introduction to Education, General Psychology, and 3 credits chosen from general courses in Education. Students in the School of Nursing must complete only those courses outlined in their respective curriculums. No courses in education or psychology are required of students majoring in Engineering Physics.

History. Completion of either History 1, 2, 3 or 51, 52, 53 is required except for students in the School of Nursing.

Religion. Completion of 24 credits. Transfer students will complete 2 credits for each quarter in residence. Religion 51, 52, 53 or the equivalent is required. Twelve credits are to be chosen from the following courses: 4, 5, 6; 11, 12-13 or 111, 112; 113; 121, 122, 123; 134, 135, 136; 161, 162, 163; and 184, 185, 186. Students in the School of Nursing complete only those courses outlined in their respective curriculums.

PHYSICAL EDUCATION AND HEALTH
Health. Completion of the course Health Principles or the equivalent.

Physical Education. Physical Education 1-2-3 and 1½ credits in Physical Education activity courses are required of all students under 30 years of age. Students with high Physical Fitness Index scores may elect activity courses instead of Physical Education 1-2-3.

Veterans who have completed basic training are exempted from Physical Education and Health requirements upon presentation of discharge papers.

APPLIED ARTS
Vocation. Completion of nine credits of courses in which the primary objective is the development of a manual skill, or satisfactory employment for a minimum of two hundred and seventy hours during a given academic year in one of the college's auxiliary departments or an approved establishment in the community. Those choosing the first option may elect any laboratory course in Home Economics or Industrial Education, or courses in Accounting, Commercial Art, Engineering Drawing, Library Science, Shorthand, and Typewriting. A minimum of six credits must be completed in one department. Those choosing the second option are required to file a statement of their intention at the beginning of the academic year in which the employment is proposed and must present evidence of satisfactory employment before the applied arts course requirement may be waived.
Students in the School of Nursing are exempt from the applied arts requirement.

BACHELOR OF MUSIC—BACHELOR OF SCIENCE IN ENGINEERING

Candidates for professional degrees are not required to meet all general education requirements because of the heavy concentration of professional courses that must be completed. Students wishing to receive the Bachelor of Music or the Bachelor of Science in Engineering degree must follow the curriculum outlines as listed under Music and Engineering respectively, in the section Departments of Instruction. The Physical Education and Religion requirements are the same as for other baccalaureate degrees.

SECOND BACHELOR'S DEGREE

Two different degrees may be conferred at the same time if the candidate has met the requirements of both degrees, and has completed a total of 237 credits. However, a student wishing to receive a second degree after one degree has been conferred must complete 45 additional credits and be in residence an additional three quarters. The College does not grant a second degree of the same type to any student.

MUSIC CREDIT ALLOWED ON DEGREES

Students who are not majoring or minoring in Music may use 9 credits of applied music, including 3 credits in ensemble, in meeting degree requirements. Thereafter, one credit in music classwork must be completed for each credit in applied music, with a maximum of 3 additional credits in ensemble.
PREPROFESSIONAL COURSES OF STUDY

The College offers courses which are prerequisite for admission to professional or technical schools. Students wishing to secure admission to such schools should familiarize themselves with the admission requirements of the school of their choice. Preprofessional courses of study are offered for the professions hereinafter listed.

PRE-MEDICAL

Most medical schools require completion of 192 credits with a grade-point average of 2.5 or above, computed separately for science and nonscience courses. The following credits are normally required:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inorganic Chemistry</td>
<td>15</td>
</tr>
<tr>
<td>Organic Chemistry</td>
<td>9-12</td>
</tr>
<tr>
<td>Quantitative Analysis</td>
<td>3-6</td>
</tr>
<tr>
<td>General Biology or Zooology</td>
<td>12</td>
</tr>
<tr>
<td>Embryology</td>
<td>5</td>
</tr>
<tr>
<td>Physics</td>
<td>12</td>
</tr>
<tr>
<td>English</td>
<td>9</td>
</tr>
<tr>
<td>Foreign Language</td>
<td>9</td>
</tr>
<tr>
<td>Religion</td>
<td>18</td>
</tr>
</tbody>
</table>

PRE-DENTAL

The minimum requirement for admission to the study of dentistry is two years of college. However, most dental schools expect candidates for admission to have completed three to four years of college. A total of 90-96 credits is required, and should include the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>Inorganic Chemistry</td>
<td>15</td>
</tr>
<tr>
<td>Organic Chemistry</td>
<td>9-12</td>
</tr>
<tr>
<td>General Biology or Zoology</td>
<td>12</td>
</tr>
<tr>
<td>Physics</td>
<td>12</td>
</tr>
<tr>
<td>English</td>
<td>9</td>
</tr>
<tr>
<td>Embryology</td>
<td>5</td>
</tr>
</tbody>
</table>

Some schools require 9 credits in a foreign language and 3-6 credits of Quantitative Analysis.
PRE-LAW

Students wishing to study law may enroll at the College for three years and then enter upon a combined-cooperative degree program at the Willamette University College of Law. Qualifying students may be awarded the Bachelor of Arts degree by Walla Walla College upon satisfactory completion of the first year of law school. Upon completion of the law school curriculum, the student may receive the Bachelor of Laws from Willamette University.

While at college, the student must complete a major in Business Administration, satisfy degree and general education requirements, and complete at least 6 credits in Speech and 3 credits in Political Science. A minimum of 147 credits with a grade-point average of 2.5 or above is required.

DENTAL HYGIENE

Women planning for careers in dental hygiene must complete ninety credits with a cumulative grade-point average of 2.00 or above before seeking admission to the dental hygiene curriculum of the School of Dentistry, College of Medical Evangelists. The following credits are required:

- Anatomy and Physiology 10
- Microbiology 5
- General Biology 8
- General Chemistry 9
- Organic Chemistry 6
- Freshman Composition 9
- Speech 6
- Psychology 10
- American History 9
- Social Science 5
- Electives in Accounting, Nutrition, Physical Education, Religion and Typewriting

MEDICAL TECHNOLOGY

Students wishing to become medical technologists or laboratory technicians may complete the first three years at the College and transfer to the Portland Sanitarium and Hospital for the fourth year. Upon completion of the fourth year, the student may receive a Bachelor of Science degree. The following courses must be completed:

<table>
<thead>
<tr>
<th></th>
<th>FIRST YEAR</th>
<th>SECOND YEAR</th>
</tr>
</thead>
<tbody>
<tr>
<td>Chemistry</td>
<td>21-22-23</td>
<td>Mathematics 21</td>
</tr>
<tr>
<td>Biological Science</td>
<td>1, 2, 3</td>
<td>Chemistry 83</td>
</tr>
<tr>
<td>English</td>
<td>1-2-3</td>
<td>Biological Science 7, 52-53</td>
</tr>
<tr>
<td>History</td>
<td>51, 52, 53</td>
<td>Religion</td>
</tr>
<tr>
<td>Religion</td>
<td>6</td>
<td>Education 51, 52, or 53</td>

<td>Electives</td>
<td>14-17</td>
<td></td>
</tr>
</tbody>
</table>
PHYSICAL THERAPY

Students majoring in Medical Technology must meet all degree and general education requirements except 9 credits in Applied Arts. During the third year the students must earn at least 30 credits upper division.

The minimum requirements are completion of 93 credits including Biological Science 18, English 9, General Chemistry 9, Physical Education 3, Psychology 9, Religion 12, Speech 6, United States History 9.

X-RAY TECHNICIAN

Forty-five credits are needed for admission to most schools of X-ray Technology. College courses should be chosen to remove high school deficiencies in mathematics and science, if such exist. Courses such as physiology, mathematics, chemistry, physics, and typing should be included wherever possible.

PRE-OPTOMETRY

One year of general college work may be applied to the curriculum of most optometry schools. The first year is generally the same as for pre-medical students.

PRE-VETERINARY

One year of college work may be applied to the curriculum of most schools of veterinary medicine.

PHARMACY

At least two years of general college work are required. The following should be included:

<table>
<thead>
<tr>
<th>Course</th>
<th>Credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>9</td>
</tr>
<tr>
<td>Public Speaking</td>
<td>3</td>
</tr>

</tbody>
</table>

PRE-NURSING

At least one year of college is required. Anatomy, Physiology, and Health, English, General Chemistry, History of Nursing, Microbiology, Physical Education, and Religion should be included.

NOTE: Most students choose the Bachelor of Science with a curriculum in Nursing listed in this bulletin under the section, School of Nursing. Write to Fredrick R. Hanson, Dean of the School of Nursing, College Place, Washington, for a bulletin of the School of Nursing and complete information.

PRACTICAL NURSE TRAINING. A twelve-month’s vocational course is given at the Clinical Division of the School of Nursing in Portland. Upon completion of this course, a certificate is awarded. Those students who wish to complete a degree at the College may receive 17 credits for this work.
DEPARTMENTS OF INSTRUCTION

This section contains a list of all courses offered in the College. The departments are arranged in alphabetical order. The curricula and courses offered in the School of Theology and the School of Nursing begin on pages 121 and 125 respectively.

Courses numbered 1-49 are normally taken by freshmen; those from 50-99 are normally taken by sophomores; those from 100-199 by juniors and seniors; and those 200 and above by graduate students. Seniors with exceptional scholarship may be admitted to graduate courses on approval of the instructor.

The descriptions of courses in each department include: (1) the number of the course as used in the College records; (2) the title of the course; (3) a brief description of course content; (4) the number of credits given; (5) the quarter in which it is given; (6) the days and the hour the class meets.

The credit indicated in connection with each course is the “quarter credit,” and one credit represents one recitation period per week for one quarter. The number of credits listed is for each quarter. Thus, “Three credits; autumn, winter, spring; M.W.F., 11:10,” means three credits each quarter, or a total of nine credits for the year, the class meeting Monday, Wednesday, Friday at the 11:10 a.m. period.

Two or three numbers connected with hyphens indicate courses which must be completed in their entirety. Only upon permission of the instructor and the Academic Standards Committee may credit be obtained for a single quarter of study in a hyphenated course.

The College reserves the right to withdraw temporarily any course which does not have an adequate enrollment. A course may not be offered for fewer than six students except in the case of seniors or graduate students.

Courses preceded by * are not given in 1959-1960.
The aim of the Art department is to cultivate an appreciation of the various forms of art and to help students develop their creative abilities.

MINOR REQUIREMENTS:

A minimum of 27 credits including courses 51, 52, 53; 61, 62, 63; 91, 92, 93; and 101, 102, 103. Arts and Crafts, P. E. 124, 125, 126; Industrial Arts Design, I. E. 114; Photography I, I. E. 33, Photography II, I. E. 132; and Textile Painting and Related Arts, H. Econ. 89 are recommended and may be included in the minor.

21, 22, 23. LETTERING. Learning to make the alphabet with pen or brush. Certain basic principles of proportion and design serve as a foundation upon which great variety may be built. One credit; autumn, winter, spring; T.Th., 7:30 and arranged.

41, 42, 43. DRAWING. A representational type of drawing fundamental to all the visual arts, experience in the pictorial forms of still life, landscape, and portraiture is a valuable basis for any further art study as well as a satisfying end in itself. One credit; autumn, winter, spring; M.W.F., 7:30.

51, 52, 53. PAINTING. To develop and promote the aesthetic enjoyment and relaxation which are found in painting, whether the media be pastel, water color, or oil. One credit; autumn, winter, spring; Th., 2:00-5:00.

61, 62, 63. COMMERCIAL ART. Our modern need to "Tell and Sell" requires the study of illustration and production planning for such subjects as advertisements, book pages, posters and displays. Three credits; autumn, winter, spring; M.W., 10:15. Laboratory arranged.

71, 72, 73. DESIGN. An intensified study of design elements and their application to completed art forms. Three credits; autumn, winter, spring; M.W.F., 11:10.

81, 82, 83. SCULPTURE. The study of form in three dimensions worked out in various materials such as wood, plaster, and paper. One credit; autumn, winter, spring; T.Th., 10:15 and arranged.

91, 92, 93. HISTORY AND APPRECIATION OF ART. Study of the great periods in the history of art with examples of the ideals and methods of the masters and their practical application to the needs of today. Two credits; autumn, winter, spring; T.Th., 8:25.

101, 102, 103. SPECIAL PROBLEMS IN ART. Individual student projects under the direction of the department. One credit; autumn, winter, spring; arranged.
BIOLOGICAL SCIENCES

MR. COFFIN, MR. ASHLEY, MISS EMERY, MR. RIGBY

The department offers majors in biology and zoology and minors in biology, botany, and zoology. Courses are offered on the main campus, at the Biological Station, and in the Field School of Biology. Graduate work leading to the Master of Arts degree is also offered. For further information see the Bulletin of the Graduate Division.

Exceptional opportunities for study in the Biological Sciences are possible during the summer at the Biological Station at Rosario Beach adjoining Deception Pass State Park, Anacortes, Washington. Facilities at the station include two laboratories, cottages, dining hall and kitchen, motor boats, seines, dredges, and salt and fresh water aquaria. For further information see the bulletin of the Biological Station.

The Field School of Biology travels to various parts of North America and offers courses in botany and zoology. Sessions are scheduled during the summer or winter quarters and usually occur every other year.

Majors in zoology must complete a minimum of 23 upper division credits and must attend at least one summer term at the Biological Station. Chemistry 21-22-23 is required.

MAJOR REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE:
Candidates for this degree must complete a total of 90 credits in science or mathematics. Two of the elementary courses in Chemistry, Mathematics, or Physics are required. The major requirements for biology or Zoology are the same as those listed for the Bachelor of Arts degree.

MINOR REQUIREMENTS IN BIOLOGY:
A minimum of 27 credits including 7 upper division credits. Course 1, 2, 3 is required.

MINOR REQUIREMENTS IN BOTANY:
A minimum of 27 credits including 8 upper division credits. Course 1, 2, 3 is required.

MINOR REQUIREMENTS IN ZOOLOGY:
A minimum of 27 credits including 3 upper division credits. Course 1, 2, 3 is required.

1, 2, 3. GENERAL BIOLOGY. A study of the basic principles of biology. Topics such as anatomy, physiology, cytology, genetics, taxonomy, ecology, and embryology are considered with reference to both plants and animals. Four credits; autumn, winter, spring; Sec. A, M.W.F., 7:30; Sec. B, M.W.F., 8:25. Laboratory, Sec. A, S., 8:00-11:00; Sec. B, M., 2:00-5:00; Sec. C, T., 2:00-5:00; Sec. D, W., 2:00-5:00; Sec. E, Th., 2:00-5:00.

7. MICROBIOLOGY. The nature of bacteria and disease-producing organisms with their habits and methods of reproduction. The relation of these organisms to disease in the human body. Five credits; autumn; M.-Th., 10:15. Laboratory, Sec. A, S., 8:00-11:00; Sec. B, M., 2:00-5:00; Sec. C, T., 2:00-5:00; Sec. D, Th., 2:00-5:00.

15. ELEMENTARY BOTANY. A general survey of the plant kingdom with emphasis on morphology, life histories, and development. Four credits; winter; M.W.F., 7:30. Laboratory, Sec. A, S., 2:00-5:00; Sec. B, W., 2:00-5:00.

52-53. ANATOMY, PHYSIOLOGY, AND HEALTH. This course is designed for those who will complete their nursing curriculum at Portland. A general survey of human anatomy and physiology. Health Principles will be integrated in this course. Five credits; winter, spring; M.-Th., 10:15. Laboratory, Sec. A, S., 8:00-11:00; Sec. B, S., 2:00-5:00; Sec. C, T., 2:00-5:00; Sec. D, W., 2:00-5:00.

91-92. PHYSIOLOGY. A course designed to acquaint the student with the basic principles of physiology. Anatomy complementary or necessary to the study of functions is included. Four credits; autumn, winter; M.W.F., 11:10. Laboratory, Sec. A, M., 2:00-5:00; Sec. B, W., 2:00-5:00.

58
93. VERTEBRATE EMBRYOLOGY. A detailed study of the embryology of the frog, chick, and pig, with emphasis on their relation to human embryology. Five credits; spring; M.W.F., 7:30. Laboratory, Sec. A, S., 9:00-12:00; 2:00-5:00; Sec. B, T.Th., 2:00-5:00.

Course 1, 2, 3, is a prerequisite for all upper division courses.

102. VERTEBRATE ANATOMY. A study of the comparative anatomy of the various classes of vertebrates. Detailed dissections of the shark and of the cat are made in the laboratory. Five credits; winter; M.W.F., 8:25. Laboratory, M.W., 2:00-5:00.

104. MORPHOLOGY OF PLANTS. Detailed studies of the type forms of the Thallophytes, Bryophytes, and Pteridophytes. Four credits; autumn; M.W.F., 10:15. Laboratory, Th., 2:00-5:00.

151. NATURAL HISTORY OF VERTEBRATES. A study of amphibians, reptiles, and mammals with emphasis on taxonomy and ecology. Four credits; autumn; T.Th., 11:10. Laboratory, M., 2:00-5:00 and arranged.

153. ORNITHOLOGY. A systematic study of native birds of North America, with emphasis on identification, migration, geographical distribution, habits and life histories. Four credits; spring; T.Th., 10:15. Laboratory, S., 8:00-5:00.

156. INTRODUCTORY ENTOMOLOGY. A study of insect morphology, ecology, and classification. Four credits; spring; M.W., 11:10. Laboratory, W., 2:00-5:00 and arranged.

157. PHILOSOPHY OF SCIENCE. A study of origins of living things, of special creation as opposed to evolution, the Flood, glaciation, problems of species, and distribution of plants and animals. Three credits; autumn; M.W.F., 11:10.

158. GENETICS. A study of the principles of inheritance in plants and animals, especially man. Three credits; winter; M.W.F., 10:15.

159. PALEONTOLOGY. A study of plant and animal fossils, with a survey of the principles of geology. Three credits; spring; T.Th., 11:10. Laboratory, T., 2:00-5:00.

161-162-163. SEMINAR. A study of modern trends in biology; of current biological literature; presentation of scientific papers; group discussion of biological problems. One-half credit; autumn, winter, spring; M., 1:00.

166. SYSTEMATIC BOTANY. Principles of classification of plants with emphasis on the spermatophytes. Four credits; spring; T.Th., 7:30. Laboratory, S., 8:00-5:00.

169. FRESH WATER BIOLOGY. A systematic study of the animals and plants found in fresh water lakes and streams. Field work includes trips to a number of lakes and streams. Four credits; summer (WWC Biological Station).

171. VERTEBRATE HISTOLOGY. The microscopic anatomy of vertebrate cells, tissues and organs including reference to their functions. Four credits; autumn; M.W., 1:00. Laboratory, M.W., 2:00-5:00.
172. ANIMAL MICROTECHNIQUE. A course designed to cover the important methods of making microscope slides of animal tissues. Three credits; winter; W., 1:00. Laboratory, W., 2:00-5:00 and arranged.

175. PLANT MICROTECHNIQUE. A course designed to cover the important methods of making microscope slides of plant tissues. Three credits; winter; W., 1:00. Laboratory, W., 2:00-5:00 and arranged.

176. GENERAL ECOLOGY. A course designed to cover the basic principles of ecology with reference to both plants and animals. Four credits; summer (WWC Biological Station).

177-178. PARASITOLOGY. A systematic study of the morphology, life cycle, and the medical aspects of the protozoan, arthropod, and worm parasites of the vertebrates with more emphasis on human parasitology. Three credits; autumn, winter; T.Th., 8:25. Laboratory, T., 2:00-5:00.

179. BACTERIOLOGY. A study of the various aspects of bacteria and the techniques employed in their study. Five credits; spring; M.W.F., 8:25. Laboratory, M.Th., 2:00-5:00.

181. MARINE INVERTEBRATES. A study of the invertebrate animals of Puget Sound with emphasis on systematics and natural history. Four credits; summer (WWC Biological Station).

182. ICHTHYOLOGY. A systematic study of the fishes found in Puget Sound, with a survey of the fishes of other waters. Four credits; summer (WWC Biological Station).

183. MARINE BOTANY. A systematic study of plants found in Puget Sound, with a survey of marine plants from other areas. Four credits; summer (WWC Biological Station).

187. OCEANOGRAPHY. A study of the geology, geography, and biology of the ocean. Four credits; summer (WWC Biological Station).

191. HISTORY OF BIOLOGY. A survey of the history of biological science from the Greek period to the present. Two credits; autumn; T.Th., 10:15.

192. FISHERIES BIOLOGY. A study of marine and fresh water fisheries with emphasis upon fishery surveys and research methods, observation of hatchery and commercial fishing methods, and study of problems involved. Prerequisite: 182. Four credits; summer (WWC Biological Station).

193. CELLULAR BIOLOGY. Current knowledge and research in the areas of cell physiology, biochemical genetics, bacteriological genetics, and radiation biology will be considered. Three credits; spring; M.W.F., 11:10.

196. METHODS IN RESEARCH. A study of biological literature, with emphasis on the research paper; methods of gathering data; methods of compiling data; methods of writing the finished paper; presentation of an acceptable research paper. Two credits; spring; T.Th., 1:00.

199. **SPECIAL PROBLEMS IN BIOLOGICAL SCIENCE.** Individual work to be carried on under the supervision of the instructor. Time and credit arranged.

201. **RESEARCH IN ZOOLOGY.** Individual work in a topic of original research carried out under the direction of one of the instructors. A report must be prepared for publication before credit will be allowed. Time and credit arranged.

202. **RESEARCH IN BOTANY.** Individual work in a topic of original research carried out under the direction of one of the instructors. A report must be prepared for publication before credit will be allowed. Time and credit arranged.

204-205-206. **GRADUATE SEMINAR.** Presentation of topics of current interest in biological science, followed by discussion. Each class member prepares a lecture as if for presentation before a scientific society meeting. One credit; autumn, winter, spring; T., 9:20.

207. **GENETICS AND EVOLUTION.** Advanced study and criticism of evolution; preparation of material on scientific philosophy for publication. Prerequisite: 157, 158. Three credits; autumn; M.W.F., 10:15.

215. **ADVANCED MARINE INVERTEBRATES.** Detailed study of the invertebrate phyla with emphasis on the lesser groups not included in course 181, including experimental methods and embryology of marine animals. Prerequisite: 181. Time and credit arranged; summer (WWC Biological Station).

229. **PARASITES OF MARINE ANIMALS.** Original work with parasites of the main groups of marine animals, including experimental methods and embryology. Prerequisite: 177-178, 181, 182. Time and credit arranged; summer (WWC Biological Station).

230. **ADVANCED PARASITOLOGY.** Original work with parasites of all forms of animal life, including determination of species, experimental methods and life histories. Prerequisite: 153, 156, 177-178, 182. Time and credit arranged.

235. **THESIS.** Preparation of the master's dissertation after successfully carrying out original study with a suitable topic to be selected after consultation with the major professor. Five to nine credits.
BUSINESS ADMINISTRATION

MR. MEHLING, MR. SLOOP, MR. WHITE

The objective of the department is to offer students opportunity for the general education and specialized training necessary for success in society at large as well as in the business world. Courses offered in the department are designed to prepare for denominational service, civil service, business and industry.

MAJOR REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:

Principles of Accounting 14-15, 16 9
Principles of Economics 91-92-93 9
Business Law 61-62-63 6
Intermediate Accounting 71-72-73 9
Upper division electives 21

54

MAJOR REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE:

Principles of Accounting 14-15, 16 9
Principles of Economics 91-92-93 9
Business Law 61-62-63 6
Intermediate Accounting 71-72-73 9
Cost Accounting 141-142-143 6
Upper division electives 32

71

Students majoring in Business Administration must demonstrate proficiency in typing. Art courses 21 and 22 are highly recommended.

MINOR REQUIREMENTS:
A minimum of 27 credits including courses 14-15, 16, 91-92-93, and 9 upper division credits.

14-15, 16. PRINCIPLES OF ACCOUNTING. Introduction to: accounting; books of original entry; ledgers; statements of condition and of operations; controlling accounts; sole proprietorships, partnerships, and corporations. No. 14 and 15 prerequisite to 16. Three credits; autumn, winter, spring; Sec. A, M.W.F., 7:30; Sec. B, M.W.F., 8:25.

51-52-53. SECRETARIAL ACCOUNTING. An accounting course designed to acquaint the secretarial student with basic accounting concepts. (Does not apply on Business Administration major or minor.) Two credits; autumn, winter, spring; T.Th., 8:25.

61-62-63. BUSINESS LAW. Fundamentals of law which affect business transactions. Emphasis on contracts, agencies, negotiable instruments, landlord and tenant relationship, personal property, and corporations. Two credits; autumn, winter, spring; T.Th., 8:25.
71-72-73. INTERMEDIATE ACCOUNTING THEORY. Autumn quarter is devoted to a study of the construction, analysis and interpretation of the financial statement and reports prepared from accounting records. Winter and spring quarters relate to a study of basic accounting procedures employed in balance sheet evaluation and profit determination. Further study of funds, inventories, reserves, contingent liabilities and partnership accounting. Prerequisite: 14-15, 16. Three credits; autumn, winter, spring; M.W.F., 8:25.

84-85-86. INTRODUCTION TO ECONOMICS. An introduction to the operation of the American economy with emphasis on analyzing the factors of production, taxation, problems of wealth and income distribution, unemployment and national welfare programs. Three credits; autumn, winter, spring; M.W.F., 11:10. (Especially for liberal arts majors. Business majors should elect course 91-92-93).

91-92-93. PRINCIPLES OF ECONOMICS. General principles of economics and their application to our present industrial organization and social life. A study of the factors of production; organization of marketing and transportation; principles of money and banking; distribution of wealth; taxation; and problems of labor. Three credits; autumn, winter, spring; M.W.F., 11:10.

97. MACHINE ACCOUNTING. Training in the operation of the National Bookkeeping machines as applied to various accounting systems. Prerequisite: 14-15, 16 or 51-52-53. One credit; spring; arranged.

121, 122, 123. MARKETING AND ADVERTISING. A study of the principles underlying marketing and market organizations in connection with the psychology and science of advertising. Two credits; autumn, winter, spring; T.Th., 11:10.

131. PRINCIPLES OF INSURANCE. A study of insurance contracts, underwriting organizations, and insurance representation and procedures. Three credits; spring; M.W.F., 10:15.

*136. REAL ESTATE. A survey course in the basic principles and problems of real estate management and appraisal. Three credits; spring; M.W.F., 7:30.

141-142-143. COST ACCOUNTING. Theory and practice in keeping cost records for manufacturing concerns. Job order, process, and standard cost systems. Prerequisite: 14-15, 16. Two credits; autumn, winter, spring; T.Th., 7:30.

*145. ACCOUNTING SYSTEMS. A study of diversified accounting systems, system construction and installation procedures. Prerequisite: 71-72-73. Three credits; winter; M.W.F., 10:15.

161. BUSINESS MANAGEMENT. A study of the internal organization of the business enterprise; problems of planning, coordination and production management. Three credits; autumn; M.W.F., 7:30.

163. BUSINESS FINANCE. A study of the fundamental principles of financial policy in the organization and management of corporate enterprises. Three credits; spring; M.W.F., 7:30.

165. PERSONNEL MANAGEMENT. A survey of the human relations problems found in industry today. Three credits; winter; M.W.F., 7:30.

172. TAX PROCEDURE. A study of tax regulations and accounting records necessary to facilitate proper tax accounting and the determination of tax liability for individuals, partnerships, and corporations. Three credits; winter; M.W.F., 10:15.

*174. FUND ACCOUNTING. A study of the application of accounting principles to trust funds, pledged funds, sinking funds, special tax funds and general funds accumulated for special purposes such as plant extension, debt retirement and operation of non-profit enterprises. Three credits; autumn; M.W.F., 10:15.

*176. AUDITING PROCEDURE. A survey of practical auditing procedure as applied in the verification of accounting records, and the preparation and presentation of formal reports. Prerequisite: 71-72-73 or consent. Three credits; spring; M.W.F., 10:15.

177, 178, 179. ACCOUNTING PROBLEMS. Studies in equities and control of assets in C.P.A. type problems. Prerequisite: 24 credits of Accounting. Three credits; autumn; M.W.F., 10:15; winter, spring, arranged.

*181-182-183. MONEY AND BANKING. A study of the functional activities of the institutions which comprise our financial system; emphasizing the nature and functions of money, credit, and banking. Two credits; autumn, winter, spring; T.Th., 10:15.

190. SPECIAL PROBLEMS IN BUSINESS ADMINISTRATION. Independent study of selected topics in some field of business or economics for departmental majors. One to five credits.

*196. SEMINAR. Individual study of problems in the field of business or economics. Open only to majors in business administration. Two credits; offered on sufficient demand.

Minimum: 60

Laboratory work must be concurrent with theory. A double minor in mathematics and physics is recommended. Regardless of the minor the following are required:
Physics 51, 52, 53.

MINOR REQUIREMENTS:
A minimum of 27 credits including 3 credits of upper division courses. Courses 21-22-23 and 111-112 or 91-92, 93 are required.

1-2-3. INTRODUCTORY CHEMISTRY. An introductory course in chemistry designed to meet the requirements for nursing. Does not apply on a major or a minor. Two credits; autumn, winter, spring; T.Th., 7:30.

1A-2A-3A. INTRODUCTORY CHEMISTRY LABORATORY. Typical laboratory preparations and experiments. One credit; autumn, winter, spring; Sec. A, S., 2:00-5:00; Sec. B, M., 2:00-5:00.

4-5-6. GENERAL CHEMISTRY. An introductory course in chemistry designed to meet the basic science requirement for graduation. Does not apply on a major or minor. Three credits; autumn, winter, spring; M.W.F., 7:30.

4A-5A-6A. GENERAL CHEMISTRY LABORATORY. Typical laboratory preparations and experiments. One credit; autumn, winter, spring; T., 2:00-5:00.

21-22-23. INORGANIC CHEMISTRY. A systematic study of typical metals and non-metals together with a survey of all the elements. Emphasis is placed on fundamental principles and theories. Mathematics 21 prerequisite or taken concurrently. Three credits; autumn, winter, spring; Sec. A, M.W.F., 10:15; Sec. B, M.W.F., 11:10.

21A-22A-23A. INORGANIC CHEMISTRY QUIZ SECTIONS AND LABORATORY. Two credits; autumn, winter, spring; Sec. A, M., 1:00-6:00; Sec. B, T., 1:00-6:00; Sec. C, W., 1:00-6:00; Sec. D, Th., 1:00-6:00; Sec. E, S., 1:00-6:00.

74-75-76. ELEMENTARY QUANTITATIVE ANALYSIS. Fundamental principles and laboratory practices in both gravimetric and volumetric analysis. Prerequisite 21-22-23 and Mathematics 21. Three credits; autumn, winter, spring; T.Th., 10:15. Laboratory, W., 1:00-5:00.

83. QUANTITATIVE ANALYSIS. Introduction to the principles of quantitative analysis illustrated with representative gravimetric and volumetric determinations. Does not apply on a major or minor. Prerequisite: 21-22-23 and Mathematics 21. Three credits; spring, T.Th., 8:25. Laboratory, Th., 1:00-6:00.
*91-92, 93. AN INTRODUCTION TO ORGANIC CHEMISTRY. A short course designed to furnish a basis for the understanding of structural chemistry, systems, and nomenclature, and organic chemical reactions. Open to students in home economics, dietetics, pre-dental, and certain other preprofessional courses. Does not apply on major or minor. Prerequisite: 4-5-6 or 21-22-23. Two credits; autumn, winter, spring; T.Th., 8:25.

*91A-92A, 93A. INTRODUCTION TO ORGANIC CHEMISTRY LABORATORY. A laboratory course to accompany 91-92, 93. One credit; autumn, winter, spring; Th., 2:00-5:00.

111-112, 113. ELEMENTARY ORGANIC CHEMISTRY. A study of the preparations, reactions, and constitution of the aliphatic and aromatic compounds of carbon. Prerequisite: 21-22-23. Three credits; autumn, winter, spring; M.W.F., 11:10.

111A-112A, 113A. EXPERIMENTAL ORGANIC CHEMISTRY. A laboratory course to accompany 111-112, 113. One credit; autumn, winter, spring; Sec. A, T., 2:00-5:00; Sec. B, W., 2:00-5:00.

*121. ADVANCED INORGANIC CHEMISTRY. A more detailed study of inorganic substances with emphasis on the metals, their preparation and uses. Prerequisite: 21-22-23. Two credits; autumn; arranged.

131. ADVANCED GRAVIMETRIC ANALYSIS. A study of typical gravimetric methods of analysis and their equilibria. Complex and natural occurring materials are analyzed. Prerequisite: 74-75-76. Three credits; autumn; F., 8:25. Laboratory, T.Th., 1:00-5:00.

132. ADVANCED VOLUMETRIC ANALYSIS. A study of typical volumetric methods of analysis and their equilibria. Prerequisite: 74-75-76. Three credits; winter; F., 8:25. Laboratory, T.Th., 1:00-5:00.

133. INSTRUMENTAL ANALYSIS. Study of various instruments used in chemical analysis. Prerequisite: 74-75-76. Three credits; spring; F., 8:25. Laboratory, arranged.

151-152, 153. PHYSICAL CHEMISTRY. An introductory course in theoretical chemistry and electrochemistry. Prerequisite: 74-75-76, Physics 41, 42, 43 or 51, 52, 53, and Mathematics 21, 22, 23. Three credits; autumn, winter, spring; M.W.F., 8:25.

151A-152A, 153A. PRACTICAL PHYSICAL CHEMISTRY. This course provides a series of experiments covering the fundamental topics in theoretical chemistry. Experiments involve the various physical properties of matter and their constants. The latter part of the course deals with electrochemistry. One credit; autumn, winter, spring; M. 1:00-5:00.

156. BIOCHEMISTRY. A study of the chemistry of foods, digestion and body metabolism. Prerequisite: 111-112 or 91-92, 93. Three credits; spring; M.W.F., 10:15.

156A. BIOCHEMISTRY LABORATORY. Experimental work on foods, digestive processes and their products. One credit; spring; M. 1:00-5:00.

164. **ORGANIC SYNTHESIS.** The preparation of various aliphatic and aromatic compounds involving representative procedures employed in synthetic work. Three credits; autumn; conference to be arranged; M.W. or T.Th., 1:00-5:00.

165. **INORGANIC SYNTHESIS.** The course includes the preparation of a variety of inorganic compounds to illustrate standard methods of procedure employed in inorganic preparations. One recitation and six to eight hours of laboratory per week. Three credits; winter; M.W. or T.Th., 1:00-5:00.

166. **ORGANIC QUALITATIVE ANALYSIS.** A systematic identification of the various types of organic compounds, including unknowns. One hour conference and six to eight hours laboratory. Three credits; spring; M.W. or T.Th., 1:00-5:00.

*168. **ADVANCED ORGANIC CHEMISTRY.** A study of the current theories in the field of aliphatic and aromatic chemistry. Prerequisite: 111-112, 113. Two credits; winter; arranged.

181, 182, 183. **SPECIAL PROBLEMS.** Four to ten hours laboratory work on assigned investigations. One to three credits; autumn, winter, spring; arranged.

*193. **HISTORY OF CHEMISTRY.** Two credits; spring; T.Th., 11:10.

---

**EDUCATION**

MR. BULL, MR. FOSTER, MISS SEARLE, MR. SILVER, MR. WALTERS

The chief objective of the department is to provide a teacher education program that will enable graduates to render acceptable service in private or public schools. Courses leading to the Bachelor of Arts and the Master of Arts degrees with majors in education are offered. For specific information concerning requirements for the master's degree see the bulletin of the Graduate Division. Minors in elementary and secondary education are also offered.

Students planning on teaching in the state of Washington should meet both denominational and state certification requirements. Those wishing to teach in other states are urged to inform themselves concerning specific certification requirements.

The teacher education program hereinafter outlined is designed to assure the broad and professional education needed for creative teaching. Courses and supervised experiences are planned to give an understanding of both elementary and secondary education as well as preparation to teach at one level. The program is approved by the Washington State Board of Education and qualifies the graduate for the Provisional General Certificate and, after one successful year of teaching and a fifth year of teacher education, the Standard General Certificate. The program, inaugurated in 1951, has three phases.
PHASE 1

A four-year college program preparing for elementary and secondary teaching with a minimum of 192 credits.

GENERAL REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:

1. General Education—60 credits
   English 18
   (Freshman Composition 9, Speech 6, Literature 3)
   Science 12
   Social Studies 15
   (U. S. History 9, Washington History and Government 3, World Geography 3)
   Health and Physical Education 7
   Music 4-6
   General Psychology 3
   Art 2-4
   All teacher education students must successfully complete an examination in Basic Mathematics or register for a College Mathematics course.

2. Broad Areas of Concentration—60 credits
   A. Five areas of concentration are provided from which the prospective teacher will select his field of preference:
      (1) Health and Physical Education.
      (2) Language Arts: Speech, Writing, Literature, Foreign Languages.
      (3) Social Studies: History, Sociology, Political Science, Economics, and Geography.
      (4) Sciences and Mathematics: Biology and Physical Sciences, and Mathematics.
   B. Program Options: One or two broad areas are recommended. Selection of the area or areas and courses to be included is to be made in counsel with the head of the department of education, who recommends the student for certification.

3. Professional Education—41 credits
   Introduction to Education 3
   Curriculum Methods and electives 12
   School Administration 3
   Human Growth and Development 4
   Educational Evaluation and Guidance 3
   Washington State Manual 1
   Professional Laboratory Experiences 15
   41
4. Electives—The number of electives will vary because of the need
to meet general college graduation requirements.

PHASE II
INITIAL TEACHING EXPERIENCE
The beginning teacher is issued the Provisional General Certificate which is
valid for one year and may be renewed annually four times. After the first year
of teaching, a program of study for the fifth year of teacher education must be
outlined. At least 12 credits of this program must be completed after the begin-
nning of the first year of teaching and before the beginning of the third year. A
progress report is required for the third and fourth renewals.

PHASE III
FIFTH YEAR OF TEACHER EDUCATION
A fifth year of study with a minimum of 45 credits, planned to meet personal
needs as evidenced by the first year of teaching, completes the requirements for
the Standard General Certificate. This may be taken during a regular college year
or during summer sessions. At least one half of the 45 credits must be in courses
numbered 100 or above, and not more than 12 credits of extension or correspond-
ence study may be approved as a part of the fifth-year program. By careful
planning the requirements for a master’s degree can be completed during this
phase. The specific requirements for the master’s degree are outlined in the
bulletin of the Graduate Division.

The department also offers minors in elementary or secondary education. These minors are for those who plan to teach in the educational system of the
Seventh-day Adventist church outside the state of Washington and meet denomina-
tional certification requirements only. Students should also acquaint them-
selves with the teacher certification requirements in the states in which they
expect to teach.

MINOR REQUIREMENTS—ELEMENTARY EDUCATION
A total of 39 credits including 30 in elementary education and 9 upper
division credits. The following must be included:

Introduction to Education 3
Psychology and/or Human Growth and Development 3-4
Elementary School Administration 3
Teaching of Reading and other Elementary Methods 11-12
Directed Teaching and Observation—Elementary 8-9

MINOR REQUIREMENTS—SECONDARY EDUCATION
A total of 30 credits in general and secondary education including the
following:

Introduction to Education 3
Psychology and/or Human Growth and Development 3-4
Curriculum and Secondary Methods 5
Directed Teaching and Observation—Secondary 6-9

For complete information concerning denominational certification require-
ments consult with members of the education department.
GENERAL COURSES

51, 52, or 53. INTRODUCTION TO EDUCATION. A study of the underlying principles of Christian education, and an orientation course designed to acquaint the student with the objectives, principles, philosophy, status, organization, and achievement of education in the United States. Three credits maximum; autumn, Sec. A, M.W.F., 10:15; Sec. B, M.W.F., 11:10; winter, M.W.F., 10:15; spring, Sec. A, M.W.F., 8:25; Sec. B, M.W.F., 11:10.

55 or 56. INTRODUCTION TO TEACHING. Initial laboratory experiences on the elementary level for all prospective teachers. Three credits; winter, M.W.F., 11:10; spring, M.W.F., 1:00.

57, 58, or 59. GENERAL PSYCHOLOGY. A survey course emphasizing the scientific bases of psychological investigation. It serves as a basis for further courses in education and an introduction to the field of psychology. Three credits; autumn; Sec. A, M.W.F., 8:25; Sec. B, M.W.F., 10:15; Sec. C, M.W.F., 11:10; winter, Sec. A, M.W.F., 10:15; Sec. B, M.W.F., 11:10; spring, M.W.F., 10:15.

61, 62, or 63. EDUCATIONAL PSYCHOLOGY. This course emphasizes the application of psychological principles to the art of teaching. The responsibility of the school in developing a dynamic, social, and ethical personality is stressed. The practices of the modern school are studied in the light of empirical findings, experimental research, and case studies. Three credits; autumn, M.W.F., 10:15; winter, M.W.F., 11:10; spring, M.W.F., 10:15.

112. HUMAN GROWTH AND DEVELOPMENT. Principles of growth as related to all phases of development. Attitudes, ideals, and concepts of values are stressed when these are related to mental growth, emotional maturity, and personality development. Four credits; winter; M.-Th., 7:30.

118. EDUCATIONAL EVALUATION. Designed to acquaint the student with the latest and best instruments for appraising the results of growth in the various aspects of abilities, achievement and personality. Opportunity will be provided for the practical application and interpretation of the results obtained by the use of various tests and scales. Practice is given in the construction and use of teacher-made tests. Prerequisite: Psychology and Basic Mathematics or equivalent. Three credits; winter; M.W.F., 8:25.

129. SCHOOL HOME ADMINISTRATION. A course designed especially for those interested in school home work in boarding schools, covering the development, mission, and organization of school homes, with emphasis on the fostering of spiritual and cultural ideals and leadership, in the light of the educational standards of Seventh-day Adventists and the recent developments in the field of personnel work. Three credits; spring; arranged.

143. PRINCIPLES OF SCHOOL ADMINISTRATION. Organization, administration, and supervision in elementary and secondary schools. Three credits; spring, M.W.F., 10:15.

166. INTRODUCTION TO COUNSELING. Consideration of effective techniques of counseling individuals in the solution of personal problems of the school, family, church, and community. Prerequisite: General Psychology. Two credits; spring; T.Th., 8:25.
171. SCHOOL HEALTH EDUCATION. A study of basic principles of teaching health in elementary and secondary schools. Sources, selection, and use of materials in this field. Three credits; autumn; M.W.F., 1:00.

181 or 183. PRINCIPLES OF AUDIO-VISUAL EDUCATION. A survey of the methods of instruction through the use of audio-visual aids, including recording devices, motion pictures, slides, film strips, charts, maps, posters, opaque projection, flat pictures, and blackboard illustrations. Prerequisite: 9 credits in Education. Three credits; autumn or spring, T.Th., 1:00. Laboratory, arranged.

ELEMENTARY AND SECONDARY EDUCATION

18. TEACHING OF BIBLE. Content and methods of teaching of Bible in the elementary school. Two credits; summer; arranged.

42. STORYTELLING. A course designed to complete the requirements for the storytelling vocational honor, how to tell stories, what stories to tell, and experience in telling stories. One credit; winter; T., 7:30.

51-52-53M. PIANO METHODS. See Music.

67, 68, 69M. BRASS METHODS See Music.

71. TEACHING OF READING. Objectives and methods in the teaching of reading in the primary grades. Three credits; autumn; M.W.F., 10:15.

72. TEACHING OF SOCIAL STUDIES. Materials, objectives, and methods used in teaching social studies in the grades, chosen from the fields of geography, history, and civics. Three credits; winter; M.W.F., 10:15.

73. TEACHING OF LANGUAGE ARTS. A course giving the teaching procedures in the related fields of the language arts, literature, grammar, spelling, and writing in the elementary school. Three credits; spring; M.W.F., 10:15.

71, 72, 73M. WOODWIND METHODS. See Music.

84, 85, 86M. STRING METHODS. See Music.

87, 88, 89M. PERCUSSION METHODS. See Music.

97, 98, 99PE. PROFESSIONAL ACTIVITIES. See Physical Education.

101, 102, 103. DIRECTED TEACHING. Professional laboratory experiences on the elementary level including directed teaching. Prerequisite: a background of teacher education courses and a grade-point average of at least 2.00. Three to twelve credits; autumn, winter, spring; M., 4:00 and arranged.

104. SCHOOL ARTS. A course to prepare the teacher to direct in the schoolroom activities such as clay modeling, poster making, art, lettering, crayola, pencil, watercolor, crafts, and appreciation. Three credits; autumn; T.Th., 7:30. Laboratory, T., 1:00-4:00.

105. CHILD LITERATURE. Survey of children's literature for the elementary school level. Three credits; winter; M.W.F., 7:30.

115. TEACHING OF ARITHMETIC. Methods of teaching arithmetic in the elementary school. Three credits; winter; M.W.F., 1:00.

116. TEACHING OF NATURE STUDY. Content, methods, materials, and units used in the teaching of nature study. Three credits; spring; M.W.F., 11:10.

71
121. METHODS AND CURRICULUM OF SECONDARY SCHOOLS. The evolution, scope, and methods of secondary education. Objectives and attainable goals for secondary schools, and the several curriculum offerings. Three credits; autumn; M.W.F., 8:25.

124. METHODS AND CURRICULUM OF ELEMENTARY SCHOOLS. A course designed to acquaint the student with the content of materials used in connection with the course of study in the elementary school and with the general methods that are used in teaching the various types of subject matter. Three credits; autumn; M.W.F., 8:25.

133. TEACHING OF READING II. Diagnostic and remedial teaching of reading for intermediate and upper grades of the elementary school. Three credits; spring; M.W.F., 8:25.

136. WASHINGTON STATE MANUAL. Designed for students in the last year to acquaint them with the chief aspects of the Washington system of public schools and the Washington state laws. One credit; spring; T., 1:00.

141, 142, 143PE. ADVANCED PROFESSIONAL ACTIVITIES. See Physical Education.

147, 148, 149. DIRECTED TEACHING. Professional laboratory experiences on the secondary level including directed teaching. Prerequisite: a background of teacher education courses and a grade-point average of at least 2.00. Three to twelve credits; autumn, winter, spring; arranged.

147IE. COURSE CONSTRUCTION. See Industrial Education.

147M. VOICE METHODS. See Music.

148IE. METHODS OF TEACHING INDUSTRIAL ARTS. See Industrial Education.

151. MATHEMATICS AND SCIENCE IN THE SECONDARY SCHOOL. Methods and techniques of teaching science on the secondary school level. Two credits; autumn; arranged.

154. SOCIAL STUDIES IN THE SECONDARY SCHOOL. Methods and techniques of teaching the social studies on the secondary school level. Two credits; autumn; T.Th., 8:25.

159. LANGUAGE ARTS IN THE SECONDARY SCHOOL. Methods and techniques of teaching English and related subjects on the secondary school level. Two credits; spring; T.Th., 8:25.

197H Econ. METHODS OF TEACHING HOME ECONOMICS. See Home Economics.

197PE. METHODS OF TEACHING PHYSICAL EDUCATION. See Physical Education.

197Sh. METHODS OF TEACHING SHORTHAND. See Secretarial Science.

197Typ. METHODS OF TEACHING TYPEWRITING. See Secretarial Science.

GRADUATE COURSES

208. SPECIAL PROBLEMS IN GRADES 1-8. A study of teaching techniques in a schoolroom situation; an analysis of special problems in the various areas of the elementary school. Registration limited. Three
221. PSYCHOLOGY OF LEARNING. The course includes analysis of the mechanisms involved in the learning process. The physiological and psychological basis for functional learning is discussed, and the experimental evidence supporting psychological hypotheses is reviewed. Three credits; autumn; M.W., 4:30-6:00.

222. PHILOSOPHY OF EDUCATION. A study of the basic principles and development of true education resulting in the formulation of aims and objectives of education for Christian society. Three credits; winter; M.W., 4:30-6:00.

223. HISTORY OF THE PROBLEMS OF EDUCATION. A course for advanced students dealing with problems of modern education and their historical background. Textbook, readings, discussion, term paper. Three credits; spring; M.W., 4:30-6:00.

244. HISTORY OF EDUCATIONAL THOUGHT. Theories and practices of great educators in ancient and modern times. Interpretation of educational thought from a Christian philosophical viewpoint. Evaluation of educational thought in western civilization. Two credits; autumn; T.Th., 5:00.

249. MENTAL HEALTH IN EDUCATION. Physiological and psychological factors related to emotional maturity. Identification of mental health activities. Individual mental health, classroom climate, patterns of acceptance and rejection. Two credits; Spring; T.Th., 5:00.

251. SCHOOL ADMINISTRATION AND SUPERVISION. A course which presupposes some familiarity with problems of administration and supervision. An intensive study of more important problems of organization and administration in secondary and elementary education. Three credits; autumn; M.W.F., 7:30.

252. COUNSELING AND GUIDANCE. Principles and techniques of individual and group counseling with emphasis on the scope; needs; organization of the program; services to students, the instructional staff, and the administration; personnel needed for the program. Three credits; winter; M.W.F., 7:30.

256. CURRICULUM PLANNING. The relation of curricular materials to educational outcomes in terms of personal and social values. A brief review of curriculum investigations and their significance in the selection and evaluation of school materials and activities. Current practices in curriculum revision. Three credits; spring; M.W.F., 7:30.

262. SEMINAR. Methods of research applied to current educational issues and trends in America. Two credits; winter; T.Th., 5:00.

265. SEMINAR. Topics in elementary education dealing with curriculum, personnel, school plant, finance, public relations, or other related areas. Two credits; winter; arranged.

266. SEMINAR. Topics in secondary education dealing with curriculum, personnel, school plant, finance, public relations, or other related areas. Two credits; spring; arranged.

280. SPECIAL PROBLEMS IN EDUCATION. Degree candidates who desire to pursue special research problems under the direction of the major professor may register for one to three credits.

290. THESIS. Five to nine credits.
ENGINEERING

MR. CROSS, MR. HARTER, MR. LARSON, MR. MASDEN, MR. PASHNIAK

The College offers courses leading to the degree of Bachelor of Science in Engineering, with curriculums in civil, electrical, and mechanical engineering. The aim of the engineering course is to prepare students to practice professional engineering, which involves the application of mathematics and the sciences to the design and construction of machines and structures for the benefit of mankind.

Students who plan to enroll as engineering freshmen should have a strong background of mathematics, physics, chemistry, and English. No student with less than two years of preparatory training in mathematics can be admitted to the engineering course, except on a provisional basis, until such deficiency is removed.

College students who pursue a pre-engineering program at another liberal arts college may complete the requirements for an engineering degree at Walla Walla College.

Admissions to engineering will be made only in September, except for certain advanced students. Satisfactory progress is contingent upon full attendance for all three quarters, and the maintenance of a C average grade. Since there is no clear distinction between major and minor courses, the grade of D in any subject will be interpreted as follows: A grade of D may be accepted for credit toward the degree provided there are no more than two such marks in any given quarter, and further provided that the grade-point average for that quarter is not lower than 2.00. Where these conditions do not hold, a grade of D will necessitate repeating the course, whether it is engineering or nonengineering in nature.

In the senior year the following non-course requirements should be met: inspection trip, thesis, and completion of the Graduate Record Examination.

The stipulated requirements for the degree of Bachelor of Science in Engineering are as follows:

CIVIL ENGINEERING

CIVIL ENGINEERING

CE 54. ELEMENTARY SURVEYING. Use of transit, level, and chain; systematic methods for notes and computations; transit traverse, stadia survey; leveling, contours, mapping, and public land surveys. Prerequisite: Mathematics 22, ME 1-2-3. Three credits; autumn; M.W., 1:00-5:30.

CE 55. CURVES AND EARTHWORKS. Theory and computation of simple, compound, and transition curves; earthwork computations. Prerequisite: CE 54. Three credits; winter; M.W.F., 7:30.

CE 56. ROUTE SURVEYING. Preliminary and location surveys for land transportation routes; preparation of maps and reports. Prerequisite: CE 54 and 55. Three credits; spring; M.W., 1:00-5:30.

CE 73. MECHANICS OF MATERIALS. Stresses, deformations and deflections of posts, shafts, beams, columns; combined stresses. Prerequisite: ME 51-52. Four credits; spring; M.T.W.F., 11:10.
CE 101. CONTRACTS AND SPECIFICATIONS. Preparation and interpretation of contracts and specifications; relation of the engineer to the owner and the contractor. Three credits; autumn; M.W.F., 7:30.

CE 102. SOIL MECHANICS. Fundamental principles; testing and classification of soils for use in foundations and highway subgrades; interpretation of test results. Three credits; winter; M.W., 11:10. Laboratory, W., 2:00-5:00.

CE 106. HIGHWAYS. Highway materials; location, construction, maintenance and economics of various types of highways. Prerequisite: CE 55, 56, 102. Three credits; spring; M.W.F., 11:10.

CE 131. ELEMENTARY STRUCTURAL ANALYSIS. Graphical and algebraic analysis of statically determinate structures; influence diagrams, criteria for maxima; moving loads. Prerequisite: CE 73. Three credits; autumn; M.W.F., 10:15.

CE 132. STRUCTURAL DESIGN—TIMBER. Analysis and design of elements of timber structures; fastenings, beams, columns and trusses. Prerequisite: CE 131. Three credits; winter; M.W.F., 10:15.

CE 133. STRUCTURAL DESIGN—STEEL. Analysis and design of elements of steel structures; connections, welding, beams, girders, columns, trusses, and bearings. Prerequisite: CE 131. Three credits; spring; M.W.F., 10:15.

CE 136. STRUCTURAL DESIGN—CONCRETE. Analysis and design of elements of reinforced concrete structures; beams, slabs, girders, columns, and footings. Prerequisite: CE 131. Four credits; spring; M.-Th., 8:25.

CE 146. FOUNDATIONS. Analysis and design of foundations and other substructures including concrete footings, pile foundations, retaining walls, cofferdams, and caissons. Prerequisite: CE 136. Three credits; spring; M.W.F., 7:30.

CE 148. SANITATION. Diseases, rural sanitation, refuse disposal, vector control, milk sanitation, industrial hygiene, and radiological sanitation. Three credits; winter; M.W.F., 1:00.

CE 149. HYDROLOGY. Precipitation, runoff, storage, and methods of measurement. Three credits; spring; M.W.F., 7:30.

CE 159. WATER POWER. The hydrologic, economic, and engineering aspects of water power development; dams and waterways; turbines and generating equipment. Prerequisite: CE 149, ME 111. Three credits; autumn, M.W.F., 1:00.

CE 167-168-169. WATER SUPPLY AND SEWAGE DISPOSAL. Fundamental processes in the collection and distribution and conditioning of water as applied to water supply and sewage disposal. Design and operation of typical plants. Prerequisite: ME 111, CE 149. Three credits; autumn, winter spring; M.W.F., 11:10.

CE 171. STRUCTURAL ANALYSIS. Analysis of statically indeterminate structures; continuous beams, trusses, rigid frames, and arches. Prerequisite: CE 131. Five credits; autumn; M.-Th., 8:25. Computation, T., 2:00-5:00.

CE 172. ADVANCED STRUCTURAL DESIGN—STEEL. Design of statically indeterminate steel structures; industrial buildings, bridges, multi-story buildings, and introduction to plastic design. Prerequisite: CE 171. Five credits; winter; M.-Th., 8:25. Computation, T., 2:00-5:00.
CE 173. ADVANCED STRUCTURAL DESIGN—REINFORCED CONCRETE. Design of statically indeterminate reinforced concrete structures; buildings, bridges, introduction to ultimate strength design, and pre-stressed concrete. Prerequisite: CE 171, 172. Five credits; spring; M.-Th., 8:25. Computation, T., 2:00-5:00.

ELECTRICAL ENGINEERING

EE 64-65-66. ELECTRIC AND MAGNETIC CIRCUIT ANALYSIS. Basic electrical circuit concepts; Ohm's Law and resistance; Kirchoff's Laws, network theorems and analysis; basic electrical measurements, magnetic circuit concepts, and solution of linear and nonlinear circuits; electromagnetic induction and inductance; Gauss' law and capacitance; steady state analysis of single phase and polyphase AC circuits by use of the complex operator; resonance. Corequisites: Physics 51, 52, 53; Mathematics 51-52-53. Four credits; autumn, winter, spring; M.W.F., 1:00. Laboratory, S., 8:30-11:30 of 1:00-4:00 as arranged.

EE 161-162, 163. ELECTRIC MACHINERY. Operational characteristics of DC motors, generators, and associated control equipment, characteristics of transformers and their application in single and polyphase circuits; induction motors; synchronous motors, alternators; single phase motors and other special types of rotating machines; elementary analysis of unbalanced polyphase systems by the method of symmetrical components; metering techniques and basic design principles. Prerequisite: EE 64-65-66. Four credits; autumn, winter, spring; M.W.F., 10:15. Laboratory, M., 2:00-5:00.

EE 164-165-166. RADIO COMMUNICATIONS. High frequency vacuum tube circuit analysis; radio frequency amplifiers, oscillators; video amplifiers; modulation and demodulation of a carrier and consideration of several systems for communications including AM and FM; electric filter theory; application of communication theory to problems in electrical instrumentation. Prerequisite: Physics 111-112-113. Three credits; autumn, winter, spring; M.W.F., 11:10.

EE 164A. RADIO COMMUNICATIONS LABORATORY. A laboratory course to be taken concurrently with EE 165. Two credits; winter; T., 2:00-5:00.

EE 165A. RADIO COMMUNICATIONS LABORATORY. A laboratory course to be taken concurrently with EE 165. Two credits; winter; S., 8:00-11:00, T., 2:00-5:00.

EE 174. TRANSIENT ANALYSIS. A consideration of the behavior of electric circuit variables during the time from initial application of energizing sources to steady state conditions; also, effects of termination of energizing sources; the effects of sudden changes of resistance, inductance and capacitance; application of classical and Laplace transform techniques to analysis of transient effects in electrical and electrochemical systems. Prerequisite: Physics 111, 112, 113. Five credits; autumn; M.-F., 8:25.

EE 175. FIELDS AND WAVES. A study of the properties of electric and magnetic fields; application of analytical and graphical mapping techniques to determine capacitance, inductance, resistance and related quantities of physical systems having relatively simple geometries; study of Maxwell's equations and their development from experimental laws;
application of Maxwell's equations to solution of steady state wave conditions in wave guides and simple antennas. Prerequisites: EE 64-63-66, Mathematics 161, 162, 163. Four credits; winter; M.T.Th.F., 8:25.

EE 175A. FIELDS AND WAVES LABORATORY. A laboratory course to supplement EE 175. Prerequisite: EE 175. One credit; spring; S., 8:25-11:10 or T., 2:00-5:00 by arrangement.

EE 176. TRANSMISSION LINES. Development of transmission line equations, relating currents, voltages, and line parameters in power and communications lines; determination of parameters from physical properties; analysis of steady state and transient performances; application of Smith chart to lossless and lossy lines. Prerequisite: EE 175. Five credits; spring; M.T.W.F., 8:25. Laboratory, S., 8:00-11:00 or T., 2:00-5:00 by arrangement.

MECHANICAL ENGINEERING

ME 1-2-3. ENGINEERING DRAWING. Lettering; theory and practice of projection drawing; conventional and simplified practices; pictorial representation; detail and assembly drawings; problems in descriptive geometry, developments and intersections; engineering applications. Three credits; autumn, winter, spring; Sec. A, M.W., 1:00-5:30; Sec. B, T.Th., 1:00-5:30.

ME 51-52. ENGINEERING MECHANICS. Statics, two and three-dimensional; analytical and graphical methods; kinetics; work and energy; dynamics of rotating bodies; impulse; momentum. Corequisite: Physics 51, 52, Mathematics 51-52. Four credits; autumn, winter; M.T.W.F., 11:10.

*ME 61-62-63. ARCHITECTURAL DRAWING. Architectural detail and its relation to the building; working drawings. A course for Industrial Education majors. Prerequisite: ME 1-2-3 or I. E. 4-5-6. Two credits; autumn, winter, spring; M.W., 2:00-5:00.

ME 111. FLUID MECHANICS. Fluid statics; fluid dynamics; nozzles, orifices, and weirs; impulse and reaction turbines; pipe flow; channel flow. Prerequisite: ME 51-52. Four credits; autumn; M.-Th., 8:25.

ME 112, 113. ENGINEERING THERMODYNAMICS. Properties of gases and vapors; entropy; PV, TS, HS, and HV planes; gas and vapor cycles; psychrometry; refrigeration. Prerequisite: Physics 51, 52, 53. Four credits; winter, spring; M.-Th., 8:25.

ME 119. MECHANISM. A study of velocities, accelerations, and motions, as well as a consideration of devices for transferring these motions. Prerequisite: ME 51-52. Four credits; spring; M.-Th., 7:30.

ME 122. ENGINEERING ADMINISTRATION. Business, legal and ethical phases of engineering practice; engineering organization and management. Three credits; winter; M.W.F., 7:30.

ME 123. HEATING AND AIR CONDITIONING. Principles and practice of heating, ventilating, and air conditioning to meet public, residential, and industrial needs; heat losses and gains; automatic control equipment. Prerequisite: ME 111, 112, 113. Three credits; spring; M.W.F., 7:30.

*Not offered 1929-1960.
ME 137, 138, 139. MECHANICAL ENGINEERING LABORATORY I. Hydraulic flow and tests of hydraulic equipment; calorimetry; instrumentation, calibrations. Corequisite: ME 111, 112, 113. One credit; autumn, winter, spring; T., 2:00-5:00.

ME 141-142-143. MACHINE DESIGN. Practical application of kinematics, materials, mechanics, and mechanical processes to the design of machines and machine elements, with due regard to the selection of materials, constructions, lubrication, safety, and cost. Calculations, layouts and detail drawings as required. Prerequisite: ME 119, CE 73. Corequisite: ME 151. Three credits; autumn, winter; T.Th., 7:30; F., 8:25; spring; T.Th., 1:00-5:00.

ME 151-152. ENGINEERING MATERIALS. Materials of construction—lime, cement, sand, clay, stone, ferrous metals, nonferrous metals; properties, uses, tests, behavior under stress. Prerequisite: CE 73. Five credits; autumn; M.-Th., 1:00. Laboratory, Th., 2:00-5:00. One credit; winter; Th., 2:00-5:00.

ME 154, 155, 156. MECHANICAL ENGINEERING LABORATORY II. Testing of mechanical equipment; fuels and lubricants. Prerequisite: ME 137, 138, 139. One credit; autumn, winter, spring; W., 2:00-5:00.

ME 179. HEAT TRANSFER. A study of the basic laws of heat transfer by conduction, convection, and radiation. Prerequisite: ME 112, 113, Mathematics 161, 162. Three credits; spring; M.W.F., 10:15.

ENGLISH

MR. APLINGTON, MRS. BULL, MISS BURGESON, MISS MOORE, MR. WALLER

The department aims to develop correctness and effectiveness in the use of the English language and to enable students to express the best thoughts within themselves. It also seeks to inspire them with the best that has been thought and said by the great authors of English and American literature. It hopes to be instrumental in training some to write for our denominational publications.

The following courses are also required:
History 51, 52, 53 or 154, 155, 156, and six credits in writing courses beyond Freshman Composition.

ENGLISH MINOR REQUIREMENTS:
A minimum of 27 credits including 6 upper division credits. Courses 64, 65, 66; 74, 75, 76; and six credits in writing courses beyond Freshman Composition.
COMPOSITION

1-2-3. FRESHMAN COMPOSITION. Fundamental principles of composition: syntax, effective sentence structure, punctuation, paragraph development, organization of material, writing the various types of themes, and reaction to a reading program. English 1 or 1A will be repeated in the winter, spring, or summer when the need is adequate. Three credits; autumn, winter, spring; Sec. A, M.W.F., 10:15; Sec. C, M.W.F., 7:30; Sec. D, M.W.F., 11:10; Sec. E, M.W.F., 7:30; Sec. F, M.W.F., 8:25; Sec. G, M.W.F., 8:25; Sec. H, M.W.F., 11:10; Sec. I, M.W.F., 10:15; Sec. J, M.W.F., 11:10; Sec. K, M.W.F., 10:15.

1A-2-3. FRESHMAN COMPOSITION. This course differs from the preceding one in that during the first quarter only it meets five times a week in order to accommodate those who need a review in fundamentals or extra attention to basic details. Three credits; autumn, winter, spring; Sec. B, autumn, M.-F., 10:15; winter, spring, M.W.F., 10:15; Sec. BB, autumn, M.-F., 10:15; winter, spring, M.W.F., 10:15; Sec. BBB, autumn, M.-F., 8:25; winter, spring, M.W.F., 8:25.

142, 143. LITERARY COMPOSITION. A course designed to stimulate creative ability and imagination, through reading and writing artistic prose and verse. Two credits; winter, spring; T.Th., 11:10.

LITERATURE

51. INTRODUCTION TO LITERATURE. A study of the basic principles, the philosophy and nature of literary art, and the technical terminology together with an analysis of examples of the various forms and types of poetry and prose. This course does not fulfill the general education literature requirement. Three credits; autumn; M.W.F., 8:25.

64, 65, 66. AMERICAN LITERATURE. A survey of American literature with particular attention to the cultural complexes and philosophies that have characterized the various periods of literary history in this country. Two credits; autumn, winter, spring; T.Th., 10:15.

74, 75, 76. ENGLISH LITERATURE. A chronological study of English literature with emphasis on the major writers and movements from Beowulf to about 1900. Literature is correlated with the other fine arts at appropriate times through the course. Three credits; autumn, winter, spring; M.W.F., 7:30.

82. TWENTIETH CENTURY LITERATURE. Modern American and British literary achievements studied as a revelation of contemporary attitudes, ideals, and conduct. Three credits; winter; M.W.F., 8:25.

Courses numbered above 100 have as prerequisites the appropriate lower-division preparation, which varies according to the background of the student in other languages and in history. Consult the department for directions.

154, 155, 156. THE VICTORIAN PERIOD. An advanced study of the poetry and prose of the men who moulded and reflected characteristic opinion and ideals after the first third of the nineteenth century. Three credits; autumn, winter, spring; M.W.F., 10:15.
157, 158, 159. AMERICAN LITERARY MASTERS. An advanced study of a restricted number of American writers who have given significant distinction to American letters. Two credits; autumn, winter, spring; T.Th., 10:15.

161, 162, 163. THE ROMANTIC PERIOD. An analytical examination of the emergence of Romantic ideals and their manifestation in literature, beginning with the pre-Romantic school to 1832. Two credits; autumn, winter, spring; T.Th., 11:10.

165. HISTORICAL AND MODERN GRAMMAR AND LINGUISTICS. This study, designed for English majors and minors who intend to be teachers, includes a survey of linguistics and historical grammar, but the chief emphasis is on present-day grammar and its tendencies. Required of those seeking departmental recommendation for teaching. Three credits; winter; M.W.F., 11:10.

167-168-169. RESTORATION AND NEOCLASSIC LITERATURE. Neoclassic ideals and achievements as reflected in the chief writers of the time from Bunyan and Dryden to Johnson. Two credits; autumn, winter, spring; T.Th., 10:15.

171, 172-173. OLD AND MIDDLE ENGLISH LITERATURE. An examination and study in its historical setting of English literature from the earliest Anglo-Saxon remains to about 1450. The Old English works are studied in translation and the Middle English, including Chaucer, largely in originals. Three credits; autumn, winter, spring; M.W.F., 7:30.

*184, 185, 186. ENGLISH RENAISSANCE LITERATURE. Detailed exploration in the significant nondramatic literature that reflects the essential temper of the Renaissance period, with chief emphasis on Spenser, Bacon, and Milton. Three credits; autumn, winter, spring; M.W.F., 11:10.

189. LITERATURE OF THE ENGLISH BIBLE. Detailed analysis of the technical requirements of Hebrew poetry and prose types, particularly stressing passages that reveal the peculiar literary genius and grandeur of the Bible. Three credits; spring; M.W.F., 8:25.

197-198-199. SEMINAR. An integrating course required of English majors in the senior year and recommended to minors. The study includes: aims, methods, and materials of English scholarship; investigation of problems peculiar to the class personnel; group conferences and reports. One credit; autumn, winter, spring; W., 4:00.

JOURNALISM

JOURNALISM MINOR REQUIREMENTS:

A minimum of 27 credits including 2 credits in course 142 or 143.

84-85-86. NEWS WRITING. A practical course in gathering news and writing news stories, simple feature stories, and editorials. Copy editing and other desk exercises are designed to aid the student in developing skill in producing acceptable newspaper copy. Two credits; autumn, winter, spring; T.Th., 8:25.

*121, 122, 123. MAGAZINE ARTICLE WRITING. Fact writing, with analyses of magazine markets, fundamentals of gathering materials for articles and preparation of manuscripts for publication. Two credits; autumn, winter, spring; arranged.

131, 132, 133. COPYREADING AND EDITING. The theory of news selection, preparation, and display are presented in lectures, but the class is primarily a workshop in advanced news writing, with considerable practice in copy editing and headline writing. One credit; autumn, winter, spring; arranged.

141. EDITORIAL WRITING. The writing of editorials, interpretive articles, and critical reviews, with a study of these types as found in today's newspaper. Two credits; autumn, T.Th., 11:10.

*151, 152, 153. NEWSPAPER PROBLEMS. Reading and analyses of several newspapers; study of news department organization and editorial policies, local and international news coverage. Two credits; autumn, winter, spring; arranged.

166. SECONDARY SCHOOL PUBLICATIONS. A course designed for prospective English teachers who will work with school publications staffs. A study of editorial and business aspects in such publications, with an examination of several school papers and yearbooks. Two credits; spring; arranged.

HISTORY, POLITICAL SCIENCE, AND SOCIAL SCIENCE

MR. WESTERM EYER, MR. CHRISTIAN, MR. HANSON, MR. MECKLING

The department offers a major in history and minors in history, political science, and social science.

HISTORY

The purpose of the work in history is fivefold: to promote a better understanding of the past and an appreciation of the present; to broaden the cultural outlook and formulate a constructive philosophy of history and of life; to train in skills of research and evaluation; to show the relation between history and prophecy; and to prepare teachers and social workers.

MAJOR REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:

A total of 54 credits including courses 1, 2, 3; 51, 52, 53; and 194, 195. Nine credits in Political Science and Social Science, selected in consultation with the head of the department, may be included.

MINOR REQUIREMENTS:

A total of 28 credits including courses 1, 2, 3; 51, 52, 53; and 196. Three credits in Political Science or Social Science, selected in consultation with the head of the department, may be included.

1, 2, 3. HISTORY OF CIVILIZATION. A survey of world history from antiquity to the present. Three credits; autumn, winter, spring; Sec. A, M.W.F., 8:25; Sec. B, M.W.F., 11:10.

51, 52, 53. **HISTORY OF THE UNITED STATES.** A survey of the colonial period, followed by a more detailed study of the national period. Three credits; autumn, winter, spring; Sec. A, M.W.F., 7:30; Sec. B, M.W.F., 8:25.

**EUROPEAN HISTORY**

111. **ARCHAEOLOGY AND THE ANCIENT NEAR EAST.** The archaeological findings of Babylon, Assyria, Egypt, Medo-Persia and minor nations and their relation to history. Two credits; autumn; T.Th., 1:00.

112. **GREECE AND THE HELLENISTIC AGE.** A study of Greek civilization, its political and intellectual contributions, Hellenistic civilization in relation to the peoples surrounding the Eastern Mediterranean Basin. Two credits; winter; T.Th., 1:00.

113. **ROMAN CIVILIZATIONS.** Early Roman political forms, the growth of the empire in relation to a militant Christianity, the elements of political decay leading to its decline, the contributions of Roman civilization to the western nations. Two credits; spring; T.Th., 1:00.

*141, 142, 143. **EUROPE SINCE 1815.** Political, economic, and social developments in nineteenth and twentieth century Europe, with special attention to our own times. Two credits; autumn, winter, spring; T.Th., 10:15.

151, 152, 153. **CURRENT HISTORY.** A survey of contemporary national and international affairs, based upon an investigation into causal factors. Current magazines, newspapers, and books are used. Two credits; autumn, winter, spring; T.Th., 10:15.

154, 155, 156. **HISTORY OF ENGLAND.** The development and expansion of the English people from the earliest times to the present. Two credits; autumn, winter, spring; T.Th., 7:30.

*159. **THE FAR EAST.** This course offers a survey of the history and culture of Far Eastern people, with emphasis on the interplay of political and cultural influences among the various eastern groups and between them and the Occident. Three credits; spring; M.W.F., 8:25.

161, 162, 163. **HISTORY OF RUSSIA.** A general survey of the expansion of Russia, Tsarist experiments in political and social reform, the rise and spread of revolutionary socialism, the collapse of the Russian Empire during the First World War, the postwar history of the U.S.S.R., including its conflict with Germany in World War II. Two credits; autumn, winter, spring; T.Th., 11:10.

167. **THE LATE MIDDLE AGES.** The period of papal revival, the growth of the towns, the struggle of Empire and Papacy, the emergence of royal authority, the rise of the bourgeoisie, growing dissent in the medieval church. Three credits; autumn; M.W.F., 10:15.

168. **THE RENAISSANCE.** The decline of feudalism, of the gild system, of papal authority, and of scholastic thought, followed by the Italian Renaissance and Humanism in the north. Three credits; winter; M.W.F., 10:15.

169. **THE REFORMATION.** The revolution in religion. A study of the main branches of Protestantism and their relation to the political life of Europe; the Catholic Counter-Reformation. Three credits; spring; M.W.F., 10:15.

179. HISTORY OF THE BRITISH EMPIRE. Political and economic theories leading to imperialism, territorial growth, the nature of the empire, relation of the various parts to Great Britain. Three credits; spring; M.W.F., 8:25.

184. TWENTIETH CENTURY TOTALITARIANISM. An analysis of totalitarian forces operative today with special emphasis on recent religious and political trends in Russia, Italy, and Germany. This course will be offered on a combined lecture and seminar basis. Three credits; autumn; M.W.F., 11:10.

AMERICAN HISTORY

*164, 165. THE AMERICAN FRONTIER. The exploration, settlement, and development of the American west with consideration given to economic, social, cultural, and political factors. Two credits; autumn, winter; T.Th., 8:25.

*166. AMERICAN DIPLOMATIC RELATIONS. A study of relations between the United States and other nations, outstanding controversies and their settlement, and the development of recognized foreign policies. Two credits; spring; T.Th., 8:25.

*174. HISTORY OF CANADA. The French period, English Colonial period in relation to the United States, the National period, westward expansion. Three credits; autumn; M.W.F., 8:25.

176. HISTORY OF THE PACIFIC NORTHWEST. Development of the Northwest with emphasis on the State of Washington. The fur traders, the missionary era, the settlement of Washington following 1846, territorial days, political and economic development during statehood. Three credits; spring, M.W.F., 11:10.

*187, 188, 189. HISTORY OF LATIN AMERICA. A survey of the colonial period, followed by a more detailed study of the development of the individual Latin-American nations and their world relationship. Two credits; autumn, winter, spring; T.Th., 11:10.

186. SEMINAR FOR HISTORY MINORS. A special orientation and research course required of all history minors. One credit; spring; W., 1:00.

191, 192, 193. SPECIAL PROBLEMS IN HISTORY. Open only by written permission of the head of the department to advanced students with a superior background in historical study. Readings, reports, and conferences. One or two credits; autumn, winter, or spring; arranged.

194, 195. SEMINAR FOR HISTORY MAJORS. An orientation and research course in problems connected with historical materials and methods. One credit; autumn, winter; W., 1:00.

POLITICAL SCIENCE

The objectives of the courses in Political Science are to give an understanding of the functions of our government and of international relations, and to prepare for teaching, religious liberty work, and study in law.

MINOR REQUIREMENTS:
A total of 28 credits including courses 51, 101, 151, 152 and 165. History 166, 184; Social Science 161; or Business Administration 61-62-63 may be included in the minor. A minimum of 12 credits in cognate history courses, selected in consultation with the head of the department, is also required.

51. AMERICAN GOVERNMENT. A study of the origin and establishment of our national government; its executive, legislative, and judicial functions with emphasis on church-state relations and the position of the United States as a world power. State and municipal governments also receive consideration. Three credits; autumn; T.Th., 8:25 plus workshop.

*101. COMPARATIVE EUROPEAN GOVERNMENTS. A study of the political developments of the major European states, with emphasis placed on contemporary problems. Prerequisite: History 1, 2, 3. Three credits; autumn; M.W.F., 8:25.

*151. CONSTITUTIONAL INTERPRETATION. The first part will be devoted to a brief survey of constitutional development followed by a careful study of the function of the judiciary in the American system of government. During the second part, important court decisions will be considered, with special emphasis upon those dealing with religion and the relation of church and state. A workshop will be conducted as an integral part. Three credits; autumn; T.Th., 8:25 plus workshop.

152. WORLD POLITICS AND INTERNATIONAL RELATIONS. A study of the political objectives of imperialistic nations, the position of the Vatican in world affairs, the relation between the League of Nations and the United Nations organization, with emphasis on the emergence of the United States as a world power. Three credits; winter; M.W.F., 11:10.

*165. POLITICAL THEORY. A survey of the main schools of political thought from ancient times to the present, with emphasis on the development of democratic theories of government and the present-day clash of ideologies. Three credits; winter; M.W.F., 8:25.

SOCIAL SCIENCE
The objectives of the courses in Social Science are to give an understanding of present-day problems of living, to prepare for social work, mission work, family life, and youth leadership.

MINOR REQUIREMENTS:
A total of 28 credits including courses 3, 104, 172, 173, Political Science 51, and Education 57, 58, or 59. Education 112, 166; Business Administration 61-62-63; and Physical Education 174, 175, or 176 may apply on the minor.

3. SURVEY OF SOCIOLOGY. An introductory study of social organization, the nature of social relations, and the influences that shape society. Three credits; spring; Sec. A, M.W.F., 11:10; Sec. B, M.W.F., 1:00.

104. THE FIELD OF SOCIAL WORK. A survey of the fields and methods of social work; the growth, organization, and function of public

and private programs in the field of social welfare. For the social worker, as well as for the professions of teaching, nursing, medicine, and the ministry. Field trips arranged. Three credits; autumn; M.W.F., 10:15.

105. HUMAN RELATIONS. A general course designed to acquaint the student with the ethics of human relationships, of standards of community life, of the responsibilities of the cultured individual in society, and to provide a Christian perspective regarding the problems of marriage and home building. Two credits; winter; T.Th., 8:25.

108. CULTURAL FOUNDATIONS. A survey of the cultural heritage of the race, the best in music, art, ancient literature, and other appreciations. Competent guest lecturers will frequently appear before the class. Three credits; winter; M.W.F., 1:00; summer; arranged.

129. WORLD GEOGRAPHY. A survey course of the major groups of natural regions. Essentially human geography, but with adequate attention to economic and physical aspects. Three credits; spring; M.W.F., 7:30.

*161. PUBLIC OPINION AND PROPAGANDA. A study of the problems and processes in the formation of public opinion and how public action may be organized through the use of propaganda and pressure groups. Consideration will be given to the influence of newspapers, magazines, pulpit, desk, radio, and television in moulding thought. Three credits; autumn; M.W.F., 8:25.

172, 173. PROBLEMS OF CONTEMPORARY SOCIETY. Consideration will be given to the philosophy, mystery and challenges of life, to culture and refinement, to factors of heredity and environment, to conditions of the underprivileged and needy, to problems of adolescence and juvenile delinquency, to courtship and marriage, to family and community life. This course intends to aid social workers and all those who wish to help others, as well as better themselves.

Taught by selected staff personnel. Lectures, panel discussions, readings, case studies, cooperative and individual explorations of social problems, with reports. Two credits; winter, spring; T.Th., 8:25.

HOME ECONOMICS

MISS WRIGHT, MR. WALL, MRS. ZOLBER

The major in General Home Economics is broad and flexible, designed particularly for the general college student or those preparing for teaching. Interior Design and Decoration is for those interested in such professional positions as interior decorator, Extension Service specialist, and drapery or home furnishing consultant. The major in Foods and Nutrition meets all the requirements of the American Dietetics Association and prepares the student to enter a dietetic internship.
HOME ECONOMICS MAJOR REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:
A minimum of 45 credits in Home Economics including 21 upper division credits. Courses 1, 2, 3; 72, 73; 171-172; and 186 are required. Chemistry 4-5-6 and Biological Science 7 are also required.

INTERIOR DESIGN AND DECORATION MAJOR REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:
A minimum of 45 credits including courses 1, 2, 3; 42, 43; 59; 61; 72, 73; 88; 89; 102 or 103; 164, 165; 186; and 196. Students must also complete a minor in Art and the following courses: Industrial Education 114, 125. Physical Education and Recreation 124, 125.

FOODS AND NUTRITION MAJOR REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE:
A minimum of 45 credits in Home Economics including courses 1, 2, 3; 94-95; 141-142; 163; 171-172, 173; 177, 178; and 186. Chemistry 4-5-6 or 21-22-23, 91-92, 156; Biological Science 7; Nursing 85; and Business Administration 91-92-93 or Social Science 3 are also required.

MINOR REQUIREMENTS:
A minimum of 27 credits including courses 1, 2, 3; 72, 73; 186; and 197.

1, 2. FOODS AND NUTRITION. Discussion of the fundamental problems of food in relation to health; study of the composition, nutritive value, and digestibility of common foods; principles of food selection and preparation. Three credits; autumn, winter; T.Th., 11:10. Laboratory, Sec. A, M., 2:00-5:00; Sec. B, T., 2:00-5:00; Sec. C, W., 2:00-5:00; Sec. D, Th., 2:00-5:00.

3. MEAL PLANNING AND TABLE SERVICE. A course in menu planning and table service. Preparation and practice in serving formal and informal dinners, buffet suppers, luncheons, etc. Prerequisite: 1, 2, or equivalent. Three credits; spring; T.Th., 11:10. Laboratory, M. or W., 2:00-5:00.

11, 12, 13. BAKING. A practical course in baking with study of ingredients used in manufacturing of breads and rolls. Practice in cake, pie, cookie, and sweet goods production. Problems in baking and cost control. Three credits; autumn, winter, spring. Class and laboratory, arranged.

42, 43. ART IN EVERYDAY LIVING. Introduction in the use of art elements giving consideration to line, form and color as applied in the fundamental principles of design and the various aspects of the home, clothing and everyday living. Problems in selecting and designing. Course 42 prerequisite for 43. Three credits; winter, spring; M.W.F., 8:25.

59. HOUSEHOLD EQUIPMENT. Selection, operation and care of household appliances, electricity in the home and kitchen planning. Two credits; spring; T.Th., 8:25.

61. CONSUMER BUYING. A study of the homemaker's problems in buying textiles, clothing and household materials with emphasis on the economic principles involved. Three credits; autumn; M.W.F., 8:25.
67 or 68. **SOCIAL ETHICS.** A preparation for the social aspects of home and community living for both men and women. Two credits; autumn or winter; T.Th., 8:25.

71. **CLOTHING FUNDAMENTALS.** A course presenting the fundamental processes of hand and machine sewing; construction and selection of simple garments. Three credits; autumn; T.Th., 8:25. Laboratory, M. or W., 2:00-5:00.

72, 73. **CLOTHING SELECTION AND CONSTRUCTION.** Aims to develop good taste in dress and to give an appreciation in selection of clothing from standpoint of beauty, health, and economy; fundamental processes of hand and machine sewing; study of alterations, fitting problems and use of commercial patterns; construction of garments using cotton, wool, rayon and other materials; consideration of fabrics to determine fundamental differences and to develop judgment in buying clothing. Prerequisite: 71 or its equivalent. Three credits; winter, spring; T.Th., 8:25. Laboratory, M. or W., 2:00-5:00.

88. **TEXTILES.** A study of fabrics to determine fundamental differences and to develop judgment in buying clothing and house furnishing materials. Two credits; winter; T.Th., 10:15.

89. **TEXTILE PAINTING AND RELATED ARTS.** Study of line, form and color as applied to textile painting, silk screen printing, basketry, and other arts. Two credits; spring; T., 1:00. Laboratory, T., 2:00-5:00.

94-95. **INSTITUTION FOOD PREPARATION.** Instruction and laboratory experience in large quantity food preparation, and food cost control. This course is primarily for those interested in actual preparation of food in college and academy cafeterias. Prerequisite: 1, 2, 3. Three credits; autumn, winter; arranged.

102, 103. **WEAVING AND HOME FURNISHINGS.** The study of the development of weaving, color harmonies and design as applied to fabrics. Construction of hand-woven materials; tailoring draperies, bedspreads and slip covers. Prerequisite: ability to sew. Three credits; winter, spring; Th., 2:00-5:00, and arranged.

126. **HOUSEHOLD MANAGEMENT.** Management problems of the homemaker in regard to income, time, labor, and family relationships. Study of the selection, operation, care and arrangement of household equipment. Three credits; spring; M.W.F., 10:15.

*141-142. **CHILD DEVELOPMENT AND NUTRITION.** A study of the care and development of young children, with special reference to home education. Three credits; autumn, winter; M.W.F., 8:25.

163. **EXPERIMENTAL COOKERY.** Development of experimental methods; their application of investigations in cookery and the skills involved; acquaintance with the literature in this field; preparation of the student for independent investigations in foods. Prerequisite: 1, 2, 3, and Chemistry 4-5-6. Three credits; spring; T.Th., 8:25. Laboratory, T., 2:00-5:00.

164, 165. **INTERIOR DECORATION.** A study of period furniture and the decorative arts of the past as a background for an understanding of what is good, true and beautiful in home decoration; instruction in and

application of the principles governing the selection of furniture, textiles, pictures, and other furnishings for the home and their arrangement with appropriate backgrounds. Course 42, 43 highly desirable. Three credits; autumn, winter; M.W.F., 10:15.

*171-172. ADVANCED NUTRITION. A scientific study of nutrition involving digestion and metabolic processes and products; selection of an optimum diet for health; recent investigations of nutritional deficiency diseases. Prerequisite: 1, 2, 3 and Chemistry 4-5-6. Three credits; autumn, winter; T.Th., 8:25. Laboratory, M., 2:00-5:00.

173. DIET IN DISEASE. A thorough study of the diagnosis of nutritional deficiency diseases and specific therapy when illness occurs. The course is intended to enable the dietitian to ably assist the physician in filling the dietary prescription for the specific need of each patient. Prerequisite: 171-172. Three credits; spring; M.W.F., 8:25.

*177. INSTITUTION FOOD PURCHASING. Marketing operations, buying procedures, food selection and care. Inspection of merchandise at markets and wholesalers. Prerequisite: 1, 2, 3. Three credits; autumn; M.W.F., 10:15.

*178. INSTITUTION MANAGEMENT. Principles of organization, qualifications for institution managers, purchasing and maintenance of equipment, planning of work, budget analysis. This course offers practical work in the school cafeteria for those who are interested in being managers of institution food services. Prerequisite: 1, 2, 3. Three credits; winter; M.W.F., 10:15.

181-182. TAILORING. Principles involved in making suits and coats for women. Open only to those who show skill in construction of garments. Students should provide themselves with material for making coats the autumn quarter. Prerequisite: 71, 72, 73 or equivalent. Two credits; autumn, winter; T., 1:00. Laboratory, T., 2:00-5:00.

*186. SEMINAR. Studies of selected topics and reviews of current literature. Special investigation of problems. Two credits; spring; T.Th., 10.15.

190. SPECIAL PROBLEMS IN HOME ECONOMICS. Individual work to be carried on by the student, and elected only after consultation with the head of the department. One to three credits; arranged.

196. ADVANCED INTERIOR DECORATION. Advanced study in interior decoration with advice, estimates, and actual work on decorating problems. Must be taken the last quarter of the senior year. Three credits; spring; arranged.

197. METHODS OF TEACHING HOME ECONOMICS. The principles and practices of teaching Home Economics in secondary schools and adult education classes. Special attention will be given to the newer methods of presentation in classroom, laboratory and community demonstrations. Prerequisite: at least 30 hours of Home Economics. Two credits; autumn; T.Th., 10:15.

INDUSTRIAL EDUCATION

MR. TRAUTWEIN, MR. BOND, MR. CANADAY, MR. COWIN, MR. WOLFE

The purpose of the department is to prepare students for teaching industrial arts, and for trade training. Opportunity is offered for considerable freedom in course preferences. The offerings allow concentrations in the following areas:

- Automotive
- Graphics
- Metals
- Woods

Students preparing for teaching should select, in conference with the major professor, a combination of the areas offered, and complete an additional major in education in place of a minor. Majors who elect trade training should minor in business administration. Terminal courses, to meet individual needs, are also offered. Upon completion of selected courses a certificate will be awarded.

Any laboratory course will satisfy the general vocational graduation requirement. Admission to all laboratory classes is by permission of the instructor. In order to make use of all available facilities, laboratory fees are not refundable, except in case of illness, where a prorated refund will be authorized up to four weeks.

MAJOR REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE:

A minimum of 54 credits including 24 upper division credits. Industrial Education 4-5-6 is required in all concentrations except Graphics. The following courses are also required:

- Mathematics 1 or 21
- Physics 41, 42, 43 or 51, 52, 53

MINOR REQUIREMENTS:

A minimum of 27 credits including 6 upper division credits. Industrial Education 4-5-6 is required in all concentrations except Graphics.

PROFESSIONAL

114. INDUSTRIAL ARTS DESIGN. Basic principles of design as applied to the various industrial arts, including theory of color and study of major periods and styles of furniture. Three credits; autmn; M.W.F., 7:30.

147. COURSE CONSTRUCTION. Establishment of objectives, analysis and selection of content, course of study outline, lesson plans, standards of attainment. Required prior to Directed Teaching. Three credits; autumn; M.W.F., 10:15.

148. METHODS OF TEACHING INDUSTRIAL ARTS. Methods and techniques in selection, presentation, and testing content material in industrial subjects. Prerequisite: 147. Required prior to Directed Teaching. Three credits; winter; M.W.F., 10:15.
SHOP ADMINISTRATION AND PLANNING. School shop planning, supplies, personnel organization, and shop management. Required prior to Directed Teaching. Three credits; spring; M.W.F., 10:15.

HISTORY OF INDUSTRIAL ARTS. Origin and growth of industrial arts, emphasizing aims and objectives in the field of education. Two credits; autumn; T.Th., 8:25.

SPECIAL PROBLEMS IN INDUSTRIAL EDUCATION. Supervisory experience for prospective teachers or tradesmen, research problems, or teaching-aid construction. Area to be selected in counsel with department head. Prerequisite: lower division work in same area for supervisory or teaching-aid construction. Six credits maximum from this and/or Special Projects.

AUTOMOTIVE

1, 2, 3. AUTOMOTIVE MECHANICS. A comprehensive basic course on the construction details and service adjustments of the automobile with disassembly, inspection and reassembly of units in the laboratory. Autumn, engine units; winter, automotive electricity; spring, chassis units. Three credits; autumn, winter, spring; T.Th., 7:30. Laboratory, T. or Th., 1:15-4:15.

59. GENERAL BODY AND FENDER REPAIR. Fundamentals of automobile sheet metal, its repairability and basic operations used in reshaping and refinishing. Two credits; spring; M., 1:00. Laboratory, M., 2:00-5:00.

101. ENGINE MAINTENANCE AND REPAIR. Special attention to removal, disassembly, inspection, repair and reassembly of the automotive engine. Prerequisite: 1 or equivalent. Two credits; autumn; W., 1:00. Laboratory, W., 2:00-5:00.

102. AUTOMATIC TRANSMISSION SERVICE. Special attention given to hydraulic drives and planetary gearing with practice on the G. M. Hydromatic transmission and a survey of other makes. Prerequisite: 3 or equivalent. Two credits; winter; W., 1:00. Laboratory, W., 2:00-5:00.

103. ENGINE TUNE-UP. Special attention to the fuel and electric systems, trouble shooting and testing engine performance. Prerequisite: 1, 2 or equivalent. Two credits; spring; W., 1:00. Laboratory, W., 2:00-5:00.

GRAPHICS

4-5-6. MECHANICAL DRAWING. Technical drawing including: care and use of instruments, geometry, orthographic projection, auxiliary views, sections, oblique, revolutions, isometric, working drawings, and development. Application to practical problems with emphasis on visualization and analysis. Two credits; autumn, winter, spring. Laboratory, M.W.F., 7:30-9:15.

22 or 23. BOOKBINDING. Practical basic course in the art and craft of bookbinding, designed to afford the student a comprehensive knowledge of the steps in the process of rebinding books, and applied crafts. Two credits; five hours laboratory; winter or spring. Laboratory, M.T.W. or Th., 12:45-5:45.

24, 25-26. PRINTING. Letterpress printing, straight and display composition, typographical design, imposition and simple presswork. Three credits; autumn, winter, spring; T., 7:30. Laboratory, M.T.W. or Th., 12:45-5:45.

33. PHOTOGRAPHY I. Basic principles involved in both color and black-and-white. Theory and practice of exposure, development, contact printing, and enlarging. Study of various types of equipment. Two credits; spring; T.Th., 8:25.

91-92-93. PRINTING PRESS OPERATION. Hand-fed and automatic presswork. Instruction in the preparation of jobs for the press and make-ready, as well as the care and operation of the presses. Prerequisite: 24, 25-26 or equivalent. Two credits; autumn, winter, spring. Laboratory, M.T.W. or Th., 12:45-5:45.

105. PRINTING MANAGEMENT. Operating management of a commercial printing plant, purchasing of equipment and supplies, inventory control, pricing, personnel and production supervision. Two credits; winter; T.Th., 7:30.

107-108-109. LINOTYPE COMPOSITION. Care and operation of the linotype machine, study of the assembling, casting, and distributing mechanisms, keyboard practice and composition of straight matter, tabular forms, and display work. Prerequisite: 24, 25-26 or equivalent. Two credits; autumn, winter, spring. Laboratory, M.T.W. or Th., 12:45-5:45.

117-118-119. OFFSET LITHOGRAPHY. Laboratory experience in offset photography, plate making, cold type composition, and presswork. Prerequisite: 24, 25-26 or equivalent. Three credits; autumn, winter, spring, Th., 7:30. Laboratory, M.T.W. or Th., 12:45-5:45.

132. PHOTOGRAPHY II. Composition, photochemistry, optics, and advanced study of printing, enlarging and processing of chromatic and monochromatic mediums, with manipulative experience. Camera required. Prerequisite 33 or equivalent. Three credits; winter; T.Th., 8:25. Laboratory, M.T.W. or Th., 2:00-5:00.

134, 135, or 136. PHOTOGRAPHIC ASSIGNMENTS. Experience in commercial photographic assignments embodying shooting, processing, and finishing prints for publication. Prerequisite 132 or equivalent. One credit; autumn, winter, or spring; M.T.W. or Th., arranged.

METALS

54. GAS WELDING. Basic gas welding, oxyacetylene cutting, braze welding and brazing. Particular attention to the safe use of equipment. Three credits; autumn; Th., 10:15. Laboratory, M. or Th., 12:45-5:45.

55. ARC WELDING. Techniques and processes of electric welding with attention to good design, correct and safe use of equipment. Three credits; winter; Th., 10:15. Laboratory, M. or Th., 12:45-5:45.

56. WELDING PROBLEMS. Application of courses 54, 55, together with further study of special processes, with direct emphasis on production of assigned and student-selected projects. Prerequisite: 54 and 55 or equivalent. Three credits; spring; Th., 10:15. Laboratory, M. or Th., 12:45-5:45.
71-72-73. SURVEY OF METAL PRACTICE. Particularly for mechanical engineering and physics majors, but is open to Industrial Education majors and minors, who have taken no credit in metals. Gives a broad introduction to manufacturing operations, with factors influencing design and production. Three credits; autumn, winter, spring; M.W., 8:25. Laboratory, T., 12:45-3:25; T., 3:20-6:00; W., 12:45-3:25 or W., 3:20-6:00.

74-75-76. MACHINE TOOL PRACTICE I. Theory and manipulation of basic machine tools, bench work, hand operations, and machine operations combined with prescribed and student-selected projects. Three credits; autumn, winter, spring; T., 10:15. Laboratory, M. or Th., 12:45-5:45.

*141-142-143. MACHINE TOOL PRACTICE II. Advanced processes of turning and hand work together with operations involving milling, shaping, and grinding, gear calculation and cutting, with definitely assigned exercises, together with student-selected projects. Prerequisite: 74-75-76, or equivalent. Three credits; autumn, winter, spring; T., 10:15. Laboratory, M.T.W. or Th., 12:45-5:45.

WOODS

41, 42, 43. WOOD TURNING I. Spindle, face plate, and chuck turning. Assigned projects, and original designs, including finishing. Two credits; autumn, winter, spring; M.T. or W., 2:00-5:00.

61, 62, 63. COLLEGE WOODWORK. Working drawings, hand and machine operations, and finishing as applied to basic furniture construction and cabinet making. Two or three credits; autumn, winter, spring; T., 8:25. Laboratory, three or five hours, M.T. or W., 2:00-5:00.

64-65-66. MINIMALIC CONSTRUCTION. Application of carpentry fundamentals including actual construction in miniature from architect's plans; laboratory work in framing of rafters and selected architectural sections with full-size lumber. Two credits; autumn, winter, spring; Th., 2:00. Laboratory, Th., 3:00-6:00.

*115. FURNITURE CONSTRUCTION. Power machines, jigs, attachments, as applied to furniture making. Prerequisite: 61, 62, 63 or equivalent. Three credits, winter; M.W.F., 7:30.

121, 122, 123. ADVANCED WOODWORK. Advanced operation with power machines, finishing methods and design. Assigned and student-selected projects. Prerequisite: 61, 62, 63 or equivalent. Course 114 prerequisite or concurrent. Two credits; autumn, winter, spring; M.T. or W., 2:00-5:00.

127, 128, or 129. WOOD TURNING II. Intricate cuts, special chucking devices, fancy turning. Prerequisite: four credits from 41, 42, 43. Two credits, autumn, winter, or spring; M.T. or W., 2:00-5:00.

GENERAL

125. FINISHING MATERIALS AND METHODS. Composition and application of finishing materials, selection and care of equipment. Two credits; winter; M.W., 7:30.

154, 155, or 156. MACHINE AND TOOL MAINTENANCE. Methods of care and maintenance of tools, machines, and supplementary equipment. Selection may be made in field of printing, metals, or woodworking. Prerequisite: adequate background in chosen fields. Two or three credits; autumn, winter, or spring; arranged.

194, 195, 196. SPECIAL PROJECTS. Advanced laboratory work in a chosen area, to be selected in counsel with the department head. Six credits maximum from this and/or Special Problems in Industrial Education. Prerequisite: lower division work in chosen area.

LANGUAGES

MISS SORENSON, MR. LITKE, MR. STOEHR

The objectives of the courses in modern foreign languages are to develop the ability to speak, read, and write the language with sufficient competence to gain understanding of the culture where the language is spoken, to prepare students to teach the language, and to prepare for mission service. The Biblical languages are offered primarily for students in the School of Theology.

The department offers majors in Spanish and Modern Languages and minors in German, Spanish, and Biblical Languages.

SPANISH MAJOR REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:
A minimum of 40 credits beyond the elementary courses.

MODERN LANGUAGE MAJOR REQUIREMENTS:
A total of 58 credits in two languages with the grouping of 36 and 22 credits respectively, and exclusive of elementary courses.

MINOR REQUIREMENTS:
A minimum of 24 credits beyond the elementary courses.

SPANISH
1-2-3. ELEMENTARY SPANISH. Thorough grammatical analysis. Emphasis given to reading and the acquisition of a working vocabulary. The foundation of formal instruction in composition is laid in dictation and memorization. Five credits; autumn, winter, spring; M.-F., 7:30.

51, 52, 53. SPANISH READING. Selected readings from standard Spanish authors. A course designed for intermediate students who desire a reading knowledge. Prerequisite to any advanced course in literature. Three credits; autumn, winter, spring; M.W.F., 10:15.

54, 55, 56. SPANISH COMPOSITION AND CONVERSATION. Grammar and composition drills and idioms. Two credits; autumn, winter, spring; T.Th., 10:15.
INTRODUCTION TO SPANISH LITERATURE. A survey of the history of Spanish literature; lectures, reports, outside reading; the main currents of the development of the various branches of Spanish literature with a study of representative works. Three credits; autumn, winter, spring; M.W.F., 8:25.

SPANISH PRONUNCIATION. An analysis of the difficulties of Spanish pronunciation; abundance of individual drill and practical directions for remedial exercises. Two credits; winter; T.Th., 8:25.

SPANISH DIRECTED READING. The work consists of assigned readings and reports. Prerequisite: 101, 102, 103. One to three credits; autumn, winter, spring; T.Th., 1:00.

ADVANCED SPANISH CONVERSATION. Practice in conversation for those preparing to teach. Prerequisite: 54, 55, 56. Two credits; spring; arranged.

SPANISH ESSAY. A study of the important Spanish essayists and their representative essays. Three credits; autumn; M.W.F., 8:25.

LATIN AMERICAN LITERATURE. A survey of Latin American literature with special emphasis on the South American authors. Three credits; winter, spring; M.W.F., 8:25.

FRENCH

ELEMENTARY FRENCH. Thorough grammatical analysis. Emphasis given to reading and the acquisition of a working vocabulary. The foundation of formal instruction in composition is laid in dictation and memorization. Offered upon sufficient demand. Five credits; autumn, winter, spring; M.-F., 11:10.

FRENCH READING. Selected readings from standard French authors. A course designed for intermediate students who desire a reading knowledge. Three credits; autumn, winter, spring; M.W.F., 11:10.

GERMAN

ELEMENTARY GERMAN. Thorough grammatical analysis. Emphasis given to reading and the acquisition of a working vocabulary. The foundation of formal instruction in composition is laid in dictation and memorization. Practice in free oral and written expression. Five credits; autumn, winter, spring; M.-F., 11:10.

GERMAN READING. Continued analysis of the language; training in written and oral expression; composition, syntax, dictation; reading of modern literature with oral and written reports; increasing use of German in the classroom. Three credits; autumn, winter, spring; M.W.F., 10:15.

GERMAN COMPOSITION AND CONVERSATION. A comprehensive and thorough review of grammar; facility in oral and written expression; study of common idioms; analysis of difficult points of German syntax. Two credits; autumn, winter, spring; arranged.

INTRODUCTION TO GERMAN LITERATURE. A survey of the history of German literature from its beginning to the nineteenth

century, supplemented by a study of some of the masterpieces of the
language; reading from lyric and epic poetry of the period of the Minnes-
ger; plays and songs of the fifteenth and sixteenth centuries. Three
credits; autumn, winter, spring; M.W.F., 8:25.

153. MODERN GERMANY AND ITS LITERATURE. In this course
contemporary cultural developments in Germany will be discussed and
examined. They will be illustrated by readings from modern German
prose, lyric poetry, and dramas. Reports. Newspaper reading. Three
credits; spring; arranged.

154, 155, 156. GERMAN DIRECTED READING. The work consists of
assigned readings in the library and written reports. Prerequisite: 101,
102, 103. One to three credits; autumn, winter, spring; T., 1:00.

163. ADVANCED GERMAN COMPOSITION AND CONVERSATION.
Advanced composition, conversation, and reading; increased oral practice;
emphasis on fluency and accuracy in comprehension and reproduction; a
comprehensive review of grammar; acquisition of an extended vocabulary;
instruction largely in German; offered upon sufficient demand. Three
credits; spring; arranged.

BIBLICAL LANGUAGES

7-8-9. GREEK I. An introductory study of the elements of New Testa-
ment Greek with experience in translation. This course emphasizes the
development of the ability to read the original language, and at the same
time aims to create an interest in the New Testament. Readings of selected
portions, mainly from the First Epistle of John. Five credits; autumn,
winter, spring; M.-F., 7:30.

61, 62, 63. GREEK II. Intensive reading in the Greek New Testament
with emphasis upon exegesis and principles of interpretive translation.
The book of Revelation and selections from the Gospels are used in devel-
oping a facility in translation. Three credits; autumn, winter, spring; M.
W.F., 11:10.

121, 122, 123. DOCTRINAL EPISTLES OF PAUL. An exegetical study of
the great doctrinal epistles of Paul. Selections from the letters to the
Corinthians, Romans, and Galatians are especially studied as examples of
the apostle's theological writings. Two credits; autumn, winter, spring;
T.Th., 1:00.

*124, 125, 126. LATER EPISTLES OF PAUL. An exegetical study of
examples of Paul's later letters, especially the so-called prison epistles.
Selections from the letters to Timothy, Titus, and the Ephesians are studied
as typical of this period of the apostle's life. The epistle to the Hebrews
is also considered, with emphasis upon its relationship to the other epistles.
Two credits; autumn, winter, spring; T.Th., 1:00.

Emphasis is placed upon an intensive study of the grammar of this ancient
language. The student is taught the ability to read from the Hebrew Bible
and to use lexical materials. Three credits; autumn, winter, spring;
M.W.F., 1:00.

MATHMATICS

MRS. SCHLOTTHAUER, MR. BRINKER, MR. HARE

MAJOR REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:
A minimum of 45 credits including courses 21, 22, 23, and 51-52-53, and
21 upper division credits.

MAJOR REQUIREMENTS FOR A BACHELOR OF SCIENCE DEGREE:
A minimum of 45 credits including courses 21, 22, 23 and 51-52-53, and
21 upper division credits. A total of 90 credits in mathematics and science
including two of the elementary courses in Biology, Chemistry, or Physics
must be completed.

MINOR REQUIREMENTS:
A minimum of 28 credits including courses 21, 22, 23, and 51-52-53, and
4 upper division credits.

1. INTERMEDIATE ALGEBRA. A course beginning with funda-
mental arithmetic principles and continuing through their generalization
in introductory algebra. Does not apply on a Mathematics major or minor.
Four credits; autumn; Sec. A, M.T.W.F., 10:15; Sec. B, M.T.W.F., 11:10.

4-5-6. PLANE GEOMETRY. This course is designed for students who
lack the geometry requirement for college entrance. (No credit if geo-
metry was taken in high school.) Two credits; autumn, winter, spring;
T.Th., 11:10.

21. COLLEGE ALGEBRA. A course for those with two or more
semesters of preparatory algebra well recalled. Linear and quadratic
equations; binomial theorem; mathematical induction; complex numbers;
determinants; theory of algebraic equations. Prerequisite: 1 or a satis-
factory score on the Mathematics Placement Test. Four credits; autumn;
Sec. A, M.T.W.F., 8:25; Sec. B, M.-Th., 10:15; Sec. C, M.-Th., 11:10; winter;

22. PLANE TRIGONOMETRY. A study of the six trigonometric
functions and their use in the solution of the triangle. Prerequisite: 21.
Four credits; winter; Sec. A, M.T.W.F., 8:25; Sec. B, M.-Th., 10:15; spring;

23. ANALYTICAL GEOMETRY. The equations of the straight line
and conic sections and their relation to the rectangular and polar coordi-
nates. Prerequisite: 21, 22. Four credits; spring; Sec. A, M.T.W.F., 8:25;
Sec. B, M.-Th., 10:15.

51-52-53. CALCULUS. The elements of differential and integral cal-
culus with many problems in its application. Prerequisite: 23. Four
credits; autumn, winter, spring; Sec. A, M.-Th., 7:30; Sec. B, M.-Th., 8:25.
101. **INTRODUCTION TO MATHEMATICAL STATISTICS.** Probability, distributions for discrete and continuous variates, moment generating function, sampling, point estimation, coefficient of correlation, and testing of hypotheses. Prerequisite: 53. Two credits; autumn; arranged.

102-103. **SOLID ANALYTICAL GEOMETRY.** Typical equations of the plane, sphere, paraboloid, hyperboloid, and ellipsoid, and their relation to rectangular and polar coordinates. Includes determinant and matrix theory as applied to geometry of space. Prerequisite or corequisite: 53. Two credits; winter, spring; arranged.

151. **THEORY OF EQUATIONS.** Further study of complex numbers, solution of cubic and quartic equations, symmetric functions, determinants, resultants, and discriminants. Prerequisite: 51-52-53. Offered upon sufficient demand. Four credits; autumn, arranged.

152. **INTRODUCTION TO MODERN ALGEBRA.** Reinterpretation of the results of classical algebra, giving for greater unity and generality. Offered upon sufficient demand. Four credits; winter; arranged.

153. **COLLEGE GEOMETRY.** A course in advanced Euclidean plane geometry, including properties of the triangle, similarity, and harmonic points and lines. Offered upon sufficient demand. Four credits; spring; arranged.

161, 162, 163. **DIFFERENTIAL EQUATIONS AND ADVANCED CALCULUS.** The solution of the various types of differential equations with applications to problems in physics, engineering, and geometry. Infinite series; implicit functions; Reimann integration. Prerequisite: 53. Four credits; autumn, winter, spring; M.T.W.F., 7:30.

171, 172, 173. **INTRODUCTION TO ADVANCED ANALYSIS.** Partial differential equations; Fourier series; Vector and Tensor analysis. Prerequisite: 161, 162, 163. Offered upon sufficient demand. Four credits; autumn, winter, spring; arranged.

190. **SELECTED TOPICS IN MATHEMATICS.** Individual work to be carried on by the student, under the supervision of the instructor, and elected only after consultation with the head of the department. One or two credits; arranged.

**MUSIC**

MR. WEST, MISS BOND, MR. DAVIS, MR. GERNET, MR. HAFNER, MR. RANDOLPH

The department offers instruction for those who wish to choose music as a career and for those wishing to develop a cultural appreciation of music. Courses and instruction leading to the Bachelor of Music or the Bachelor of Arts degree are available.
BACHELOR OF MUSIC

Students wishing to become professional musicians should choose this degree and major either in Band and Orchestra instruments, Music Education, Piano, Organ, Violin, or Voice. Preparatory work in the chosen major and a natural gift for music are prerequisites. A total of 192 credits is required. Sincerity of purpose, application, and aptitude must be demonstrated during the first three quarters before full status as a major student is granted.

BAND AND ORCHESTRA INSTRUMENTS, PIANO, ORGAN, VIOLIN, OR VOICE

A recital during both the junior and senior years is required. Students must also register for piano as elective credit until an examination can be successfully completed. Ensemble is required for each quarter in residence. Voice majors must be in the choir, string majors in the orchestra, and brass and woodwind majors must be in orchestra or band. Voice majors who have had two units of French or German on the secondary level must register for 9 credits of French or German. Voice majors who have not had French or German on the secondary level must register for 15 credits.
**MUSIC EDUCATION MAJOR REQUIREMENTS FOR A BACHELOR OF MUSIC DEGREE:**

Students interested in teaching music in elementary or secondary schools should major in Music Education and complete certification requirements.

Piano is recommended. Students may choose another instrument but must demonstrate satisfactory attainment in piano or register for piano until the necessary competence has been achieved. Voice majors must be in choir, string majors must be in orchestra, and brass and woodwind majors must be in band or orchestra during each year in residence.

**BACHELOR OF ARTS**

The Bachelor of Arts degree is a nonprofessional degree with a total of 21 credits in one applied instrument. The prerequisites are completion of the preparatory work in the chosen major instrument and a natural gift for music. Candidates for this degree must meet all arts degree requirements.

60

The following course is also required:

History I, 2, 3

MINOR REQUIREMENTS:

A minimum of 30 credits including History of Music; Theory I; Applied Music, 6; and Ensemble, 3.

THEORY AND COMPOSITION

1. FUNDAMENTALS OF MUSIC. May not be counted toward a major or a minor. A basic course intended to lay a foundation in the following: notation, rhythm, scales, key-signatures, chords, terms, form, sight singing, and conducting. An elementary knowledge of the piano is beneficial but not a prerequisite. Two credits; autumn; T.Th., 7:30.

4-5-6. THEORY I. A composite course including harmony, keyboard harmony, diction, sight singing. Prerequisite: Course 1 and the ability to play hymns on the piano at sight. Four credits; autumn, winter, spring; M.-F., 8:25.

64-65-66. THEORY II. A composite course that continues the work begun in Theory I. Prerequisite: 4-5-6. Three credits; autumn, winter, spring; M.-Th., 7:30.

101-102-103. COUNTERPOINT. A study of 16th century polyphony through an analysis of 16th century composition and written exercises in the various modes in the five species for two, three, and four voices. The composition of a motet and an invention will be part of the spring quarter's work. Two credits; autumn, winter, spring; T.Th., 10:15.

104-105-106. FORM AND ANALYSIS. A study of the structures of music from the phrase to the sonata, rondo, and variation forms. Prerequisite: 64-65-66. Two credits; autumn, winter, spring; T.Th., 10:15.

151-152-153. ORCHESTRATION. A study of musical instruments and the art of arranging various compositions for full band or orchestra. Two credits; autumn, winter, spring; T.Th., 8:25.

*154, 155, 156. COMPOSITION. A study of the art of writing responses, hymns, anthems, and instrumental compositions in the smaller forms. Two credits; autumn, winter, spring; arranged.

102
HISTORY AND LITERATURE

57, 58, 59. SURVEY OF HISTORY AND LITERATURE OF MUSIC. A study of the form and styles of musical composition including the folk song, art song, oratorio, opera, suite, symphonic poem, sonata, symphony and fugue. This course does not presuppose a technical knowledge of music. Two credits; autumn, winter, spring; T.Th., 11:10.

157, 158, 159. HISTORY OF MUSIC. The development of music and musical form from earliest records through the Medieval, Renaissance, Baroque, Classical, Romantic, and Impressionistic periods to the present. (For music majors and minors only.) Three credits; autumn, winter, spring; M.W.F., 10:15.

MUSIC EDUCATION

51-52-53. PIANO METHODS. A class conducted as an introduction to the teaching of piano including the methods of teaching keyboard and pedal technique, sight reading, interpretation, repertoire, etc. One credit; autumn, winter, spring; arranged.

55-56. MUSIC IN THE ELEMENTARY SCHOOL. Prerequisite: 1 or its equivalent. The organization and presentation of the following phases of music will be studied: rote singing, note singing, part singing, song repertoire, child voice, rhythm band, notation, music history and appreciation. Two credits; winter, spring; T.Th., 7:30.

67, 68, 69. BRASS METHODS. Private instruction in brass instruments conducted as an introduction to the teaching of brass instruments and as demonstrations of class teaching of these instruments. The instruments to be taught include Cornet, Mellophone, French Horn, Trombone, Baritone, and Tuba. Active participation in a training band constitutes a part of this course. One to four credits; autumn, winter, spring; arranged.

71, 72, 73. WOODWIND METHODS. Private instruction in the teaching of such woodwinds as Clarinet, Oboe, Flute, and Bassoon with demonstrations of the class teaching of these instruments. One to four credits; autumn, winter, spring; arranged.

84, 85, 86. STRING METHODS. Private instruction in the playing of Violin, Viola, Cello, and Bass, as an introduction to the teaching of these instruments and as a demonstration of class teaching. One to four credits; autumn, winter, spring; arranged.

87, 88, 89. PERCUSSION METHODS. Private instruction in teaching and instruction in the various percussion instruments. One credit; autumn, winter, spring; arranged.

147. VOICE METHODS. A class conducted as an introduction to the teaching of voice, and will include a study of breathing, tone, diction, interpretation, and repertoire. Three credits; autumn; arranged.

*148. CHORAL CONDUCTING AND ORGANIZATION. Tone production, baton technique and interpretation, and repertoire. Organization of choirs and choruses at different grade levels. Materials and methods. Concerts and Sabbath services. Practical experience in conducting various vocal organizations on the campus. Prerequisite: 147. Three credits; winter; arranged.

149. INSTRUMENTAL CONDUCTING AND ORGANIZATION. Baton technique, score reading, interpretation, repertoire, problems of material, organizing the music library, planning and conducting concerts, organization within the band and orchestra, point systems, grading, and other topics. Prerequisite: 148. Three credits; spring; M.W.F., 8:25.

CHURCH MUSIC

62. CONDUCTING. A course for nonmusic majors designed to acquaint the student with the fundamentals of conducting congregational singing. Prerequisite: 1 or its equivalent. One credit; winter; arranged.

VOCAL AND INSTRUMENTAL ENSEMBLES

All music students are invited to take advantage of the excellent opportunities offered in the various ensemble activities. Students majoring in voice or orchestral instruments are required to participate in their respective organizations each year that they are in residence regardless of the ensemble credits accumulated. Piano and organ majors are also required to take some type of ensemble each year of residence.

No student will be given credit for any single quarter of Choir, Band or Orchestra until he has completed satisfactorily the spring quarter’s work.

71-72-73. CHORALE. Designed for those whose major interest is in voice. Membership by invitation only with selection based upon character, talent, and musicianship with preference shown those studying in the vocal department. Repertoire includes all types and periods of music both sacred and secular. Concert appearances, regularly scheduled church service appointments and quarterly field tours. One credit; autumn, winter, spring; arranged.

74-75-76. A CAPPELLA CHOIR. The College A Cappella Choir is a highly selective ensemble, balanced for four and eight-part singing. Representative works of the great masters of choral composition are studied, memorized and performed. In addition to public programs and serving as choir for the College church, the choir goes on tour each spring giving programs in our larger churches and academies in the Union. Membership in the choir depends upon strict compliance with the rules and standards of the organization. One credit; autumn, winter, spring; T.Th., 5:30.

77-78-79. THE WALLA WALLA COLLEGE CONCERT BAND. Frequent secular and sacred concerts are given for the students and community as well as performances in various cities. The repertoire includes brilliant military marches of Sousa, King, and others; orchestral transcriptions from such composers as Beethoven, Wagner, and Schubert; original symphonic compositions by Holst, Fauchet, Creston, and others. Auditions are required for the purpose of assigning chairs. One credit; autumn, winter, spring; T.Th., 9:20.

81-82-83. WALLA WALLA COLLEGE CONCERT ORCHESTRA. The orchestral repertoire is designed to familiarize the members with the

best symphonic literature. Each quarter the organization learns a new symphony in addition to the many lighter overtures and classic excerpts. The college symphony orchestra accompanies concerts performed by various members of the music faculty and students as well as choral organizations. One credit; autumn, winter, spring; M.W., 5:30.

APPLIED MUSIC

Applied music credit is based on the amount of practice and the number of lessons taken. For each credit the student is expected to do a minimum of four hours practice per week. Two lessons a week are required for more than two hours credit. The maximum allowed during any quarter is 4 credits. If student teachers are available their pupils may receive one-half credit. The grade and credit are jeopardized if the student fails to take the minimum lesson requirement—9 lessons or 18 lessons depending on whether he takes one or two lessons a week.

Music majors are required to take lessons on their chosen instrument each quarter regardless of the amount of credit accumulated.

Students enrolled in applied music are requested to secure the approval of their teachers before participating in public programs. Attendance at recitals is required for all majors.

The minimum piano requirements for those majoring in Voice, Violin, Clarinet, Trumpet, Trombone, and other orchestral instruments are as follows:

Technique: Major and harmonic minor scales, one, two, three, and four notes to a beat; major, minor, diminished, and augmented triads; solid and broken arpeggios.

Repertoire: Easier classics of Bach, Clementi, Mozart, and Haydn; compositions by nineteenth and twentieth century composers; hymns.

Sight reading: Second-grade material.

PIANO

Prerequisite: The candidate will be expected to perform, to the satisfaction of the head of the piano department, technique, studies, and pieces comparable in difficulty and style to the following works:

TECHNIQUE:

Major and Minor scales legato and staccato, four notes to a beat up to four octaves at a moderate tempo (M.M. quarter note = 92).

Major and Minor arpeggios in root position, first and second inversions legato four notes to a beat up to four octaves at a moderate tempo (M.M. quarter note = 80).

STUDIES:

Czerny—Op. 299
Heller—Op. 47
Bach—Little Preludes and Two-part Inventions

PIECES:

Haydn—Sonatas No. 11, No. 20 (Schirmer)
Mozart—Sonatas No. 3, No. 13 (Schirmer)
Beethoven—Sonata Op. 49, No. 1
Brahms—Waltzes

105
PIANO I. Bach, Two or Three Part Inventions, a Prelude and Fugue, movements from the French and English Suites; Beethoven, Sonata, Op. 14, No. 1; Romantic and Modern selections such as Mendelssohn's Songs Without Words.

PIANO II. Bach, a continuation of Inventions, Suites, Preludes and Fugues; Beethoven, Sonatas such as Op. 2, No. 1, and Op. 26, Concertos in C Major or B flat Major; Mendelssohn, Concerto in G Minor; Chopin, Polonaise in C Sharp Minor, Waltz in E Minor; Schumann, Bird as Prophet; other Romantic and Modern selections of similar difficulty.

PIANO III. Bach, Preludes and Fugues, Suites, Partitas; Beethoven, Sonatas equal to Op. 31, No. 3; Chopin, Etudes, Nocturnes, Preludes, Polonaises; other Romantic and Modern selections.

PIANO IV. Bach, transcriptions of organ works by Busoni, Tausig, Liszt; Beethoven, Sonatas such as Op. 53, Op. 57; Chopin, Etudes, Ballades, Scherzi; Liszt, Rhapsodies, Etudes; Schumann, Sonata in G Minor, Concerto in A Minor; selections by Debussy, Ravel, Prokofieff, Shostakovich, Kabelevsky, etc.

ORGAN

Prerequisite: The candidates will be expected to perform, to the satisfaction of the head of the organ department, technique, studies and pieces comparable in difficulty and style to those listed under piano prerequisites.

ORGAN II. Continuation of technical studies to suit individual needs. Dupre; Choral Preludes. Rheinberger: Trios. Bach: Choral Preludes from the Orgelbuchlein; Fugue in G Minor. Franck: Fantasia in C Major. Sonatas and other selections from the standard organ repertoire.

ORGAN IV. Bach: Chorale Preludes; Fantasia and Fugue in G Minor; Prelude and Fugue in D Major. Franck: Chorales; Piece Heroique. Widor; Fifth Symphony.

VOICE

Prerequisite: Possession of a good voice, ability to read and sing a simple song at sight and on pitch, ability to sing a folk song, a patriotic song or a hymn from memory to demonstrate voice, instinctive interpretive ability and sense of rhythm.

VOICE I. Classification of the voice, procedures leading to correct tone production, and simple classics and contemporary songs to assist tone production through articulation and interpretation. Study is given to the form and content of representative song material and to the easier arias and recitatives from the major oratorios.
VOICE II. Continuation of technical studies for development of the individual qualities of the voice. Additional songs, recitatives and arias from standard oratorios and operas.

VOICE III. German songs from Schubert, Schumann, R. Strauss, Beethoven, Grieg, and others, songs in English from Lully, Handel, Tschaikovsky Rachmaninoff, Campbell-Tipton, Charles, Malotte and others; Italian and French songs from leading composers.

VOICE IV. Continuation of French, German, and Italian diction is required. Additional songs in English, French, German, and Italian are selected from the composers' best works; selected recitatives, arias and solos from other standard composers. Preparation of program for graduation recital, appearance as soloist with the College orchestra upon recommendation of the Conservatory faculty. At the end of four years, the student should have a repertoire of at least one hundred well-learned songs, many of which are memorized.

VIOLIN

Prerequisite: Before entering the freshman year, students must be prepared to be examined in any of the following preparatory materials:
Kayser Etudes Op. 20, bk. 2; Rode Caprices, Dont, Op. 37 and 38; Seitz Concertos; Rode Concerto Nos. 4, 7; Major and Minor Scales in 1st-5th positions.

VIOLIN I. Etudes: Kreutzer; Rode Caprice; Sonatas: Handel Tartini in G Minor; Concertos: Spohr Nos. 2, 6, Viotti Nos. 22, 23, Mozart A Major. Major and Minor three octave scales; also thirds; sixths, simple octaves, and tenths.

VIOLIN II. Etudes: Dont, Op. 35; Cavinies 24 Matinees; Concertos: Bach, A Minor; Vivaldi, A Minor and G Minor; Nardini; Mozart, D Major and E-flat Major.
Three octave scale plus arpeggios up to C in 4 octaves; continue thirds, sixths, tenths.

VIOLIN III. Etudes: Bach Sonatas for Violin alone; Paganini Caprices; Wieniawski Modern School Op. 10. Concertos: Wieniawski No. 2; Bruch G Minor; Mendelssohn; Saint-Saëns B Minor; Lalo Spanish Symphony; Spohr Nos. 8 and 9.

VIOLIN IV. Bach Sonatas for Violin alone; Paganini Concerto; Ernst, F-sharp Minor; Bruch, D Minor; Beethoven and Franck Sonatas.
The student should further demonstrate adequate ability in sight reading and should be able to sight read simple piano accompaniments.

CLARINET

TRUMPET

TRUMPET I. The prerequisite for this course is an embouchure already well formed approximately in the center of the mouth with no physical characteristics which would impair ultimate potential achievement. The emphasis in this grade is upon a review, if necessary, of material listed in the Preparatory Department with the purpose of acquiring a correct and lasting command of the fundamental skills. The adaptation and study of a daily practice routine suitable to each individual, using additional material by introduction to transposition by clefs.

TRUMPET II. Concentration upon basic technique; slurs, scales, chords, intervals, single, double and triple articulations in the cycle of major and minor keys—using standard works such as Arban, St. Jacone and Clarke.

The development of tone production and its application to a variety of styles, using as material vocalises, lieder of Schubert, Brahms, Schumann and others, and melodic studies by Duhem. Continued study of transposition by clef using the Williams School of Transposition and orchestral trumpet parts.

TRUMPET III. The study of etudes from more advanced sections of Wurm, Laurent, Chavanne, Fricke, Clarke, Petit, Arban and St. Jacone. Solo repertory by Goediche, Scriabin, Wormser, Busser, Fitzgerald, Vidal, Barat, Goeyens and Boeck.

Continuation of transposition by clef.

TROMBONE

TROMBONE I. Clef work covering all scales and chords; intensive study of slurs and legato playing for relaxation of embouchure; exercises in breath control; exercises in surety of attack in various intervals; songs and standard solos. Muller, King, Blume methods. Rochut, Book I.

TROMBONE II. Additional clef work; pieces for two or more trombones; special transcriptions of vocal technical studies. Lefosse, Blume, Rochut, Book II, Muller, Blasewitsch methods.

TROMBONE III. Advanced technical studies; intensive study of orchestra parts. Group playing. Couillaud; Rochut, Book No. 3; Blusser, Blume, Lefosse methods.

TROMBONE IV. Study of the "F" trombone; advanced studies in passing from one clef to the other; etudes in all rhythms and styles; concertos by Bigot, Salzedo, Saint-Saens, Stojowski; Flandrin method; Blasewitsch studies; symphonic works.
NON-DEPARTMENTAL

11. ARITHMETIC FOR COLLEGE STUDENTS. The course should be of value to all students who seek a proficiency in the use of arithmetical techniques. Three credits; autumn; arranged.

41-42-43. LIBRARY METHODS. Instruction in the use of books and periodicals, the classification and cataloging of books, the principles of school library administration, and the history of libraries. Practice work required. Three credits; autumn, winter, spring; T.Th., 11:10.

NURSING

For complete information concerning the School of Nursing and course descriptions, see pages 125 to 132.

PHYSICAL EDUCATION AND RECREATION

MR. WINTER, MR. DAHLBECK

The aim of the department is to promote those activities which stimulate habits of regular exercise and develop interests and skills which may be enjoyed throughout life. A major in physical education and minors in physical education or recreation are available.

The following courses are also required:
- Home Economics 1
- Nursing 83

The minor is to be chosen in counsel with the head of the department.

MINOR REQUIREMENTS IN PHYSICAL EDUCATION:
A minimum of 27 credits including courses 97, 98, 99; 161, 162, 163; and 9 upper division credits.

MINOR REQUIREMENTS IN RECREATION:
A minimum of 27 credits including courses 97, 98, 99; and 161.

1-2-3. FRESHMAN PHYSICAL EDUCATION. Calisthenics, games and contests in season. One-half credit; autumn, winter, spring; Men, Sec. A, T.Th., 10:15; Sec. B, T.Th., 11:10. Women, Sec. A, T.Th., 8:25; Sec. B, T.Th., 9:20; Sec. C, T.Th., 3:00; Sec. D, T.Th., 1:00.

4-5-6. DEVELOPMENTAL PHYSICAL EDUCATION. A course outlined specifically for those who have scored low in the entrance physical fitness examination or those interested in correcting remediable defects. One-half credit; autumn, winter, spring; arranged.

7, 8, 9. RESTRICTED PHYSICAL EDUCATION. A course outlined for those unable to take regular Freshman Physical Education. One-half credit; autumn, winter, spring; arranged.

ACTIVITY COURSES

The remainder of the Physical Education requirements for all students may be selected from activity courses. The beginning courses will deal with rules, nomenclature and special techniques of the activity as well
as considerable time in actual participation in the activity. Advanced students will be held responsible for all the requirements of the beginners and must display superior ability to qualify for the advanced class. All activity courses, with exception of skiing, carry one-half credit. Majors or minors in P.E. may make arrangements for one credit in activity courses by doing extra work. Permission to register for more than one activity course per quarter must be obtained from the head of the department.

51, 53. GOLF. Autumn, spring; M.W., 2:00; T.Th., 2:00.
52. BASKETBALL. Winter; Men, M.W., 4:00. Women, T.Th., 4:00.
54, 55, 56. BEGINNING SWIMMING. Autumn, winter, spring; arranged.
57, 58, 59. WEIGHT LIFTING. Autumn, winter, spring; arranged.
61, 62, 63. BADMINTON. Autumn, winter, spring; Sec. A, M.W., 11:10; Sec. B, T.Th., 5:00.
64, 65, 66. BEGINNING TUMBLING. Autumn, winter, spring; arranged.
67, 68, 69. ROLLER SKATING. Autumn, winter, spring; T.Th., 7:30.
71. TOUCH FOOTBALL. Autumn; arranged.
72. SKIING. One credit; winter; arranged.
73. TENNIS. Spring; Men, Sec. A, M.W., 8:25; Sec. B, M.W., 10:15; Sec. C, M.W., 11:10; Women, Sec. A, T.Th., 7:30; Sec. B, T.Th., 8:25; Sec. C, T.Th., 10:15; Sec. D, T.Th., 11:10.
74, 75, 76. TUMBLING AND APPARATUS. Autumn, winter, spring; arranged.
77, 78, 79. TRAMPOLINE. Autumn, winter, spring; arranged.
81, 82. VOLLEYBALL. Men, autumn, M.W., 4:00; winter, M.W., 3:00. Women, autumn, T.Th., 4:00.
83. ARCHERY. Spring; T.Th., 3:00.
86. WATER SAFETY. Spring; arranged.
89. BASEBALL. Spring; M.W., 3:00.
90. SOFTBALL. Spring; Men, M.W., 4:00. Women, T.Th., 3:00.
95, 96. LIFESAVING. Winter, spring; arranged.
100. TRACK AND FIELD SPORTS. Spring; arranged.
101, 103. ADVANCED GOLF. Autumn, spring; arranged.
102. ADVANCED VOLLEYBALL. Winter; Men, M.W., 3:00. Women, T.Th., 4:00.
107, 108, 109. ADVANCED TUMBLING. Autumn, winter, spring; arranged.
112. ADVANCED SKIING. One credit; winter; arranged.
115. ADVANCED BASKETBALL. Winter; arranged.
117, 118, 119. ADVANCED SWIMMING. Autumn, winter, spring; arranged.
THEORY COURSES

*84. ANATOMY. Gross anatomy: A study of the skeletal and muscular structure of the human anatomy. Three credits; autumn; T.Th., 7:30. Laboratory, arranged.

*85. KINESIOLOGY. Study of joint and muscular mechanism action of muscles involved in fundamental movements. Effect of gravity and other forces on motion. Prerequisite: 84. Three credits; winter; M.W.F., 7:30.

91. PHYSICAL EDUCATION IN THE ELEMENTARY SCHOOL. Preparation and administration of the activity program at the elementary level. Three credits; autumn; T.Th., 11:10. Laboratory, arranged.

*92. CARE AND PREVENTION OF INJURIES. First aid, conditioning, bandaging, and massage. Three credits; winter; T.Th., 11:10. Laboratory, arranged.

*93. CORRECTIVE PHYSICAL EDUCATION. A study of common abnormalities found in students which may be corrected or helped by proper exercise. Extent and limitations of the teacher’s responsibility in this phase of education. Three credits; spring; T.Th., 11:10. Laboratory, arranged.

**94. INTRAMURAL ACTIVITIES AND OFFICIATING. Mechanics of intramural organization and the art of officiating the various sports activities. Three credits; autumn; M.W.F., 10:15.

*97, 98, 99. PROFESSIONAL ACTIVITIES. Primarily for students majoring or minoring in Physical Education or Recreation. Methods, techniques, and the skills involved in various activities of the physical education program. Two credits; autumn, winter, spring; M.-Th., 1:00.

*133. PHYSIOLOGY OF EXERCISE. Physiological results of muscular exercise. Prerequisite: Biological Sciences 85. Three credits; spring.

**141, 142, 143. ADVANCED PROFESSIONAL ACTIVITIES. Primarily for students majoring or minoring in Physical Education or Recreation. Methods, techniques, and advanced skills involved in various activities of the physical education program. Two credits; autumn, winter, spring; M.-Th., 1:00.

*161. FOUNDATIONS OF PHYSICAL EDUCATION. History and theory of physical education. A practical study of the reasons physical education should be included in the school program and the unique contribution it makes to education. Three credits; autumn; M.W.F., 7:30.

*162. TESTS AND MEASUREMENTS IN PHYSICAL EDUCATION. A study of various testing devices which may be used in physical education. Practical experience will be given by test administration and scoring. Three credits; winter; M.W.F., 7:30.

*163. ADMINISTRATION OF PHYSICAL EDUCATION AND HEALTH IN SECONDARY SCHOOLS. Study of problems in schedules, organization, group activities, and testing needed on the secondary level. Three credits; spring; M.W.F., 7:30.

*Offered only when school year ends with odd number.
**Offered only when school year ends with even number.
191. SPECIAL PROBLEMS. Selected problems in health, physical education, or recreation. One to three credits any one quarter. (No more than three hours will be allowed in any one field.) Arranged.

192, 193. SEMINAR. A study of the modern trends in physical education. Group discussion and presentation of current material in the field. Prerequisite: senior standing. One credit; winter, spring; arranged.

197. METHODS OF TEACHING PHYSICAL EDUCATION. Observation of practices in physical education classes. Class recitation by appointment. One credit; arranged.

RECREATION

*105. COMMUNITY RECREATION. A course intended to fill the need for recreational leadership among our young people. Intensive study of recreational problems among our youth. Three credits; winter; arranged.

*123. CAMPCRAFT AND MANAGEMENT. A course to help in the preparation of competent summer camp leaders. Two lectures per week, with laboratory work in the form of junior group leading on occasion. Three credits; spring; arranged.

124, 125, 126. ARTS AND CRAFTS. This course is offered to help plan the leisure time activity of young people as well as preparation for a hobby in later life. Various hobby crafts, such as leathercraft, plastic craft, wood carving, textile painting, lapidary, and others, will be offered. Two credits; autumn, winter, spring; M.W., 4:00-6:00.

*153. LEADERSHIP IN CAMPING AND CAMPCRAFT. A class for those interested in advanced work in this field. These students will act as laboratory instructors for those in course 123. Prerequisite: 123 and permission of instructor. Two credits; spring; arranged.

164, 165, 166. ADVANCED ARTS AND CRAFTS. Continuation of 124, 125, 126, with special emphasis upon teaching methods, preparation of teaching aids, sources of material, cost, etc. Two credits; autumn, winter, spring; arranged.

*174, 175, or 176. RECREATIONAL LEADERSHIP. Practical recreation direction in connection with the community recreation program of College Place. Two credits maximum; a u t u m n, winter or spring; arranged.

*Offered only when school year ends with odd number.
**Offered only when school year ends with even number.
PHYSICS

MR. BROWN, MR. BARNETT, MR. BELL

The department offers a major in physics and in engineering physics. Students with a general interest in the field or those planning to teach should major in physics and choose the Bachelor of Arts or the Bachelor of Science degree. The Bachelor of Science with an engineering physics major is recommended for those planning a career in scientific research or engineering research and development.

Nuclear Physics Laboratory  153A  2
Special Problems in Physics  190  3

The following courses are also required:
Chemistry 21-22-23.
Industrial Education 71-72-73.
Mathematics 161, 162, 163.
Mechanical Engineering 1-2-3.
Speech 1-2 or 5-6.

Candidates for this degree must meet all general graduation requirements with the exception of Education, Language, Literature, and Psychology.

MINOR REQUIREMENTS:
A minimum of 27 credits.

21, 22. SURVEY OF PHYSICAL SCIENCE. Descriptive treatment of the more prominent elementary principles of astronomy, geology, physics, and chemistry to develop the scientific cultural background of students who are not science majors. Does not apply on a Physics major or minor. Three credits; autumn, winter; M.W.F., 1:00.

41, 42, 43. GENERAL PHYSICS. An introductory course in mechanics, heat, sound, light, electricity, atomic and nuclear physics. Emphasis is placed on the contribution of physics to modern thought and experience. Prerequisite: Mathematics 1 or a satisfactory score on the mathematics placement test. Physics 41 prerequisite for 42 or 43. Corequisite: 41A, 42A, 43A. Three credits; autumn, winter, spring; M.W.F., Sec. A, 7:30; Sec. B, 8:25.

41A, 42A, 43A. GENERAL PHYSICS LABORATORY. Laboratory work integrated with 41, 42, 43. One credit; autumn, winter, spring; Sec. A, M., 2:00-5:00; Sec. B, T., 2:00-5:00; Sec. C, W., 2:00-5:00.

51, 52, 53. INTRODUCTORY PHYSICS. An introductory course in mechanics, heat, wave motion, sound, light, and electricity designed to give the science and the engineering major a preparation for his future work. Basic mathematical principles are emphasized. Course 51 prerequisite for 52 or 53. Course 51A, 52A, 53A, and Mathematics 51-52-53 corequisite. Three credits; autumn, winter, spring; M.W.F., 10:15.

51A, 52A, 53A. INTRODUCTORY PHYSICS LABORATORY. Laboratory work accompanying 51, 52, 53. One credit; autumn, winter, spring; Sec. A, Th., 8:30-11:00; Sec. B, Th., 2:00-5:00.

Physics 41, 42, 43 or 51, 52, 53 and Mathematics 51-52-53 are prerequisites for all courses numbered 100 or above.

101, 102. ELECTRICITY AND MAGNETISM. Electric and magnetic field theory, direct and alternating current circuit analysis, electric and magnetic properties of matter. Three credits; autumn, winter; M.W.F., 10:15.
101A, 102A. ELECTRICAL MEASUREMENTS. Laboratory work accompanying 101, 102 to familiarize the student with the apparatus and techniques for the basic direct and alternating current measurements. One credit; autumn, winter; M., 2:00-5:00.

111A, 112A, 113A. ELECTRONICS LABORATORY. Laboratory work accompanying 111, 112, 113. One credit; autumn, winter, spring; Th., 2:00-5:00.

121, 122. THEORETICAL MECHANICS. Mathematical treatment of the statics and dynamics of particles, fluids, and rigid bodies with emphasis on harmonic, orbital, and wave motion. Three credits; autumn, winter; M.W.F., 1:00.

133. THERMODYNAMICS. Basic principles of temperature and heat measurement, laws of thermodynamics, behavior of ideal gases, change of state, thermodynamic properties of matter. Four credits; spring; M.-Th., 10:15.

141, 142, 143. OPTICS. Reflection, refraction, dispersion, diffraction, interference, polarization, spectra, electromagnetic and quantum theories of radiation. Three credits; autumn, winter, spring; T. Th., 8:25. Laboratory arranged.

153. NUCLEAR PHYSICS. Atomic structure, nuclear structure, characteristics of alpha, beta, and gamma radiation, radioactivity, nuclear reactions, uses of radioisotopes, nuclear energy. Four credits; spring; M.-Th., 1:00.

153A. NUCLEAR PHYSICS LABORATORY. Experimental work on the statistics of nuclear radiation measurement, radioactive half-lives, intensity of radioactive sources, characteristics of alpha, beta, and gamma radiation, neutron activation. Two credits; spring; M.W., 2:00-5:00.

190. SPECIAL PROBLEMS IN PHYSICS. Directed independent study or laboratory investigation on selected advanced topics. Registration only on permission of the instructor. Credit arranged.

RELIGION

For complete information concerning the School of Theology, major and minor requirements, and course descriptions, see pages 121 to 124.
SECRETARIAL SCIENCE

MISS RITTENHOUSE, MISS ANDREWS, MRS. WEAVER

The degree program aims to integrate vocational preparation on the collegiate level with a broad cultural education. This program prepares students for professional secretariaship. The department also seeks to equip students with the knowledge and skills necessary for stenographers and general office workers.

MAJOR REQUIREMENTS FOR A BACHELOR OF ARTS DEGREE:

MINOR REQUIREMENTS:

117
11-12. BEGINNING TYPEWRITING. An introductory course with emphasis on basic theory and skills for personal and vocational use. Two credits; autumn, winter; Sec. A, M.-F., 7:30; Sec. B, M.-F., 11:10.

21-22-23. SHORTHAND THEORY. A course covering Gregg Shorthand principles with emphasis on correct writing and transcribing of shorthand notes. Courses 11-12, 13 must be taken concurrently unless the student has had the equivalent. Five credits; autumn, winter, spring; Sec. A, M.-F., 8:25; Sec. B, M.-F., 10:15.

31-32. INTERMEDIATE SHORTHAND. A course designed for students who have taken shorthand previously but who are not qualified for courses 97-98-99. Credit will not be given for both courses 21-22-23 and 31-32. Two credits; autumn, winter, spring; T.Th., 7:30.

42. FILING. A course in the theory and practice of the modern systems of filing. Two credits; winter; Th., 11:10. Laboratory, M., 2:00-5:00.

43. OFFICE MACHINES I. Instruction and practice in the operation of voicescription and duplicating machines. Prerequisite: 11-12, 13. Two credits; spring; Th., 11:10. Laboratory, M., 2:00-5:00.

55 or 56. SWITCHBOARD. Instruction in the organization and operation of a PBX system. Thirty hours switchboard practice with special instruction on the development of a pleasing telephone personality. One credit; winter or spring; arranged.

61-62-63. ADVANCED TYPEWRITING. A continuation of courses 11-12, 13 with emphasis on increase of speed, accuracy, and skill in the production of business papers. Prerequisite: 11-12, 13 or equivalent. Two credits; autumn, winter, spring; M.W.F., 1:00.

71, 72, 73. OFFICE PRACTICE. A laboratory course designed to give practice in office routines, operations, and responsibilities. Prerequisite: 11-12, 13. Three credits; autumn, winter, spring; T.Th., 7:30. Laboratory W., 2-5.

81 or 82. OFFICE MACHINES II. Instruction in the use of computing and adding machines. One credit maximum; autumn or winter; arranged.

97-98-99. ADVANCED SHORTHAND AND TRANSCRIPTION. A course planned to review the principles of Gregg Shorthand and to build speed in taking and transcribing business dictation. Emphasis on and extensive practice in the production of mailable transcripts. Prerequisite: 11-12, 13 and 21-22-23 or equivalent. Three credits; autumn, winter, spring; M.W.F., 7:30-9:15.

131-132. BUSINESS COMMUNICATIONS. A study of the principles basic to effective communication with application to specific problems related to business. Two credits; autumn, winter; T.Th., 11:10.

144, 145, or 146. ADVANCED OFFICE MACHINES. A laboratory course for students who desire to develop vocational proficiency in the operation of a specific office machine. Prerequisite: 43. One credit; autumn, winter, or spring; arranged.
157-158-159. SECRETARIAL PROCEDURES. A study of the duties and problems of the secretary in business and the professions. Includes the study of personality and office relations. Prerequisite: 11-12, 13; 21-22-23; and 42, 43. Three credits; autumn, winter, spring; T.Th., 10:15. Laboratory, T., 2:00-5:00.

167-168. SHORTHAND REPORTING. A course designed to build skill in reporting and transcribing congressional and other technical material at the higher speeds. Prerequisite: 61-62-63 and 97-98-99 or equivalent. Three credits; autumn, winter; M.W.F., 10:15.

*169. DENOMINATIONAL REPORTING. A study of the work of the denominational secretary, specialized vocabulary, and reporting procedures. Prerequisite: 21-22-23 and 97-98-99 or equivalent. Three credits; spring; M.W.F., 10:15.

179. MEDICAL REPORTING. A study of the duties of the medical secretary and the development of a basic medical vocabulary. Prerequisite: 21-22-23 and 97-98-99 or equivalent and Biological Sciences 52-53. Three credits; spring; M.W.F., 10:15.

181, 182, or 183. PROBLEMS IN SECRETARIAL SCIENCE. A course for senior students to give opportunity for supervised work experience and/or individual study of a problem in Secretarial Science. One or two credits; autumn, winter, or spring; arranged.

*197Typ. METHODS OF TEACHING TYPING. A survey of the objectives, methods, and techniques of teaching typewriting in the secondary school. Two credits; autumn; T.Th., 7:30.

197Sh. METHODS OF TEACHING SHORTHAND. Consideration of materials and methods in the teaching of shorthand in the secondary school. Two credits; autumn; T.Th., 7:30.

SPEECH

MR. PENNER, MRS. LAY

The objective of the department is to provide training in the speech arts that will enable students to communicate ideas effectively in a democratic society and to increase personal competence in the chosen career.

MINOR REQUIREMENTS:

A minimum of 27 credits including courses 1-2 or 5-6 and 9 upper division credits.

1-2, or 5-6. ESSENTIALS OF SPEECH. An introduction to the procedure of public speaking with emphasis on the acquirement of ease before an audience, a conversational attitude, and reasonable facility in pronunciation, articulation and voice production. Two credits; autumn, winter; Sec. A, T.Th., 7:30; Sec. B, T.Th., 8:25; Sec. C, T.Th., 10:15; Sec. D, T.Th., 11:10. Two credits; winter, spring; Sec. E, M.W., 8:25; Sec. F, T.Th., 9:20.
51. PARLIAMENTARY PROCEDURE. The theory and practice of parliamentary law, with much participation by all class members in an actual organization. Projects include the forming of a temporary and permanent organization, and the writing of a constitution. Two credits; autumn; M.W., 8:25.

53. ART OF INTERPRETATION. A course in reading from the printed page with fluency and effectiveness, especially from the Scriptures. A study of the various types of interpretative literature with a view toward its understanding for the purpose of public presentation. Two credits; spring; T.Th., 7:30.

56. DISCUSSION AND DEBATE. The theory and methods of group discussion; practice in forums, committee meetings, panels; the essentials of public debate; practice in research, analysis, organization, delivery. Two credits; spring; T.Th., 8:25.

84-85-86. TEACHERS' SPEECH. A course designed especially for teachers. Study of speech disorders, their diagnosis, and their treatment. Organization and delivery of speeches and consideration of the speech situations which teachers meet. Two credits; autumn, winter, spring; T.Th., 10:15.

112. SPEECH COMPOSITION AND ANALYSIS. A comprehensive treatment of speech organization, content, and delivery. Three credits; winter; M.W.F., 7:30.

113. EXTREMOPE SPEECH. A course stressing the practical application of speech to the student's major field of interest. It includes the study of the formal report as well as the study of speeches for social and business occasions with practice both inside and outside the classroom. Two credits; spring; T.Th., 11:10.

123. PERSUASIVE SPEAKING. Study of analysis and investigation of supporting material; participation in group discussion for problem solution, organization of a persuasive campaign. The value and practice of emotional content in persuasive speaking. Three credits; spring; M.W.F., 11:10.

141, 142. PULPIT ADDRESS. Preparation and delivery of sermons and other types of public speeches. Adequate opportunity for practice is provided by the laboratory facilities of the department and through the numerous speaking appointments. Three credits; autumn, winter; M.W.F., 10:15.

161. FUNDAMENTALS OF RADIO AND TELEVISION. A study of the technical aspects of radio and television communication. Prerequisite: 1-2 or 5-6. Three credits; autumn; M.W.F., 11:10.

162. RADIO PRODUCTION. A study of microphone technique, practice in announcing, and preparation and presentation of programs for broadcasting. Prerequisite: 1-2 or 5-6. Three credits; winter; M.W., 11:10. Laboratory, M., 2:00-5:00.

194, 195, 196. SPECIAL PROBLEMS IN SPEECH. A course designed to offer the advanced student opportunity to pursue investigation in special fields under the direction of the department. One or two credits each quarter; autumn, winter, spring; arranged.
SCHOOL OF THEOLOGY

MR. HEUBACH, MR. ALCOCK, MR. BALHARRIE, MR. GROVE, MR. LITKE, MR. LUDGATE, MR. STOEHR

The principal purposes of the School of Theology are to provide undergraduate education for students seeking to enter the ministry and to offer coursework desired by students in the various curricula of the College.

Selection of prospective candidates for the ministry is made on the basis of scholarship, spiritual qualities, social sympathies and skills, and cultural refinement. Ministerial students are admitted to upper division standing in the School of Theology only upon approval of the Theology faculty and must meet Seminary entrance requirements by completing a Theology major. An additional year of graduate study at the Seventh-day Adventist Theological Seminary is a prerequisite of the ministerial internship. A grade-point average of 2.50 is required for regular admission to the Seminary. Students on the undergraduate level are expected to average 16 credits per quarter and maintain a 2.00 (C) grade-point average. Any student registered for less than 10 credits is not considered in regular standing.

All students must successfully complete a senior comprehensive examination, meet all degree requirements listed on pages 43-48, and are urged to meet denominational teacher certification requirements by choosing appropriate courses in education as elective credit.

</tbody>
</table>

**MINOR REQUIREMENTS:**

A minimum of 30 credits including 9 upper division credits.

Courses 51, 52, 53, or the equivalent, and 12 credits chosen from courses 4, 5, 6; 11, 12-13 or 111, 112; 113; 121, 122, 123; 134, 135, 136; 161, 162, 163; and 184, 185, 186 must be included in the minor.

1, 2, 3. **BIBLE SURVEY.** An introductory course in the study of Biblical history. Beginning with the account of creation, the Scriptural record is traced through the whole Old Testament period to the times of Christ and the New Testament. Two credits; autumn, winter, spring; T.Th., 8:25.

4, 5, 6. **LIFE AND TEACHINGS OF JESUS.** A study of the life of Christ, His teachings, His methods, and the principles of His Kingdom as they apply to life in the world today. Two credits; autumn, winter, spring; Sec. A, T.Th., 8:25; Sec. B, T.Th., 11:10; Sec. C, M.W., 8:25; Sec. D, T.Th., 8:25; Sec. E, T.Th., 10:15; Sec. F, T.Th., 7:30; Sec. G, T.Th., 7:30; Sec. H, T.Th., 11:10.

11, 12-13. **DANIEL AND THE REVELATION.** An elementary course in the study of these two books and their prophecies as related to application and fulfillment in world history. Two credits; autumn, winter, spring; M.W., 10:15.

51, 52, 53. **FUNDAMENTALS OF CHRISTIAN BELIEF.** An introductory course in the evidences and principles of Christianity, consisting of a study of the basic concepts of religious faith and practice, and comprehensive groundwork in the fundamental doctrines held by the Seventh-day Adventist denomination. Two credits; autumn, winter, spring; Sec. A, T.Th., 10:15; Sec. B, T.Th., 1:00; Sec. C, T.Th., 7:30; Sec. D, T.Th., 11:10; Sec. E, T.Th., 7:30; Sec. F, T.Th., 8:25; Sec. G, T.Th., 1:00.

111. **DANIEL.** An advanced course on the historical setting and significance of the book. Church history is studied in relation to the prophetic features of the book to provide the student with a clearer insight into contemporary religious conditions. Three credits; autumn; M.W.F., 8:25.
112. THE REVELATION. An advanced course on the historical setting and significance of the book. Church history is studied in relation to the prophetic features of the book to provide the student with a clearer insight into contemporary religious conditions. Three credits; winter; M.W.F., 8:25.

113. EARLY CHRISTIAN CHURCH. Significant trends and events in the development of Christianity from the time of Christ to Charlemagne, including a study of the Church in relation to the Roman Empire, its missionary expansion, the influence of the Church fathers, doctrinal and organizational modifications, the heretical sects, the councils, Christological controversies, and the rise of the papacy. Three credits; spring; M.W.F., 8:25.

121, 122, 123. SPIRIT OF PROPHECY AND DENOMINATIONAL HISTORY. A careful review of the Gift of Prophecy in the remnant church. The bestowal of this gift in the beginning, after the fall of man, and its work during the centuries to the 1844 movement. The rise of the denomination in its connection with the prophetic movement of Revelation 10 and its development during the last one hundred years is carefully studied. Two credits; autumn, winter, spring; Sec. A, T.Th., 8:25; Sec. B, T.Th., 10:15.

134, 135, 136. HEBREW PROPHETS. A study of the major and minor prophets from the viewpoint that these things “were written for our admonition upon whom the ends of the world are come.” Attention is given to the historical setting of the prophecies, with careful exegetical study of the text, emphasizing the fundamentals of the gospel as contained therein. Three credits; autumn, winter, spring; M.W.F., 7:30.

143. CHURCH ADMINISTRATION. Study of church organization, election and duties of church officers, church boards, business meetings and finances, and opportunity for observation and participation in these phases of church activity. Careful study is given to principles of Christian worship and the special services of the church. Three credits; spring; M.W.F., 10:15.

151. RELIGION IN AMERICA. In this course consideration is given to the rise of denominations in America, the European background, the religious diversity in the colonies, slavery controversy and resultant church schisms, the great religious awakenings and revivals, and the struggle for religious liberty. Three credits; autumn; M.W.F., 7:30.

152. MODERN DENOMINATIONS. This course deals with the cardinal teachings of a number of the prominent religions of the world. Comparisons are made of the teachings relating to God, salvation, sin, and the future. Three credits; winter; M.W.F., 7:30.

153. WORLD RELIGIONS. A short study of the greater religions of mankind, such as Animism, Hinduism, Buddhism, Confucianism, Shintoism, Islam, and Christianity. Consideration is given to the historical setting out of which these religions arose, their founders, their basic teachings and rituals, their conceptions of God and man. Three credits; spring; M.W.F., 7:30.

161, 162. PHILOSOPHY OF RELIGION. A study of the fundamental reasoning underlying the Christian religion in general and the beliefs of Seventh-day Adventists in particular. The Christian solutions to the basic problems of life are considered. Three credits; autumn, winter; Sec. A, M.W.F., 8:25; Sec. B, M.W.F., 10:15.
163. **ESCHATOLOGY.** A study of the final events of this earth's history as outlined in the great lines of Bible Prophecy and the writings of Ellen G. White. Emphasis will be placed upon the important issues in the great controversy between good and evil and the final establishment of God's everlasting kingdom upon the earth. Three credits; spring; M.W.F., 10:15.

*171-172. PERSONAL EVANGELISM. A course designed for young men and women desiring to learn methods of individual religious instruction, the techniques of meeting objections, and the art of securing decisions. The preparation and giving of Bible studies will be featured. Special attention given to Junior and Youth Evangelism. Two credits; autumn, winter; T.Th., 10:15.

*174, 175. BIBLICAL BACKGROUNDS. An exploration of those archaeological, historical, and scientific studies of the present age which make the Scriptural record more meaningful. Special emphasis is placed upon recent archaeological and manuscript discoveries that throw light upon the life and times of the Bible period. Two credits; autumn, winter; T.Th., 8:25.

*176. MANUSCRIPTS OF THE BIBLE. A thorough review of the manuscripts that gave us the Word of God. The translations of the Bible are examined and specific attention is focused on the significant points for the minister and Bible instructor. Recent discoveries and recent work on manuscripts are reviewed. Two credits; spring; T.Th., 8:25.

177, 178, 179. **FIELD EVANGELISM.** Experience in evangelistic techniques is obtained by giving Bible studies and/or holding meetings. One credit; autumn, winter, spring; arranged.

181-182. **PUBLIC EVANGELISM.** Advance study in the art of preaching with particular emphasis upon Bible exposition. Detailed attention will be given to the various phases of evangelistic work including advertising and the planning of public meetings. This course is definitely designed for young men who desire to make the gospel ministry their vocation. Admission to the class will be upon the recommendation of the homiletics professor. Prerequisite: Speech 141, 142. Two credits; autumn, winter; T.Th., 11:10.

184, 185, 186. **NEW TESTAMENT EPISTLES.** An exegetical study of the epistles of the New Testament, attention being given in each case to the time, circumstances, place of writing, and the purpose for which it was written. Two credits; autumn, winter, spring; T.Th., 10:15.

192, 193. **SEMINAR IN RELIGION.** A review of principal areas in the field of religion and the problems of the young minister at home and abroad. Assigned topics for discussion. One credit; winter, spring; arranged.

*Not offered 1959-1960.*
SCHOOL OF NURSING

MR. HANSON, MISS STRATTON, MISS BADGLEY, MRS. BOECK, MISS BRENNER, MISS CASE, MISS EMERY, MISS FROMAN, MRS. JONES, MRS. MENKEL, MISS MILLER, MR. NULL, MISS SCHERESKY, MISS STAFFORD, MRS. YOUNG.

GENERAL INFORMATION

The program of Walla Walla College School of Nursing Curriculum has been developed for the purpose of preparing professional nurses who will be able to function in accordance with Seventh-day Adventist principles and ideals.

The school endeavors to develop the potentialities and skills needed to form the foundation for further development of leadership in the field of nursing, the hospital, the home, and the community.

The School of Nursing and the curriculum are fully accredited or approved by the following:
National Nursing Accrediting Service
Collegiate Board of Review of the Department of Baccalaureate and Higher Degree Programs of the National League for Nursing
Washington State Board of Professional Nurse Registration
Association of Seventh-day Adventist Colleges and Secondary Schools

The clinical division of the School of Nursing at the Portland Sanitarium and Hospital is approved by the following:
American College of Surgeons
American Hospital Association
American Medical Association
Council on Medical Education and Hospitals of the American Medical Association for Internships

ORGANIZATION

The nursing curriculum may be completed within four calendar years. Five quarters are spent on the main campus and ten quarters at the Portland division. Upon completion of the required curriculum the student is eligible to write denominational and State Board examinations for the R.N., and will receive the Bachelor of Science degree.

All students registered in the School of Nursing are subject to the general regulations of the College.

ADMISSION

Formal application for admission is required on a form supplied by the Registrar of the College. A recent photograph and a $2.00 fee must be included. The chief factors considered by the Admissions Committee of the College are good character, scholastic achievement, intellectual ability, and good health. Notification of acceptance is sent promptly after the applicant’s records of previous
work and recommendations have been received by the College. All records become
the property of the College and are kept on permanent file. Applications should
be made as early as possible prior to the quarter in which study is to commence.
Students who are allowed to register temporarily may not be permitted to remain in
college longer than one quarter without presenting a transcript of previous work.
The School of Nursing admits qualified male students in both the College and Clin-
ical Divisions. The program of studies is modified to meet their educational needs.

ENTRANCE REQUIREMENTS

Applicants for admission to the School of Nursing shall have been graduated
from a recognized secondary school with the following pattern of subjects included
in the units presented for entrance:

<table>
<thead>
<tr>
<th>Subject</th>
<th>Units</th>
</tr>
</thead>
<tbody>
<tr>
<td>English</td>
<td>3</td>
</tr>
<tr>
<td>Mathematics</td>
<td>2</td>
</tr>
<tr>
<td>History</td>
<td>1</td>
</tr>
<tr>
<td>Science</td>
<td>1 (biology or physics recommended)</td>
</tr>
<tr>
<td>Additional Academic Units</td>
<td>2</td>
</tr>
</tbody>
</table>

Prior to initial registration, the student must complete the entrance exam-
inations of the College, which include psychological, English and mathematics
placement, and physical examinations. In addition, the National League for Nurs-
ing Achievement Tests are administered to all students in the School of Nursing.

Completion of the first three quarters' work in the Campus Division does not
automatically admit the student to the Clinical Division. A committee represent-
ing the staff of both the College and the Clinical Divisions evaluates the aptitude
and qualifications of each student and selects those students who may proceed
with their training in the Clinical Division.

ADMISSION WITH ADVANCED STANDING

Upon completion of approximately one year of college work including the
courses required for entrance to the Clinical Division, Canadian Union College
students may be admitted directly to the Clinical Division. Students wishing to
do so are urged to plan carefully their college work with their college adviser or
to communicate with the Dean, School of Nursing, Walla Walla College, College
Place, Washington. Applicants seeking admission with advanced standing must
have their applications approved by the Admissions Committee of the College.

CLINICAL DIVISION

The Portland Sanitarium is a modern, scientifically equipped hospital with
more than ten thousand patient admissions per year. This offers broad and divers-
ified clinical experience for the student nurse. Pediatric experience is provided
by affiliation with the School of Nursing, University of Oregon Medical School at
Doernbecher Memorial Hospital for Children; psychiatric experience at the State
Psychiatric Hospital at Salem; and tuberculosis experience at the School of Nurs-
ing, University of Oregon Medical School, University State Tuberculosis Hospital.
Male students affiliate for urology at the University of Oregon Medical School.
DEGREE REQUIREMENTS

The degree of Bachelor of Science is conferred by Walla Walla College upon satisfactory completion of the Collegiate Nursing Curriculum. Students must have achieved a cumulative grade-point average of 2.00 (C). For further information concerning degree requirements, consult pages 43 to 48 of this Bulletin.

**Note:** Students will be rotated in clinical areas. Class hours and clinical practice average forty (40) hours a week. Two (2) hours of planned clinical instruction are given each week. Credit for clinical instruction is included in credit for clinical practice.

**NURSING EDUCATION AND HEALTH EDUCATION**

**NURSING EDUCATION CURRICULUM**

The degree program in Nursing Education has been planned to enable the graduate nurse to prepare for leadership positions as teacher of nursing in schools of nursing, head nurse and supervisory positions, and as administrator of nursing programs, and is offered to registered graduate nurses who have met the following prerequisites:

a. Graduation from an accredited secondary school or its equivalent and with School of Nursing entrance requirements completed.
b. Completion of the prenursing curriculum.
c. Graduation from an accredited school of nursing.

Graduate nurses will be expected to take the Graduate Nurse Qualifying Examination of the National League for Nursing before an evaluation of their nursing school transcript can be made.

This curriculum is designed to help the graduate nurse prepare for positions in head nurse management, teaching, and supervision.

Students fulfilling the requirements in this curriculum may complete the work for the Bachelor of Science degree in four quarters. A minimum of 64 credits is required, of which 21 or more must be selected from Group A listed below. A total of 54 upper division credits is required for the curriculum.

**Group A. Improvement of Subject Mastery and Techniques**

HEALTH EDUCATION CURRICULUM

The Health Education Curriculum has been developed to meet the objectives of the denomination and the constantly growing demand for nurses prepared as health educators and leaders in our schools and conferences. The prerequisites for admission to this curriculum are the same as for the Nursing Education Curriculum.

Students fulfilling the above requirements may complete the work for the degree in four quarters. A minimum of 64 credits is required from the following courses. From Group A, 21 or more credits must be selected. Enough other upper division credits should be selected to total 54. It is recommended that they be taken from Groups A, B, and C. The other 10 credits may be upper or lower division. Courses preceded by an asterisk are required.

GRADUATE STUDY

Nurses who have received the Bachelor of Science degree and who meet the requirements for admission to the Graduate Division of the College may pursue graduate study leading to a Master of Arts degree with a major in Education and areas of concentration in Health Education and Nursing Education. For further information consult with the department of Education or the Dean of the School of Nursing.

The courses required for the Bachelor of Science degree, Collegiate Nursing Curriculum, which are taught on the Portland Sanitarium and Hospital Division campus are described in the Walla Walla College School of Nursing Bulletin. Those offered on the Walla Walla College campus follow:

7. MICROBIOLOGY. The nature of bacteria and disease-producing organisms with their life habits and methods of reproduction. The relation of these organisms to disease in the human body. Five credits; autumn; M.-Th., 10:15. Laboratory, Sec. A, S., 8:00-11:00; Sec. B, M., 2:00-5:00; Sec. C, T, 2:00-5:00; Sec. D, Th., 2:00-5:00.

51. HISTORY OF NURSING. A survey course in nursing history designed to meet the needs of the students in nursing. Three credits; autumn; M.W.F., 1:00.

52-53. ANATOMY, PHYSIOLOGY, AND HEALTH. This course is designed for those who will complete their nursing curriculum at Portland. A general survey of human anatomy and physiology. Health principles will be integrated in this course. Five credits; winter, spring; M.-Th., 10:15. Laboratory, Sec. A, S., 8:00-11:00; Sec. B, M., 2:00-5:00; Sec. C, T., 2:00-5:00; Sec. D, W., 2:00-5:00.

130
85. HUMAN PHYSIOLOGY. A study of the functions of the human body, with practical application of this knowledge to everyday living. Three credits; winter; M.W.F., 8:25.

NURSING EDUCATION

155. CURRICULUM IN SCHOOLS OF NURSING. A course dealing with the general principles of construction, revision and administration of the curriculum in schools of nursing. Integration of the health point of view in the curriculum is considered. Three credits; winter; M.W.F., 1:00.

161. WARD TEACHING AND MANAGEMENT. Principles, procedures and problems of organization; methods for carrying out an effective clinical ward teaching program in a school of nursing. Three credits; autumn; M.W.F., 8:25.

162. SUPERVISION IN SCHOOLS OF NURSING. The principles underlying effective supervision. The problems of supervision and methods of supervision in the clinical field in a nursing school. Prerequisite: 161. Three credits; winter; M.W.F., 10:15.

163. ORGANIZATION AND ADMINISTRATION OF SCHOOLS OF NURSING. This course includes a study of the fundamental principles which underlie the organization and administration of schools of nursing with special reference to selection of students, nursing school budget, faculty, records, and educational policies. Three credits; spring; M.W.F., 8:25.

175 or 176. TRENDS IN NURSING. A seminar and conference class on trends in nursing. Analysis of the needs of the professional nurse. Nursing organizations are studied, and discussion of present conditions and problems in the field of nursing will be included. Three credits; winter; M.W.F., 11:10; spring; M.W.F., 10:15.

HEALTH EDUCATION

3. INTRODUCTION TO COMMUNITY HEALTH. An introduction to the health problems of a community, and the community resources available which offer the best solutions to these problems. Three credits; winter, Sec. A, M.W.F., 11:10; Sec. B, M.W.F., 1:00.

14, 15 or 16. HEALTH PRINCIPLES. A study of the healthy, wholesome personality including the underlying principles governing the harmonious development of the human body. It includes our denominational health principles and stresses both personal and community health. Three credits; autumn, winter, M.W.F., 10:15; spring, M.W.F., 8:25.

157, 158, or 159. DIRECTED TEACHING. Directed teaching in health subjects and nursing education as arranged. Adult home nursing classes may be included. Two to six credits; autumn, winter, spring, or summer; arranged.

167 or 169. CHILD AND YOUTH HEALTH. An analysis of the most important health problems of children and youth. A study of the principles, methods, and materials used in teaching health to these age groups. Practice given to selection, organization, and presentation of these materials. Three credits; autumn or spring; M.W.F., 7:30.
167A or 169A. **CHILD AND YOUTH HEALTH LABORATORY.** Practical experience in a laboratory situation is arranged for those electing this course. One credit; autumn or spring; arranged.

171. **SCHOOL HEALTH EDUCATION.** A study of basic principles of teaching health in elementary and secondary schools. Sources, selection, and use of materials in this field. Three credits; autumn; M.W.F., 1:00.

173. **HEALTH ADMINISTRATION.** A study of the administration of health programs in secondary schools and colleges. Participation in health activities is included. Open to graduate nurses only. Three credits; spring; M.W.F., 10:15.

178 or 179. **COMMUNITY HEALTH EDUCATION.** A study of the principles, methods, and materials used in disease prevention and health conservation. Experience will be given in participation in such programs in the community. Three credits; winter; M.W.F., 7:30; spring; M.W.F., 11:10.
FINANCIAL INFORMATION

The college operates on a cash basis and expects students to meet all financial obligations promptly. All students, including veterans, are required to make an advance deposit before registration as follows:

- Dormitory Students: $125.00
- Village Students: 100.00

The advance deposit is held in reserve until the last month of the school year or until the student leaves school. Students are expected to pay actual school charges at the close of each month. Clearance cards, issued when the advance deposit and satisfactory financial arrangements are made, must be presented to the registrar, residence hall deans, and at the cafeteria.

GENERAL INFORMATION

Student statements are rendered at the close of each month and are due on the 10th and past due on the 20th day of the following month. When settlement is not made by the 20th, the student is automatically requested to review his account with the management. All rates listed in this bulletin are subject to change without notice.

Tuition and room rental charges for the quarter are made in three equal installments. General, class, and laboratory fees are charged during the first month of each quarter. Students who register late are charged full tuition for the quarter in which credit is received.

REMITTANCES. Checks, drafts, and money orders should be made in favor of Walla Walla College and should be sent directly to the College Business Office. Inquiries concerning financial matters should be directed to the Business Manager, and those concerning the academic or instructional program should be directed
to the Dean of the College. No refunds, except room rental charges due to absences of more than two weeks caused by illness, are made.

RELEASE OF TRANSCRIPTS OR DEGREES. By action of the Board of Trustees of the College, a degree or transcript of credit may not be released until the student’s account is in balance. A student whose account is overdue may not be permitted to take the final quarter examinations.

EXAMINATION PERMITS. Examination permits are issued 15-20 days prior to quarter examinations. Students are required to have clearance cards five days before examinations are given. A $1.00 penalty per day will be assessed for issuance of late permits.

RESIDENCE HALL EXPENSES
Where there is dual occupancy the room rental charges for each student per quarter are as follows:

- Conard Hall: $75-78.00
- Sittner Hall: 75.00
- Union Hall: 69.00
- West Hall: 69.00

When rooms are available, single occupancy is permitted at an extra charge of $15.00 per quarter. The above charges include heat, electric lights to a maximum of 200 watts, and plain laundering not to exceed $1.00 per week. Students are required to sew name tapes, available at most department stores or at the College Laundry, on all clothing sent to the laundry.

ROOM RESERVATIONS. Students wishing to reside in College residence halls should make room reservation by paying a $15.00 deposit. Additional charges may be made if rooms are not vacated in a satisfactory condition or if damaged beyond normal use.

BOARD. The cafeteria plan is used in the College Dining Hall. The minimum charge for board per month is as follows:

- Men: $25.00
- Women: 23.00

STUDENT HEALTH CENTER. The clinical facilities and twelve beds of the Health Center are available for students requiring hospitalization or treatments. The Walla Walla General Hospital provides complete service with student discounts in case of serious illness or surgery. A reasonable charge is made for hospitalization in the Health Center in excess of four days per quarter.

TUITION AND FEES
The tuition rate is as follows:

- 12 - 16 credits: $171.00 per quarter
- 11 credits: 159.00
- 10 credits: 147.00
- 9 credits: 135.00
- 8 credits: 123.00
- 7 credits: 111.00
- 1 - 6, per credit: 17.40
  - Over 16, per credit: 17.40
SPECIAL TUITION. Triple tuition is charged for tutoring.

GENERAL FEE. All students registered for 6½ or more credits are charged $15.00 per quarter for gymnasium, health service, library, lyceum, and registration.

ASSOCIATED STUDENTS FEE. All students are automatically members of the Associated Students of Walla Walla College and are charged a fee of $6.00 per quarter. This fee covers the cost of *The Collegian, Mountain Ash*, Student Association Center, and Association dues.

8 .................................................. 5.00
12 ............................................... 7.00
16 ............................................... 8.50

Band and Orchestral Instruments.................................. 4.00

Band uniform and choir robe rental.......................... 2.00

MUSICAL ORGANIZATIONS
A fee of $2.00 per quarter is charged those participating in these organizations to cover part of the expenses for music, advertising, programs, etc.

SCHOLARSHIP PLAN
Students entering the colporteur work for the purpose of earning school expenses have the following plans available. The amounts in the last line are the delivery values, 50% of which the student must have as a cash credit with his Book and Bible House in order to receive credit at the College Business Office in the amount as indicated in the corresponding place in the first line. These scholarships are to be used for tuition, fees, board, room, and laundry.

Amount of Scholarship ................................................. $550 $650 $750 $850
Scholarship Award, 30 per cent ................................. 165 195 225 255

Amount for Student to Earn ........................................ 385 455 525 595
Amount for Student to Deliver ..................................... $770 $910 $1050 $1190

Students wishing the colporteur scholarship benefits must arrange to have the full amount of their required credit forwarded to the College before the close of the first six weeks of school.

STUDENT LABOR
Frequently, students who lack sufficient funds to defray college expenses are given employment in some industry connected with the institution. Thus, many are assisted in their efforts to secure an education. The student should not, however, expect to earn his entire expenses. Students are expected to register for 10 credits each quarter and are, therefore, limited in the amount earned through labor. The College Board has found it necessary to establish certain regulations concerning student labor. Where contracts are made with students to defray expenses by labor, the Board will not obligate itself to redeem such labor in cash should the student later find it impossible to attend college, nor is such transferable, except by special arrangement with the Board.
The rate paid to students will be set each period by the business manager in counsel with the heads of the industrial departments, and will be based on ability, industry, and faithfulness of the student. No labor credit will be honored unless the work assignment is authorized in writing by the Business Office.

MISCELLANEOUS

Stationery, textbooks, gym suits and equipment, and other materials needed for school work may be obtained at the College Store at reasonable prices. These items are to be paid for in cash at the time of purchase.

Students should bring their baggage checks to the College Business Office. No charge is made for hauling baggage during the first week of each quarter.

SCHOLARSHIP AND LOAN FUNDS

Certain individuals and organizations have made scholarship and loan funds available. These are primarily for assisting worthy students beyond the freshman year. For information see the Business Manager. The funds are as follows: Alumni Association Student Loan Fund, Bertha Schneider Theology Student Loan Fund, Carrie Welch Student Fund, Grettner Student Loan Fund, Summer Class of 1953 Loan Fund.

BEQUESTS AND DONATIONS

Since it is highly important that the College Board should not be hampered by a lack of funds in its efforts to give the very best training to young people, we invite those whom God has blessed with means to remember the cause of Christian education. All bequests and donations should be made payable to Walla Walla College.
