Pre-Nutrition & Dietetics
Associate of Science
2020-2021

General Areas of Service: Dieticians and nutritionists plan nutrition programs and supervise the preparation and serving of meals. They help prevent and treat illnesses by promoting healthy eating habits. They scientifically evaluate clients' diets and suggest modifications such as less salt for those with high blood pressure or reduced fat and sugar intake for those who are overweight. Dieticians translate the science of nutrition into the skill of furnishing optimal nourishment to people. Increased recognition of the value of nutrition in medical, dental, and health education offers the dietician a steadily widening horizon of professional opportunities. Opportunities may also be found in healthcare research programs, food industries, state agencies, and nutritional care management.

Professional Training: The basic educational requirement is a bachelor's degree with a major in dietetics, foods and nutrition, food service systems management, or a related area. Students take courses in food, nutrition, institution management, chemistry, biology, microbiology, and physiology. Nutrition and Dietetics may be taken at the master's level with a bachelor's degree in health or related majors.

Job Outlook: According to the Bureau of Labor Statistics (BLS), “[e]mployment of dietitians and nutritionists is projected to grow 11 percent from 2018 to 2028, much faster than the average for all occupations.” The BLS states, “In recent years, interest in the role of food and nutrition in promoting health and wellness has increased, particularly as a part of preventative healthcare in medical settings.” Dietitians with specialized training, an advanced degree, or certifications beyond the particular State’s minimum requirement will experience the best job opportunities. Those specializing in renal and diabetic nutrition or gerontological nutrition will benefit from the growing number of diabetics and the aging of the population. (See www.bls.gov)

Earnings: In their May 2019 salary survey, the Bureau of Labor Statistics reports the median annual wage for dietitians and nutritionists as $61,270, with the lowest 10 percent earning less than $38,890 and the highest 10 percent earning more than $87,360. (See www.bls.gov)

Note: The clinical portion of this degree cannot be completed at Walla Walla University.
TOTAL CREDITS REQUIRED: 96 cr. See the Undergraduate Bulletin for Details

The chart below details one suggested path a student may take to complete an associate's degree in Pre-Nutrition & Dietetics. Cognates are listed in italics.

- Survey of Health (HLTH 205)
- Consumer Health (HLTH 331)

This set of classes fulfills the pre-requisites for entry into the Nutrition and Dietetics program at Loma Linda University. Students completing the following core curriculum will be awarded an AS degree in Pre-Nutrition and Dietetics. This degree may also apply to other professional programs. If you are planning on attending a different university's Nutrition and Dietetics program, please check their program requirements.

Requirements for Loma Linda University:
1. A minimum of 96 credits for admission.
2. C- grades are not accepted. A 3.0 GPA or higher is needed for acceptance.
3. High school courses in algebra and geometry required. Intermediate Algebra (MDEV 003) in college, or higher level mathematics course recommended.

The clinical portion of this degree cannot be completed at Walla Walla University.
